Contents

Chapter 1
Introduction to Business Forecasting 1

Introduction 1
Quantitative Forecasting Has Become Widely Accepted 2
Forecasting in Business Today 2
  Krispy Kreme 3
  Bell Atlantic 4
  Columbia Gas 4
  Segis Italia 4
  Pharmaceuticals in Singapore 5
  Fiat Auto 5
  Douglas Aircraft 5
  Brake Parts, Inc. 6
  Some Global Forecasting Issues:
  Examples from Ocean Spray Cranberries 6
Forecasting in the Public and Not-for-Profit Sectors 7
Forecasting and Supply Chain Management 9
  Collaborative Forecasting 11
  Computer Use and Quantitative Forecasting 13
Qualitative or Subjective Forecasting Methods 15
  Sales-Force Composites 15
  Surveys of Customers and the General Population 16
  Jury of Executive Opinion 17
  The Delphi Method 17
  Some Advantages and Disadvantages of Subjective Methods 18
New-Product Forecasting 18
  Using Marketing Research to Aid New-Product Forecasting 19
  The Product Life Cycle Concept Aids in New-Product Forecasting 20
  Analog Forecasts 21
  Test Marketing 22
  Product Clinics 22
  Type of Product Affects New-Product Forecasting 22
  The Bass Model for New-Product Forecasting 23
  Forecasting Sales for New Products That Have Short Product Life Cycles 24
  Two Simple Naive Models 28
  Evaluating Forecasts 31
  Using Multiple Forecasts 33
  Sources of Data 34
  Forecasting Total Houses Sold 35
  Overview of the Text 36
  Comments from the Field 38
  Integrative Case: Forecasting Sales of The Gap 39
  An Introduction to ForecastX™ 6.0 44
  System Requirements 44
  Install Procedure 44
  Forecasting with the ForecastX Wizard™ 44
  Using the Five Main Tabs on the Opening ForecastX™ Screen 47
Suggested Readings and Web Sites 51
Exercises 52

Chapter 2
The Forecast Process, Data Considerations, and Model Selection 55

Introduction 55
The Forecast Process 55
  Trend, Seasonal, and Cyclical Data Patterns 58
Data Patterns and Model Selection 61
A Statistical Review 63
  Descriptive Statistics 63
  The Normal Distribution 68
  The Student’s t-Distribution 71
Contents

Statistical Evaluation of Multiple-Regression Models 227
  Three Quick Checks in Evaluating Multiple-Regression Models 227
  Multicollinearity 232
  The Demand for Nurses 233
  Serial Correlation: A Second Look 234
Serial Correlation and the Omitted-Variable Problem 236
  Alternative-Variable Selection Criteria 238
Accounting for Seasonality in a Multiple-Regression Model 240
Extensions of the Multiple-Regression Model 250
Advice on Using Multiple Regression in Forecasting 257
Forecasting Jewelry Sales with Multiple Regression 257
  Forecasting Consumer Products 265
Integrative Case: ForecastX™ to Make Multiple-Regression Forecasts 271
Suggested Readings 273
Exercises 273

Chapter 6

Times-Series Decomposition 287
The Basic Time-Series Decomposition Model 287
Deseasonalizing the Data and Finding Seasonal Indices 290
Finding the Long-Term Trend 297
Measuring the Cyclical Component 297
  Overview of Business Cycles 298
  Business Cycle Indicators 299
  The Cycle Factor for Private Housing Starts 300
The Time-Series Decomposition Forecast 304
  Forecasting Shoe Store Sales by Using Time-Series Decomposition 307
  Forecasting Total Houses Sold by Using Time-Series Decomposition 308
  Forecasting Winter Daily Natural Gas Demand at Vermont Gas Systems 310
Integrative Case: ForecastX™ to Make Time-Series Decomposition Forecasts 314
Suggested Readings 315
Exercises 316
Appendix: Components of the Composite Indices 328

Chapter 7

ARIMA (Box-Jenkins)–Type Forecasting Models 332
Introduction 332
The Philosophy of Box-Jenkins 333
Moving-Average Models 335
Autoregressive Models 341
Mixed Autoregressive and Moving-Average Models 345
Stationarity 346
The Box-Jenkins Identification Process 350
  Comments from the Field 355
ARIMA: A Set of Numerical Examples 356
  Example 1 336
  Example 2 336
  Example 3 359
  Example 4 361
Forecasting Seasonal Time Series 367
  Total Houses Sold 368
  Intelligent Transportation Systems 372
Integrative Case: Forecasting Sales of The Gap 374
Using ForecastX™ to Make ARIMA (Box-Jenkins) Forecasts 379
Suggested Readings 381
Exercises 382
Appendix: Critical Values of Chi-Square 388

Chapter 8

Combining Forecast Results 389
Introduction 389
Bias 391
An Example 391
What Kinds of Forecasts Can Be Combined? 395
Considerations in Choosing the Weights for Combined Forecasts 396
Three Techniques for Selecting Weights When Combining Forecasts 400
Justice Is Forecast 402
An Application of the Regression Method for Combining Forecasts 404
Forecasting Total Houses Sold with a Combined Forecast 406
Comments from the Field 412
Integrative Case: Forecasting The Gap Sales Data with a Combination Model 413
Using ForecastX™ to Combine Forecasts 417
Suggested Readings 419
Exercises 420

Chapter 9
Forecast Implementation 426
Keys to Obtaining Better Forecasts 426
The Forecast Process 429
Step 1. Specify Objectives 430
Step 2. Determine What to Forecast 431
Step 3. Identify Time Dimensions 431
Step 4. Data Considerations 431
How to Evaluate and Improve a Forecasting Process 432
Step 5. Model Selection 432
Step 6. Model Evaluation 433
Step 7. Forecast Preparation 433
Step 8. Forecast Presentation 434
Step 9. Tracking Results 434
Choosing the Right Forecasting Techniques 435
Sales Force Composite (SFC) 435
Customer Surveys (CS) 437
Jury of Executive Opinion (JEO) 437
Delphi Method 437
Naive 438
Moving Averages 438
Simple Exponential Smoothing (SES) 438
Adaptive-Response-Rate Single Exponential Smoothing (ADRES) 438
Holt’s Exponential Smoothing (HES) 439
Winters’ Exponential Smoothing (WES) 439
Regression-Based Trend Models 439
Regression-Based Trend Models with Seasonality 439
Comments from the Field 440
Regression Models with Causality 440
Comments from the Field 441
Time-Series Decomposition (TSD) 441
ARIMA 442
Special Forecasting Considerations 442
Event Modeling 442
Combining Forecasts 443
New-Product Forecasting (NPF) 443
Artificial Intelligence and Forecasting 444
Comments from the Field 446
Summary 446
Using ProCast™ in ForecastX™ to Make Forecasts 448
Suggested Readings 450
Exercises 451

Index 452
