

Technological Learning in the Energy Sector

Lessons for Policy, Industry and Science

Edited by

Martin Junginger

*Assistant Professor, Science, Technology and Society,
Copernicus Institute, Utrecht University, Utrecht,
The Netherlands*

Wilfried van Sark

*Assistant Professor, Science, Technology and Society,
Copernicus Institute, Utrecht University, Utrecht,
The Netherlands*

Andre Faaij

*Professor, Science, Technology and Society, Copernicus
Institute, Utrecht University, Utrecht, The Netherlands*

Edward Elgar

Cheltenham, UK • Northampton, MA, USA

<i>Acknowledgements</i>		xvi

1	Introduction	1
	<i>Martin Junginger, Wilfried van Sark and Andre Faaij</i>	

PART I THE USE OF EXPERIENCE CURVES FOR ENERGY TECHNOLOGIES: AN INTRODUCTION

2	The experience curve approach: history, methodological aspects and applications	•	9
	<i>Martin Junginger, Wilfried van Sark, Soudes Kahouli-Brahmi and Gerrit Jan Schaeffer</i>		
3	General aspects and caveats of experience curve analysis		18
	<i>Wilfried van Sark, Gregory Nemet, Soudes Kahouli-Brahmi, Lena Neij and Clas-Otto Wene</i>		
4	Putting experience curves in context: links to and between technology development, market diffusion, learning mechanisms and systems innovation theory		36
	<i>Martin Junginger, Roald Suurs, Geert Verbong and Gerrit Jan Schaeffer</i>		
5	The use of experience curves in energy models		48
	<i>Sander Lensink, Soudes Kahouli-Brahmi and Wilfried van Sark</i>		

PART II CASE STUDIES

6	Onshore wind energy	65
	<i>Martin Junginger, Paul Lako, Lena Neij, Wouter Engels and David Milborrow</i>	
7	Offshore wind energy	79
	<i>Paul Lako, Martin Junginger, Lena Neij, Wouter Engels and Sander Lensink</i>	

8	Photovoltaic solar energy <i>Wilfried van Sark, Gregory Nemet, Gerrit Jan Schaeffer and Erik Alsema</i>	93
9	Concentrating solar thermal electricity technology <i>Wilfried van Sark and Paul Lako</i>	115
10	Bioenergy <i>Andre Faaij and Martin Junginger</i>	119
11	Combined Cycle Gas Turbine (CCGT) plants <i>Ric Hoefnagels, Anna Bergek and Paul Lako</i>	139
12	Pulverized coal-fired power plants <i>Paul Lako, Sonia Yeh and Machteld van den Broek</i>	149
13	Carbon dioxide capture and storage (CCS) technologies <i>Machteld van den Broek, Sonia Yeh, Ric Hoefnagels, Martin Junginger, Edward Rubin and Andre Faaij</i>	160
14	Nuclear power <i>Paul Lako, Alik van Heek and Geoffrey Rothwell</i>	176
15	Household appliances <i>Martin Weiss, Larry Dale and Michael McNeil</i>	193
16	Lighting technologies <i>Martin Weiss, Philippine de T'Serclaes and Willy Taelman</i>	206
17	Space heating and cooling <i>Martin Weiss, Reinhard Madlener and Martin Jakob</i>	219
18	The chemical sector <i>Martin Patel, Martin Weiss, Tristan Simon and Andrea Ramirez Ramirez</i>	233

PART III SYNTHESIS AND RECOMMENDATIONS

19	Overview and comparison of experience curves for energy technologies <i>Martin Junginger, Martin Weiss, Wilfried van Sark and Andre Faaij</i>	251
20	Methodological lessons and recommendations for scientists and modellers <i>Wilfried van Sark, Martin Junginger and Andre Faaij</i>	262
21	Lessons on technological learning for policy makers and industry <i>Andre Faaij, Martin Junginger and Wilfried van Sark</i>	272
