
TECHNOLOGY, GLOBALIZATION, AND SUSTAINABLE DEVELOPMENT

Transforming the Industrial State

NICHOLAS A. ASHFORD
RALPH P. HALL

Yale UNIVERSITY PRESS

New Haven & London

Detailed Table of Contents

Overview 1

- 0.1 Introduction 1
- 0.2 The Multidimensional Character of Sustainability 2
- 0.3 The Unsustainable Industrial State 3
- 0.4 Globalization 4
- 0.5 Drivers of Economic Growth and Development 5
 - 0.5.1 Strategies to Enhance Competitiveness 5
 - 0.5.2 The Consequences of Different Industrial Strategy Options for Workers 6
- 0.6 Conceptualizations of Sustainable Development 8
 - 0.6.1 The Interrelatedness of the Economy, of the Environment, Health, and Safety, and of Employment and the Need to Address Them Together 8
 - 0.6.2 Sustaining and Disrupting Innovation Distinguished 8
 - 0.6.3 A Capsule Definition of Sustainable Development 11
- 0.7 Governance Options for Achieving a Transformation to a More Sustainable State 11
- 0.8 The Role of Government 12
- 0.9 The Way Forward 14
- 0.10 References 15

Part I: The Multidimensional Concept of Sustainability 17

1 Concern for a Global Future 19

- 1.1 Human Needs 20
 - 1.1.1 The Measurement of (Human) Development 22
 - 1.1.2 Consumption and Well-Being 33
 - 1.1.3 Employment 35
 - 1.1.3.1 Income and Wage Inequality 36
 - 1.1.3.1.1 The Impact of Technological Change on Wages and Employment 42

1.1.3.1.2 Skill-Based Technological Change and the Relative Importance of Other Factors on Inequality	47
1.1.3.1.3 Addressing Wage and Income Inequality in the United States	51
1.1.3.2 The Importance of Employment beyond the Creation of Purchasing Power	52
1.1.4 Human Needs and Sustainability	54
1.2 Social Justice, Inequality, and the Social Contract between the Governed and the Government	56
1.2.1 The Social Contract and the Theory of Justice	56
1.2.2 Operationalizing the Social Contract	61
1.2.3 Equality of What?	69
1.3 Living beyond Our Ecological Means: The Technology Debate	73
1.3.1 Growth, Technology, and Substitution versus a Steady-State Economy	77
1.3.2 The Environment and Affluence: The Environmental Kuznets Curve	80
1.3.3 Technological Optimism	86
1.4 A Conceptual Framework for Sustainable Development	88
1.5 The European Union's Strategy for Sustainable Development: The Lisbon Strategy and Europe 2020	97
1.6 The Reformulation of Sustainable Development as a Problem of Global Climate Change	100
1.7 Broadening Our Awareness of Tipping Points	101
1.8 The 2008 Financial Crisis and Opportunities for Reconceptualization of the Growth Paradigm	102
1.9 The Necessity of Solving Problems on a Comprehensive Basis	105
1.10 Notes	105
1.11 Additional Readings	106
1.12 References	106
2 The Emergence of Sustainable Development	122
2.1 Notes	138
2.2 Additional Readings	139
2.3 References	139
Part II: Economic Development, Globalization, and Sustainability	143
3 Economic Development and Prosperity: Current Theory and Debate	145
3.1 The Meaning of Economic Development	145
3.1.1 Growth and Development Distinguished	145
3.1.2 Factor Endowments and the Classification of Capital	146
3.2 Theories and Perspectives on Economic Growth	147
3.2.1 Rostow's Stages-of-Growth Model	147
3.2.2 Linear Stages-of-Growth Models: The Harrod-Domar Model	148
3.2.3 Structural-Change Models	148
3.2.4 The International-Dependence Perspective	149
3.2.5 Neoclassical Growth Theory: The Solow Model	150

3.2.6 New Growth Theory: Romer's Model	151
3.2.7 The Ayres-Warr Analysis	153
3.2.8 Implicit Assumptions about Technological Innovation in Neoclassical Environmental and Ecological Economics	154
3.2.9 Peak Oil and Economic Growth	155
3.3 Technological Development and Growth Theory	156
3.3.1 Technological Change	156
3.3.1.1 The Long Waves	156
3.3.1.2 The Information or Postindustrial Revolution	159
3.3.2 Joseph Schumpeter's "Creative Destruction"	163
3.3.3 Market Structure and Innovation	164
3.4 Critiques of, and Alternatives to, the Northern Growth Model	166
3.4.1 Growth in Developing Economies and the Washington Consensus	166
3.4.2 Sustainability in Practice: The Cases of Kerala and Costa Rica	168
3.5 What Lies Ahead for Economic Growth and Development in Industrialized and Developing Economies?	170
3.5.1 The End of Sustainable Growth?	170
3.5.2 The Impact of Economic Growth on Employment in the Developed World	171
3.5.3 The Next Industrial Revolution?	172
3.5.4 Broadening Capital Ownership and Its Effects on Consumption- Led Growth, Sustainable Livelihoods, and the Environment	173
3.6 The New Economics	173
3.7 Notes	179
3.8 Additional Readings	179
3.9 References	179

4 Globalization: Technology, Trade Regimes, Capital Flows, and the International Economy 183

4.1 Introduction	183
4.2 Globalization	184
4.2.1 Industrial Globalization	187
4.3 Trade Regimes	189
4.3.1 The World Trade Organization	189
4.3.2 The North American Free Trade Agreement	189
4.4 Trade and Economic Development	190
4.4.1 Free Trade: Winners and Losers	190
4.4.2 The Effects of Trade in the Developed World	194
4.4.3 The Effects of Trade in the Developing World	195
4.4.4 Current Structural Changes Stemming from Manufacturing and Services Dominated by China and India, and from the Consolidation of Retailing Power in the Developed Countries	196
4.5 The Role of Multinational Enterprises in the International Economy	198
4.5.1 MNEs and Neoclassical Economics	198
4.5.2 The Centrality of Foreign Direct Investment for Development	200
4.5.3 MNEs: Blessing or Peril?	201

4.6 Evolution of Financial Institutions	203
4.6.1 Bretton Woods and Its Aftermath	203
4.6.2 The Benefits and Perils of Increased Capital Mobility	204
4.6.3 Toward a New Bretton Woods?	206
4.6.4 Steps toward a New Financial Architecture	207
4.7 Notes	209
4.8 Additional Readings	209
4.9 References	210

5 Globalization and Sustainability 214

5.1 Effects of Globalization on Economy/Environment Interactions: Sector II	215
5.1.1 Development (Industrialization) and the Environment	217
5.1.1.1 From Early Industrialization to <i>Silent Spring</i>	217
5.1.1.2 Growthmania and Its Discontents	218
5.1.1.3 The Relationship between Economic Development/ Growth and the Environment: An Analytic Approach	221
5.1.1.4 The Conflict between Economic Growth and the Environment	224
5.1.1.5 The Relationship between Environmental Regulation and Economic Growth	224
5.1.2 Trade (Globalization) and the Environment	225
5.1.2.1 The Rationale for Free Trade	226
5.1.2.2 Criticism of the Rationale	226
5.1.2.3 The Positive Impacts of Free Trade on Environmental Quality	227
5.1.2.4 The Adverse Effects of Free Trade on the Environment	228
5.1.2.5 The Relationship between Trade and the Environment: An Analytic Approach	230
5.1.2.6 The Effects of Stringent Environmental Regulation on Trade and Competition	232
5.1.3 Global Investment and the Environment	233
5.2 Effects of Globalization on Economy/Work Interactions: Sector IV	236
5.2.1 The International Division of Labor (Resulting from Multinationalization)	237
5.2.2 The Creation of Purchasing Power	242
5.2.3 Technology-Enabled Capital Mobility	243
5.2.4 Interconnections between the International Division of Labor, Purchasing Power, and Capital Mobility	246
5.3 Effects of Globalization on Environment/Work Interactions: Sector VI	247
5.3.1 Increasing the Environmental Footprint	247
5.3.2 The Effects of a Greener Economy on Employment	248
5.3.3 Immigration and Population	252
5.4 Globalization and Governance	253
5.4.1 The Role of National and International Governance in Promoting Sustainable Development	254
5.5 Notes	260

5.6 Additional Readings 260

5.7 References 260

Part III: Industrial Policy and the Role of the Firm in Pursuing Sustainable Development 269

6 The Importance of Technological Innovation 271

6.1 Introduction 271

6.2 Types of Innovation and the Nature of Technological Change 271

6.2.1 Categorizing Technological Change 271

6.2.2 Evolutionary versus Revolutionary Change 277

6.3 The Classical Linear Model of Technological Innovation 278

6.4 National Innovation Systems 279

6.5 References 285

7 Organizational Innovation and Learning: The Role of the Industrial Firm in Achieving Sustainable Development 287

7.1 Introduction 287

7.1.1 Globalization 288

7.1.2 Pressures for Corporate Environmental Responsibility 289

7.1.3 Responses of Firms to Social Demands 292

7.2 What Kinds of Environmental, Skill, and Employment Changes Are Needed in the Economy? 293

7.2.1 Environmental Changes 293

7.2.2 Changes in Skills and Employment 294

7.3 Organizational Innovation and Learning: Theory and Background 295

7.3.1 Organizational Theory and the Limitations of the Neoclassical Model 295

7.3.2 Organizational Learning 296

7.3.2.1 Networks 298

7.3.2.2 Industrial-Networks Theory 299

7.3.2.3 Sociotechnical Networks 300

7.3.2.4 Social Networks: Learning Collaborations with Stakeholders 302

7.3.2.5 Summary 305

7.4 Evolutionary or Coevolutionary Transformations and Customer Satisfaction and Values 305

7.4.1 The Means of Delivering Satisfaction to Customers 306

7.4.2 The Nature of Customer Satisfaction 306

7.4.2.1 Innovations That Provide Customer Satisfaction in Essentially the Same Way 307

7.4.2.2 Innovations That Are the Same in Basic Concept but Differ in Quality of Satisfaction 307

7.4.2.3 Innovations That Deliver Customer Satisfaction in a Significantly/Wholly Different Way 307

7.4.3 Changes in Customer Behavior and Values 308

7.5 The Relationship between Organizational Learning and Change and Technological Innovation 308

7.5.1 Willingness 308

7.5.2 Opportunity/Motivation	310
7.5.3 Capacity/Capability	310
7.5.4 Environmentally Oriented Evolutionary Technological Changes within Firms	311
7.5.4.1 I—Changes in Internal Environmental Management Practices	311
7.5.4.2 II—Adopting and Adapting Better, Existing Off-the-Shelf Technologies (Diffusion/Incremental Innovation)	312
7.5.4.3 III—Development of New Technologies and New Applications of Existing Technologies by Existing Firms (Mostly Involving Sustaining Innovation)	313
7.5.5 Is Evolutionary Change Enough?	315
7.5.6 Environmentally Oriented Technological Changes outside Existing Firms	317
7.5.6.1 IV—Displacement of a Problematic Technology (Product or Process) by a New Entrant (Who Mostly Develops Disrupting Innovation)	317
7.5.6.2 V—System Change Necessitating a Reorientation or Reorganization of Industry	318
7.6 Innovation to Stimulate Employment	318
7.6.1 Wage Inequality and Unemployment	319
7.6.2 Working Conditions and Industrial Relations	319
7.6.3 Technological Change and Employment	321
7.6.4 Values for Sustainable Employment	324
7.6.5 Low-Wage, Cost-Cutting versus Innovation-Driven, Quality Firm Strategy	325
7.6.6 Reconceptualizing the Need for Innovation in Approaches to Employment Enhancement	327
7.7 Policy Implications	328
7.8 Notes	329
7.9 Additional Readings	329
7.10 References	329

8 Government Policies to Foster Innovation, Economic Growth, and Employment 336

8.1 Introduction	336
8.2 Types of Technological Change and Sustaining and Disrupting Innovation	337
8.3 Prerequisites for Technological Change	344
8.4 The Role of Government in Promoting Innovation in Developed Countries	344
8.4.1 Review of Government Policy Instruments in the Context of Alternative Theories of Technological Innovation	344
8.4.2 Strategic Niche Management and Transition Management	347
8.4.3 The Three-Layered Approach to System Innovation	351
8.4.4 The Integration of Government Interventions	352
8.5 The Importance of Diffusion in Achieving Sustainable Development	354
8.6 Stakeholder Involvement in the Context of Sustainable Development	355
8.7 Innovation, Industrial, and Technology Policy in the Context of a Globalized Economy	359

8.8 Modernization, Globalization, and Employment in the North	360
8.9 Industrial and Employment Policy in the South	361
8.10 Notes	362
8.11 Additional Readings	362
8.12 References	362

Part IV: National, Regional, and International Efforts to Advance Health, Safety, and the Environment 367

9 Government Intervention to Protect the Environment, Public/Worker Health and Safety, and Consumer Product Safety 369

9.1 Introduction	369
9.2 National Approaches: Regulation of Health, Safety, and the Environment in the United States	370
9.2.1 Introduction to the U.S. Regulatory System	370
9.2.2 Standard Setting and Obligations of the Employer and the Manufacturer or User of Toxic Substances in the United States	372
9.2.2.1 The Occupational Safety and Health Act of 1970	372
9.2.2.2 The Toxic Substances Control Act of 1976	374
9.2.3 The Control of Gradual Pollution in Air and Water and Pollution from Waste in the United States	374
9.2.3.1 The Clean Air Act	374
9.2.3.2 Water Legislation	377
9.2.3.2.1 The Clean Water Act	377
9.2.3.2.2 The Safe Drinking Water Act	379
9.2.3.3 The Regulation of Hazardous Waste	380
9.2.3.4 The Origins of the Precautionary Approach in U.S. Regulatory Law	381
9.2.4 The Chemical Safety Provisions of the U.S. Clean Air Act: Obligations Imposed by EPA and OSHA to Prevent the Sudden and Accidental Release of Chemicals	387
9.2.5 Pollution Prevention and Inherently Safer Production in the United States	388
9.2.6 The Right to Know and Information-Based Strategies to Encourage Alternative Technology in the United States	390
9.2.6.1 Trade-off Analysis	395
9.2.6.2 Trade-off Analysis in the Context of Sustainability	401
9.2.7 Product Safety	401
9.2.7.1 General Discussion	401
9.2.7.2 Prospects for Reform	408
9.2.8 Alternatives to Regulation	409
9.2.9 U.S. and European Law Compared	410
9.3 Static versus Dynamic Efficiency and the Implications for Promoting Technological Innovation Using Trade-off Analysis	411
9.4 National Government's Role in Achieving Efficiency: The Regulation-Induced-Innovation Hypothesis	412
9.5 Nation-Based Regulation in the Context of Industrial Globalization	415
9.6 Nation-Based Approaches in Developing Countries without a Strong Regulatory Tradition	416

9.7 Notes	416
9.8 Additional Readings	416
9.9 References	416

10 Regional and International Regimes to Protect Health, Safety, and the Environment 419

10.1 Introduction	420
10.1.1 The Increasing Importance of Health, Safety, and the Environment	420
10.1.2 Different Levels of Protection as Subsidies or Barriers to Trade	421
10.1.3 International Health, Safety, and Environmental Law Instruments and Mechanisms	421
10.2 The Nature of International Environmental Law	424
10.2.1 Treaties, Customs, and Principles as Elements of International Environmental Law	425
10.2.2 “Hard” versus “Soft” Law	426
10.2.3 The International Multilateral Environmental Agreement Process	426
10.3 Factors Influencing Compliance with Multilateral Environmental Accords	427
10.3.1 Negotiation of Environmental Accords	429
10.4 The Polluter-Pays Principle, the Precautionary Principle, and Other Evolving Principles of International Environmental Law	432
10.4.1 The Polluter-Pays Principle and the Coasean View	432
10.4.2 The Precautionary Principle	433
10.4.2.1 The U.S. Approach to the Precautionary Principle	434
10.4.2.2 European and International Legal Formulation of the Precautionary Principle	434
10.4.3 Intergenerational Equity	437
10.4.4 The Public’s Right to Access Information and to Participate in Environmental, Health, and Safety Matters	437
10.4.5 Extended Producer Responsibility	439
10.5 Harmonization of Health, Safety, and Environmental Standards	440
10.5.1 International and European Union Efforts to Harmonize Standards and Guidelines	440
10.5.2 Voluntary Industry Efforts to Harmonize Practices	444
10.5.3 The Implications of Having Different Standards and Practices: Increased Capital Movement to Pollution Havens versus the Porter Hypothesis	445
10.5.4 Reaching Consensus on Risk-Assessment Methodologies and Risk-Management Rationales	446
10.5.4.1 The OECD Role in Chemical Safety and Risk Assessment	448
10.6 International Trade of Hazardous Products	449
10.7 International Trade of Hazardous Equipment and Plant	451
10.8 Transfer of Technical Know-how	451
10.9 International Trade of Hazardous Waste	452

10.10 Transboundary Migration of Pollution	452
10.11 Polluting the International Commons	454
10.12 Liability for Environmental Damage	457
10.12.1 U.S. Environmental Liability	457
10.12.2 European Union Environmental Liability	459
10.13 Preserving Biodiversity and Endangered Species	461
10.14 Food Safety	462
10.15 Biotechnology	462
10.16 Pharmaceutical Safety	463
10.17 Environmental Law and Its Role in Stimulating Technological Change	463
10.17.1 Clean Production Mechanisms	464
10.18 Regional Approaches to Protection of Health, Safety, and the Environment: The European Union	468
10.18.1 Environmental Law in the European Union	468
10.18.1.1 Background to EU Environmental Law	469
10.18.1.2 Enforcement	473
10.18.2 Regulation of Air, Water, and Waste	473
10.18.2.1 Air	474
10.18.2.2 Water	474
10.18.2.3 Waste	474
10.18.3 Prevention of Chemical Accidents	475
10.18.4 The Integrated Pollution Prevention and Control Directive	475
10.18.5 The EU Integrated Product Policy, the Environmental Technologies Action Plan, and Life-Cycle Assessment	476
10.18.5.1 The EU Integrated Product Policy and the Environmental Technologies Action Plan	476
10.18.5.2 Life-Cycle Assessment	479
10.18.6 Access to Information and Participatory Rights	480
10.18.7 The Eco-Management and Audit Scheme and ISO 14001	480
10.18.8 Chemicals Policy and REACH	482
10.18.8.1 The REACH Initiative	482
10.18.8.2 The U.S. Toxic Substances Control Act and Lessons for REACH	484
10.18.9 Food Safety in the EU	486
10.18.10 Biotechnology in the EU	487
10.18.11 Financial Assistance and LIFE	488
10.18.12 The European Chemical Substances Information System	489
10.18.13 Commentary on EU Environmental Law	489
10.19 Worker Health and Safety	489
10.20 The Importance of International Institutions	494
10.20.1 The Organisation for Economic Co-operation and Development	495
10.20.2 The International Labour Organization	496
10.20.3 The United Nations	496
10.20.3.1 The United Nations Environment Programme	497
10.20.3.2 The United Nations Industrial Development Organization	498
10.20.3.3 The United Nations Development Programme	499
10.20.4 The World Health Organization	500

10.20.5 The World Trade Organization and the General Agreement on Tariffs and Trade	500
10.20.6 The North American Free Trade Agreement	501
10.20.7 The Food and Agriculture Organization	503
10.20.8 Nongovernmental Organizations	503
10.20.9 The European Foundation for the Improvement of Living and Working Conditions	503
10.21 Global Governance	504
10.22 Conclusions	505
10.23 Notes	505
10.24 Additional Readings	508
10.25 References	508
Appendix 10-A: Multilateral Environmental Agreements in Reverse Chronological Order	514
Appendix 10-B: Multilateral Environmental Agreements by Area of the Environment	518

Part V: International Trade and Finance 521

11 Trade Regimes and Sustainability 523

11.1 Trade Agreements in General	523
11.1.1 Introduction	523
11.1.2 Trade as a Driver of Growth	524
11.1.3 Overview of the Agreements Administered by the World Trade Organization	527
11.1.4 Dispute Resolution under the WTO	529
11.1.5 The Prohibition against Subsidies	532
11.2 Trade and the Environment (Trade Regimes as Constraints on National Health, Safety, and Environmental Policies)	533
11.2.1 The Shrimp-Turtle Dispute and Article XX(g) of the GATT (Conservation of Natural Resources)	534
11.2.2 Asbestos and Section XX(b) of the GATT (Protection of Human and Animal Life and Health)	534
11.2.3 Trade and Standards under the WTO Agreements	540
11.2.4 The Decision of the Appellate Body in the Asbestos Case and Future Uncertainty of the Availability of Articles XX(b) and (g) Exceptions	542
11.2.5 Food Safety: Hormones in Beef and the SPS Agreement	543
11.2.6 Biotechnology: Genetically Modified Organisms	544
11.2.7 The General Agreement on Trade in Services	553
11.2.8 The Agreement on Trade-Related Aspects of Intellectual Property Rights	553
11.3 Trade and the Environment (Trade Regimes as Tools to Promote Advances in National and International Environmental Policies)	554
11.3.1 Trade as a Positive Force to Improve Environmental Conditions	554
11.3.2 NAFTA and Other U.S. Bilateral Trade Regimes	556
11.4 Trade, Employment, and Labor Standards	557
11.5 Notes	560

11.6 References	561
Appendix 11-A: Selected WTO Agreements	564

12 Financing Development 569

12.1 Introduction	569
-------------------	-----

Part A: Financing of Economic Development 573

12.2 Official Development Assistance and Private Capital	573
12.3 Analyzing Official Development Assistance	573
12.3.1 A Historical Overview of Development Aid	573
12.3.1.1 The World Bank Group	574
12.3.1.2 The International Monetary Fund	576
12.3.2 Analysis of the Crisis in Official Development Assistance	577
12.3.2.1 The Volatility of Development Aid	578
12.3.2.2 Some Promising Signs	579
12.3.3 A Critical Assessment of Development Aid	583
12.3.3.1 The Problem with Government Involvement	583
12.3.3.2 The Problem with Aid Fungibility	585
12.3.3.3 The Problem with Conditionality	587
12.3.3.4 Problems with Effective Coordination	591
12.3.3.5 The Problems with Capacity Building	592
12.3.4 Bilateral Financial Transfers: Ranking Developed Countries on Their Foreign Policies	593
12.3.5 Export Credit Agencies	596
12.3.5.1 The Functioning of ECAs	597
12.3.5.2 Background on the Evolution of the OECD Common Approaches	598
12.3.6 Private Multinational Banks and the Equator Principles	600
12.3.7 Sovereign Wealth Funds	600
12.4 Private Capital Flows	600
12.4.1 The Rise in Private Capital Flows	601
12.4.2 Drawbacks of Financial Globalization	602
12.4.2.1 Foreign Direct Investment	602
12.4.2.2 Bank Lending	603
12.4.2.3 Portfolio Flows	604
12.4.2.4 Will the Inflows Last?	605
12.4.2.5 The Cost of Volatility	606
12.4.2.6 A Bias of Flows against the Poor	608
12.4.2.7 Potential Hazards for Sustainable Development	612
12.4.3 Maximizing the Benefits of Financial Integration	613
12.4.3.1 Strategies for the Developing World	613
12.4.3.2 What Can the Industrialized World Do?	615

Part B: Financing for Environmental Protection 616

12.5 The Importance of Environmental Financing	616
12.6 The Emergence of Financing Structures for the Environment	616
12.6.1 A Historical Overview of Environmental Aid: The Road to Rio	616
12.6.2 Criticism of Financing Structures for Environmental Aid: The Flaws of Rio	617
12.6.2.1 Conflicting Interests between North and South	617

12.6.2.2	The Dispute over Additionality	617
12.6.2.3	Neglecting the Tension between the Economy and the Environment	619
12.6.2.4	Agenda 21: Lacking a Mandate	620
12.7	Issues of Implementation in Financing Sustainable Development	620
12.7.1	Dilemmas and Solutions in Environmental Financing	620
12.7.2	Freeing Up Financial Resources for Sustainable Development Activities	622
12.7.2.1	Donor Funding	623
12.7.2.2	Governments and Other In-Country Sources of Finance	624
12.7.2.3	International Transfer Mechanisms	625
12.7.2.3.1	The Clean Development Mechanism	625
12.7.2.3.2	Debt Swaps	625
12.7.2.4	National Environmental Funds	626
12.7.2.5	Trust Funds	627
12.7.3	Making Better Use of Market Mechanisms to Promote Sustainable Development	627
12.7.3.1	Introducing New Financial Mechanisms That Internalize Environmental or Social Externalities	628
12.7.3.2	Adapting Existing Market Mechanisms to Promote Sustainable Development	629
12.7.3.3	Removing Existing Financial Mechanisms That Hamper Sustainable Development	629
Part C: Financing Innovations (New Proposals) and Commentary		630
12.8	The SDR Proposal	631
12.9	An International Investment Agreement	632
12.10	The Global Environment Facility	634
12.10.1	The Establishment of the GEF	635
12.10.2	The GEF after Rio	635
12.10.3	Recent Developments and Future Prospects	637
12.11	Binary Economics	638
12.11.1	The Theoretical Fundamentals of Binary Economics	639
12.11.1.1	Implications of Underutilized Productive Capacity	642
12.11.2	Implementing Binary Economics	643
12.11.3	Some Implications of Binary Economics	646
12.11.3.1	A New Explanation of the Persistence of Pervasive Unutilized Productive Capacity and Suboptimal Growth	646
12.11.3.2	A Means of Providing Greater Earning Capacity to the Economically Disadvantaged (Poor and Working People) without Redistribution	647
12.11.3.3	A Change in the Dynamics of Globalization and Free Trade and the Arguments That Support the Various Positions on These Subjects	647
12.11.3.4	A Novel but Perhaps Indeterminate Impact on Environmental Issues and Sustainable Development	648
12.11.4	Commentary on the Prospects for Binary Economics	651
