<i>Introduction</i> Paula E. Stephan and David B. Audretsch	xi

PART I AN OVERVIEW

1. Paula E. Stephan (1996), 'The Economics of Science', <i>Journal of Economic Literature</i> , XXXIV (3), September, 1199-1235	3
2. Richard R. Nelson (1959), 'The Simple Economics of Basic Scientific Research', <i>Journal of Political Economy</i> , LXVII (3), 297-306	40
3. Nathan Rosenberg and L.E. Birdzell, Jr. (1990), 'Science, Technology and the Western Miracle', <i>Scientific American</i> , 263 (5), November, 42-54 (reset)	50

PART II THE PUBLIC NATURE OF SCIENTIFIC KNOWLEDGE

4. Kenneth J. Arrow (1962), 'Economic Welfare and the Allocation of Resources for Invention', in <i>The Rate and Direction of Inventive Activity: Economic and Social Factors</i> , Princeton: Princeton University Press, 609-25	61
5. Michel Callon (1994), 'Is Science a Public Good? Fifth Mullins Lecture', <i>Science, Technology, and Human Values</i> , 19 (4), Autumn, 395-424	78
6. Partha Dasgupta and Paul A. David (1994), 'Toward a New Economics of Science', <i>Research Policy</i> , 23 (5), September, 487-521	108
7. Harry G. Johnson (1972), 'Some Economic Aspects of Science', <i>Minerva</i> , X (1), January, 10-18	143

PART III THE PRODUCTION OF SCIENTIFIC KNOWLEDGE

8. Mary Frank Fox (1983), 'Publication Productivity Among Scientists: A Critical Review', <i>Social Studies of Science</i> , 13 (2), May, 285-305	155
9. Diana Hicks (1995), 'Published Papers, Tacit Competencies and Corporate Management of the Public/Private Character of Knowledge', <i>Industrial and Corporate Change</i> , 4 (2), 401-24	176
10. Bernard Barber and Renee C. Fox (1962), 'The Case of the Floppy-Eared Rabbits: An Instance of Serendipity Gained and Serendipity Lost', in Bernard Barber and Walter Hirsch (eds), <i>The Sociology of Science</i> , New York: Free Press of Glencoe, 525-38	200

PART IV THE REWARD STRUCTURE OF SCIENCE

11. Robert K. Merton (1957), 'Priorities in Scientific Discovery: A Chapter in the Sociology of Science', *American Sociological Review*, 22 (6), December, 635-59 217
12. Harriet Zuckerman (1992), 'The Proliferation of Prizes: Nobel ,*, Complements and Nobel Surrogates in the Reward System of Science', *Theoretical Medicine*, 13, 217-31 (reset) 242
13. Arthur M. Diamond, Jr. (1986), 'What is a Citation Worth?', *Journal of Human Resources*, XXI(1), Winter, 200-215 255
14. Paula E. Stephan and Sharon G. Levin (1992), 'How Science is Done; Why Science is Done', in *Striking the Mother Lode in Science: The Importance of Age, Place and Time*, Chapter 2, New York: Oxford University Press, 11-24 and references 271
15. Paula E. Stephan and Stephen S. Everhart (1998), 'The Changing Rewards to Science: The Case of Biotechnology', *Small Business Economics*, 10,141-51 287

PART V CHARACTERISTICS OF DISCOVERY

16. Partha Dasgupta and Eric Maskin (1987), 'The Simple Economics of Research Portfolios', *Economic Journal*, 97 (387), September, 581-95 301
17. Alfred J. Lotka (1926), 'Statistics: The Frequency Distribution of Scientific Productivity', *Journal of the Washington Academy of Sciences*, 16 (12), June, 317-23 (reset) 316
18. Robert K. Merton (1968), 'The Matthew Effect in Science', *Science*, 159, January-March, 56-63 323

PART VI PRIORITY RIGHTS AND PROPERTY RIGHTS

19. Partha Dasgupta and Paul A. David (1987), 'Information Disclosure and the Economics of Science and Technology', in George R. Feiwel (ed.), *Arrow and the Ascent of Modern Economic Theory*, Chapter 16, London: Macmillan Press, 519-42 333
20. Rebecca S. Eisenberg (1987), 'Proprietary Rights and the Norms of Science in Biotechnology Research', *Yale Law Journal*, 97 (2), December, 177-231 357

PART VII CAREERS IN SCIENCE

21. Paul D. Allison and John A. Stewart (1974); 'Productivity Differences Among Scientists: Evidence for Accumulative Advantage', *American Sociological Review*, 39 (4), August, 596-606 415
22. Sharon G. Levin and Paula E. Stephan (1991), 'Research Productivity Over the Life Cycle: Evidence for Academic Scientists', *American Economic Review*, 81 (1), March, 114—32 426

23.	Arthur M. Diamond, Jr. (1986), 'The Life-Cycle Research Productivity of Mathematicians and Scientists', <i>Journal of Gerontology</i> , 41 (4), 520-25	445
24.	David Li Hull, Peter D. Tessner and Arthur M. Diamond (1978), 'Planck's Principle: Do Younger Scientists Accept New Scientific Ideas With Greater Alacrity Than Older Scientists?', <i>Science</i> , 202 (4369), 717-23 (reset)	451
	<i>Name Index</i>	467

PART I ^ LABOR MARKETS FOR SCIENTISTS

1. LarryR. Leslie and Ronald L. Oaxaca (1993), 'Scientist and Engineer Supply and Demand', in John C. Smart (ed.), *Higher Education: Handbook of Theory and Research*, **IX**, New York: Agathon Press, 154-f211 3
2. Ronald G. Ehrenberg (1992), 'The Flow of New Doctorates', *Journal of Economic Literature*, **XXX** (2), June, 830-75 61
3. R.B. Freeman (1975), 'Supply and Salary Adjustments to the Changing Science Manpower Market: Physics, 1948-1973', *American Economic Review*, 65 (1), March, 27-39 107

PART II SCIENTISTS IN INDUSTRY

4. Wesley M. Cohen and Daniel A. Levinthal (1989), 'Innovation and Learning: The Two Faces of R&D', *Economic Journal*, 99 (397), September, 569-96 123
5. Edwin Mansfield (1995), 'Academic Research Underlying Industrial Innovations: Sources, Characteristics, and Financing', *Review of Economics and Statistics*, **LXXVII** (1), 55-65 151
6. Richard R. Nelson (1962), 'The Link Between Science and Invention: The Case of the Transistor', in *The Rate and Direction of Inventive Activity: Economic and Social Factors*, Princeton: Princeton University Press, 549-83 162
7. Nathan Rosenberg (1990), 'Why Do Firms Do Basic Research (With Their Own Money)?', *Research Policy*, 19 (2), April, 165-74 197
8. Frank R. Lichtenberg (1988), 'The Private R&D Investment Response to Federal Design and Technical Competitions', *American Economic Review*, 78 (3), 550-59 207

PART III THE COMMERCIALIZATION OF SCIENCE

9. David B. Audretsch and Paula E. Stephan (1996), 'Company-Scientist Locational Links: The Case of Biotechnology', *American Economic Review*, 86 (3), June, 641-52 219
10. Lynne G. Zucker, Michael R. Darby and Marilyn B. Brewer (1998), 'Intellectual Human Capital and the Birth of U.S. Biotechnology Enterprises', *American Economic Review*, 88 (1), March, 290-306 231

11.	Edwin Mansfield (1991), 'Academic Research and Industrial Innovation', <i>Research Policy</i> , 20 (1), February, 1-12	248
12.	Keith Pavitt (1991), 'What Makes Basic Research Economically Useful?', <i>Research Policy</i> , 20 (2), April, 109-19	260
PART IV THE RELATIONSHIP BETWEEN SCIENCE AND TECHNOLOGY		
13.	Nathan Rosenberg (1974), 'Science, Invention and Economic Growth', <i>Economic Journal</i> , 84 (333), March, 90-108	273
14.	F.M. Scherer (1982), 'Demand-Pull and Technological Invention: • Schmookler Revisited', <i>Journal of Industrial Economics</i> , XXX (3), March, 225-37	292
15.	Michael Gibbons and Ron Johnston (1974), 'The Roles of Science in Technological Innovation', <i>Research Policy</i> , 3 (3), November, 221-42	305
PART V SCIENCE AND GROWTH		
16.	Paul M. Romer (1994), 'The Origins of Endogenous Growth', <i>Journal of Economic Perspectives</i> , 8 (1), Winter, 3-22	329
PART VI KNOWLEDGE SPILLOVERS		
17.	Zvi Griliches (1992), 'The Search for R&D Spillovers', <i>Scandinavian Journal of Economics</i> , 94, Supplement, 29-47	351
18.	Adam B. Jaffe (1989), 'Real Effects of Academic Research', <i>American Economic Review</i> , 79 (5), December, 957-70	370
19.	David B. Audretsch and Maryann P. Feldman (1996), 'R&D Spillovers and the Geography of Innovation and Production', <i>American Economic Review</i> , 86 (3), June, 630—40	384
20.	Zoltan J. Acs, David B. Audretsch and Maryann P. Feldman (1994), 'R&D Spillovers and Recipient Firm Size', <i>Review of Economics and Statistics</i> , LXXVI (2), 336-40	395
21.	Lynne G. Zucker, Michael R. Darby and Jeff Armstrong (1998), 'Geographically Localized Knowledge: Spillovers or Markets?', <i>Economic Inquiry</i> , XXXVI, January, 65-86	400
PART VII PUBLIC POLICY
