Microfoundations of Financial Economics

An Introduction to General Equilibrium Asset Pricing

Yvan Lengwiler

Princeton University Press Princeton and Oxford

Contents

Li	List of boxes		xi
Preface			xiii
1	Intr	oduction	1
	1.1	What finance theory is about	1
	1.2	Some history of thought	2
	1.3	The importance of the puzzles	7
	1.4	Outline of the book	9
2	Con	tingent claim economy	10
	2.1	The commodity space	10
	2.2	Preferences and ordinal utility	14
	2.3	Maximization	16
	2.4	General equilibrium	23
	2.5	The representative agent	32
	Not	es on the literature	35
	Prol	blems	35
3	Asset economy		37
	3.1	Financial assets	37
	3.2	Pricing by redundancy	41
	3.3	Radner economies	46
	3.4	Complete markets (and uniqueness of Arrow prices)	53
	3.5	Complications arising from market incompleteness	60
	Notes on the literature		65
	Pro	blems	65
4	Risk	xy decisions	68

viii Contents

	4.1 Bernoulli's St. Petersburg paradox	69
	4.2 Using more structure: probabilities and lotteries	71
	4.3 The von Neumann-Morgenstern representation	75
	4.4 Measures of risk preference	81
	4.5 Assumptions and evidence	86
	4.6 Often used specifications	91
	Notes on the literature	99
	Problems	99
5	Static finance economy	102
	5.1 An economy with von Neumann-Morgenstern agen	its 102
	5.2 Efficient risk-sharing	107
	5.3 A representative NM agent	112
	5.4 Who holds what kind of portfolio?	121
	5.5 The stochastic discount factor	126
	5.6 The equilibrium price of time	130
	5.7 The equilibrium price of risk	132
	5.8 Some important special cases	134
	Notes on the literature	138
	Problems	138
6	y y	141
6	Dynamic finance economy 6.1 A static dynamic model	141
6	6.1 A static dynamic model6.2 Dynamic trading	141 149
6	6.1 A static dynamic model	141
6	6.1 A static dynamic model6.2 Dynamic trading	141 149
6	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature 	141 149 162 168 170
6	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection 	141 149 162 168
6 7	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles	141 149 162 168 170
	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 	141 149 162 168 170 170
	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 	141 149 162 168 170 170 172 172
	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 	141 149 162 168 170 170 172 172 176
	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 7.4 Excessive volatility 	141 149 162 168 170 170 172 176 184
	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 7.4 Excessive volatility 7.5 Anomalies 	141 149 162 168 170 170 172 172 176
	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 7.4 Excessive volatility 	141 149 162 168 170 170 172 176 184
	6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 7.4 Excessive volatility 7.5 Anomalies Notes on the literature Adapting the theory	141 149 162 168 170 170 172 172 176 184 192 197
7	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 7.4 Excessive volatility 7.5 Anomalies Notes on the literature Adapting the theory 8.1 Assumptions of the mainstream model 	141 149 162 168 170 170 172 172 176 184 192 197 198
7	6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 7.4 Excessive volatility 7.5 Anomalies Notes on the literature Adapting the theory 8.1 Assumptions of the mainstream model 8.2 Non-standard preferences	141 149 162 168 170 170 170 172 172 176 184 192 197 198
7	 6.1 A static dynamic model 6.2 Dynamic trading 6.3 Models of the real interest rate 6.4 Portfolio selection Notes on the literature Problems Empirics and the puzzles 7.1 Collecting the right data 7.2 The equity premium puzzle 7.3 Alternative interpretations of the data 7.4 Excessive volatility 7.5 Anomalies Notes on the literature Adapting the theory 8.1 Assumptions of the mainstream model 	141 149 162 168 170 170 172 172 176 184 192 197 198
