

Benjamin Lasshof

Operating Costs of Real Estate

Models and Cost Indicators for a Holistic Cost Planning

DE GRUYTER
OLDENBOURG

Table of Contents

List of Abbreviations — IX

List of Figures — XI

List of Tables — XIII

Abstract — XVII

Zusammenfassung — XIX

1	Introduction — 1
1.1	Background and problem statement — 1
1.2	Scope and objective — 2
1.3	State of the art — 3
1.4	Manuscript structure — 8
2	Methodology — 11
2.1	Quantitative approach — 11
2.2	Definition of key variables — 14
2.2.1	Response variables — 14
2.2.2	Predictor variables — 18
2.3	Statistical methods — 23
2.3.1	Pre-analysis of data sample — 23
2.3.2	Regression analysis — 25
2.3.3	Artificial neural network analysis — 33
2.3.4	Classification tree analysis — 37
2.3.5	Cost indicators — 41
2.3.6	Performance measures — 43
3	Data sample — 47
3.1	Overview — 47
3.2	Presentation of the sample — 48
3.2.1	Response variables — 48
3.2.2	Predictor variables — 51
3.3	Test sample — 53
3.4	Representativeness — 54

4	Analysis results — 57
4.1	Operating costs (CG 300) — 57
4.1.1	Theoretical basis and variables — 57
4.1.2	Model design and specifications — 61
4.1.3	Categorised cost indicators — 66
4.1.4	Performance validation — 67
4.1.5	Summary — 69
4.2	Utilities (CG 310) — 69
4.2.1	Theoretical basis and variables — 69
4.2.2	Model design and specifications — 72
4.2.3	Categorised cost indicators — 77
4.2.4	Performance validation — 78
4.2.5	Summary — 80
4.3	Water (CG 311) — 81
4.3.1	Theoretical basis and variables — 81
4.3.2	Model design and specifications — 82
4.3.3	Categorised cost indicators — 88
4.3.4	Performance validation — 89
4.3.5	Summary — 90
4.4	Heating (CG 312-316) — 91
4.4.1	Theoretical basis and variables — 91
4.4.2	Model design and specifications — 94
4.4.3	Categorised cost indicators — 99
4.4.4	Performance validation — 100
4.4.5	Summary — 102
4.5	Electricity (CG 316) — 102
4.5.1	Theoretical basis and variables — 102
4.5.2	Model design and specifications — 105
4.5.3	Categorised cost indicators — 109
4.5.4	Performance validation — 110
4.5.5	Summary — 112
4.6	Disposal (CG 320) — 112
4.6.1	Theoretical basis and variables — 112
4.6.2	Model design and specifications — 114
4.6.3	Categorised cost indicators — 119
4.6.4	Performance validation — 120
4.6.5	Summary — 122

4.7	Cleaning and care of buildings (CG 330) —	122
4.7.1	Theoretical basis and variables —	122
4.7.2	Model design and specifications —	125
4.7.3	Categorised cost indicators —	129
4.7.4	Performance validation —	131
4.7.5	Summary —	132
4.8	Cleaning and care of outdoor facilities (CG 340) —	133
4.8.1	Theoretical basis and variables —	133
4.8.2	Model design and specifications —	135
4.8.3	Categorised cost indicators —	139
4.8.4	Performance validation —	140
4.8.5	Summary —	142
4.9	Operation, inspection and maintenance (CG 350) —	142
4.9.1	Theoretical basis and variables —	142
4.9.2	Model design and specifications —	146
4.9.3	Categorised cost indicators —	151
4.9.4	Performance validation —	152
4.9.5	Summary —	154
4.10	Inspection and maintenance of building construction (CG 352) —	155
4.10.1	Theoretical basis and variables —	155
4.10.2	Model design and specifications —	157
4.10.3	Categorised cost indicators —	162
4.10.4	Performance validation —	163
4.10.5	Summary —	164
4.11	Inspection and maintenance of technical installations (CG 353) —	165
4.11.1	Theoretical basis and variables —	165
4.11.2	Model design and specifications —	167
4.11.3	Categorised cost indicators —	172
4.11.4	Performance validation —	173
4.11.5	Summary —	175
4.12	Inspection and maintenance of outdoor facilities (CG 354) —	175
4.12.1	Theoretical basis and variables —	175
4.12.2	Model design and specifications —	177
4.12.3	Categorised cost indicators —	182
4.12.4	Performance validation —	183
4.12.5	Summary —	184

4.13	Inspection and maintenance of furniture (CG 355) —	185
4.13.1	Theoretical basis and variables —	185
4.13.2	Model design and specifications —	186
4.13.3	Categorised cost indicators —	191
4.13.4	Performance validation —	192
4.13.5	Summary —	193
4.14	Security and surveillance (CG 360) —	194
4.14.1	Theoretical basis and variables —	194
4.14.2	Model design and specifications —	195
4.14.3	Categorised cost indicators —	200
4.14.4	Performance validation —	201
4.14.5	Summary —	203
4.15	Statutory charges and contributions (CG 370) —	203
4.15.1	Theoretical basis and variables —	203
4.15.2	Model design and specifications —	204
4.15.3	Categorised cost indicators —	209
4.15.4	Performance validation —	210
4.15.5	Summary —	211
5	Results summary —	213
5.1	Identified reference quantities —	213
5.2	Identified predictor variables —	214
5.3	Cost estimation performance —	218
6	Implementation —	223
6.1	Example facility —	223
6.2	Regression model —	225
6.3	Binary classification tree model —	227
6.4	Categorised cost indicators —	229
6.5	Implementation summary —	231
7	Conclusion —	235
	References —	239
	Appendix: Data sample —	245
