Contents

PART 1 INTRODUCTION TO MICROECONOMICS

CHAPTER 1

Analyzing Economic Problems

- 1.1 WHY STUDY MICROECONOMICS?** :
- 1.2 KEY ANALYTICAL TOOLS IN MICROECONOMICS** 5
 - Constrained Optimization 6
 - EXAMPLE 1.1** *The Generation of Electricity* 10
 - Equilibrium Analysis 13
 - Comparative Statics 17
- 1.3 POSITIVE AND NORMATIVE ANALYSIS** 21

LEARNING BY DOING EXERCISES

- 1.1 *Constrained Optimization: The Farmers Fence* 6
- 1.2 *Constrained Optimization: Consumer Choice* 7
- 1.3 *Constrained Optimization: Cost Minimization* 9
- 1.4 *Exogenous and Endogenous Variables in the U.S. Market for Corn* 16
- 1.5 *Comparative Statics with Market Equilibrium* 18
- 1.6 *Comparative Statics with Constrained Optimization* 20

CHAPTER 2

Supply and Demand Analysis

- 2.1 DEMAND, SUPPLY, AND MARKET EQUILIBRIUM** 27
 - Demand Curves 28
 - Supply Curves 31
 - Market Equilibrium 33

- Shifts in Supply and Demand 35
- EXAMPLE 2.1** *The Market for Fresh-Cut Roses and the Valentines Day Effect* 40
- EXAMPLE 2.2** *Using Supply and Demand Curves to Understand the Market for Broilers* 44

2.2 PRICE ELASTICITY OF DEMAND 46

- Elasticities Along Specific Demand Curves 48
- Price Elasticity of Demand and Total Revenue 51
- Determinants of the Price Elasticity of Demand 52
- Market-Level versus Brand-Level Price Elasticities of Demand 54

- EXAMPLE 2.3** *Brand-Level Price Elasticities of Demand in the Automobile Market* 54

2.3 OTHER ELASTICITIES 55

- Income and Cross-Price Elasticities of Demand 55
- EXAMPLE 2.4** *Cross-Price Elasticities of Demand in the Automobile Market* 58
- EXAMPLE 2.5** *Price, Income, and Cross-Price Elasticities for Coke and Pepsi* 58

- Price Elasticity of Supply 60

2.4 LONG-RUN VERSUS SHORT-RUN DEMAND AND SUPPLY 60

- Greater Elasticity in the Long Run than in the Short Run 60
- Greater Elasticity in the Short Run than in the Long Run 61

- EXAMPLE 2.6** *Using Long-Run and Short-Run Supply Curves to Understand the DRAM Price Collapse of 1996* 63

2.5 BACK-OF-THE-ENVELOPE CALCULATIONS 65

- "Fitting" Linear Demand Curves Using Quantity, Price, and Elasticity Information 66

Identifying Supply and Demand Curves from Price and Quantity Movements 68

Identifying the Price Elasticity of Demand from Shifts in Supply 70

EXAMPLE 2.7 *Using Supply Shifts to Identify the Price Elasticity of Demand for Pepper on the Back of an Envelope* 71

APPENDIX A: STRUCTURAL VERSUS REDUCED-FORM EQUATIONS 76

APPENDIX B: MORE ON ELASTICITY:

Point versus Arc Price Elasticity 77

Price Elasticity of Demand along a Constant Elasticity Demand Curve 79

LEARNING BY DOING EXERCISES

2.1 *Sketching a Demand Curve* 29

2.2 *Sketching a Supply Curve* 31

2.3 *Calculating Equilibrium Price and Quantity* 33

2.4 *Comparative Statics on the Market Equilibrium* 38

2.5 *Price Elasticity of Demand* 48

2.6 *Elasticities Along Special Demand Curves* 50

PART 2 CONSUMER THEORY

CHAPTER 3

Consumer Preferences and the Concept of Utility

80

3.1 REPRESENTATIONS OF PREFERENCES 82

Assumptions about Consumer Preferences 82

Ordinal and Cardinal Ranking 82

3.2 UTILITY FUNCTIONS 84

Preferences with a Single Good 84

Preferences with Multiple Goods 89

EXAMPLE 3.1 *Influencing Preferences* 95

Special Utility Functions 101

EXAMPLE 3.2 *Taste Tests and Consumer Preferences* 103

EXAMPLE 3.3 *Consumer Preferences and Fads* 105

LEARNING BY DOING EXERCISES

3.1 *Marginal Utility* 91

3.2 *Marginal Utility* 92

3.3 *Graphing Indifference Curves* 98

3.4 *Graphing Indifference Curves* 100

CHAPTER 4

Consumer Choice

111

4.1 THE BUDGET CONSTRAINT 113

How Does a Change in Income Affect the Budget Line? 116

How Does a Change in Price Affect the Budget Line? 117

4.2 OPTIMAL CHOICE 118

Using the Tangency Conditions to Understand When a Basket Is Not Optimal 121

Finding an Optimal Consumption Basket 122

Two Ways of thinking about Optimality 124

Corner Points 125

4.3 CONSUMER CHOICE WITH COMPOSITE GOODS 131

Application: Coupons and Cash Subsidies 131

EXAMPLE 4.1 *The Food Stamp Program* 135

Application: Joining a Club 136

EXAMPLE 4.2 *Pricing of Sprint's "Free and Clear" PCS Calling Plan* 138

Application: Borrowing and Lending 139

EXAMPLE 4.3 *Consumer Choice When Borrowing and Lending Rates Differ* 141

Application: Quantity Discounts 143

EXAMPLE 4.4 *Frequent Flyer Programs* 144

4.4 REVEALED PREFERENCE 145

Are Observed Choices Consistent with Utility Maximization? 146

APPENDIX: THE MATHEMATICS OF CONSUMER CHOICE 154

LEARNING BY DOING EXERCISES

4.1 *Graphing a Budget Line* 118

4.2 *Finding an Interior Optimum* 123

4.3 *Finding a Corner-Point Solution* 127

4.4 *Corner Point Solution with Perfect Substitutes* 129

4.5 *Consumer Choice that Fails to Maximize Utility* 147

4.6 *Revealed Preference* 149

CHAPTER 5

The Theory of Demand

156

5.1 OPTIMAL CHOICE AND DEMAND	158
The Effects of a Change in Price	158
The Effects of a Change in Income	160
EXAMPLE 5.1 <i>Elasticity of Demand for Cable Television Subscriptions</i>	161
EXAMPLE 5.2 <i>The Irish Potato Famine</i>	166
5.2 INCOME AND SUBSTITUTION EFFECTS	171
Substitution Effect	171
Income Effect	171
EXAMPLE 5.3 <i>How Do Rats Respond to Changes in Prices?</i>	177
5.3 CONSUMER SURPLUS	185
Understanding Consumer Surplus from the Optimal Choice Diagram	189
5.4 MARKET DEMAND	197
5.5 NETWORK EXTERNALITIES	199
EXAMPLE 5.4 <i>Network Externalities in Physical Networks</i>	200
5.6 THE CHOICE OF LABOR AND LEISURE	203
The Backward-Bending Supply of Labor	204
EXAMPLE 5.5 <i>The Supply of Nursing Services</i>	207
5.7 CONSUMER PRICE INDICES	208
EXAMPLE 5.6 <i>The Substitution Bias in the Consumer Price Index</i>	210

LEARNING BY DOING EXERCISES

5.1 <i>A Normal Good has a Positive Income Elasticity of Demand</i>	165
5.2 <i>Finding a Demand Curve (No Corner Points)</i>	167
5.3 <i>Finding a Demand Curve (With A Corner-Point Solution)</i>	169
5.4 <i>Numerical Example of Income and Substitution Effects</i>	178
5.5 <i>Income and Substitution Effects with a Price Increase</i>	181
5.6 <i>Income and Substitution Effects with a Quasi-Linear Utility Function</i>	183
5.7 <i>Consumer Surplus</i>	187
5.8 <i>Compensating and Equivalent Variations with No Income Effect</i>	192
5.9 <i>Compensating and Equivalent Variations with an Income Effect</i>	194

PART 3 PRODUCTION AND COST THEORY

CHAPTER 6

<i>Inputs and Production Functions</i>	215
6.1 INPUTS AND PRODUCTION FUNCTIONS	217
EXAMPLE 6.1 <i>Technical Inefficiency among U. S. Manufacturers</i>	218
6.2 PRODUCTION FUNCTIONS WITH A SINGLE INPUT	219
Total Product Functions	219
Marginal and Average Product	221
Law of Diminishing Marginal Returns	222
6.3 PRODUCTION FUNCTIONS WITH MORE THAN ONE INPUT	224
Total Product and Marginal Product With Two Inputs	224
Isoquants	226
Economic and Uneconomic Regions of Production	230
Marginal Rate of Technical Substitution	232
EXAMPLE 6.2 <i>The Marginal Rate of Technical Substitution Between High-Tech and Low-Tech Workers</i>	234
6.4 SUBSTITUTABILITY AMONG INPUTS	235
Describing a Firm's Input Substitution Opportunities Graphically	235
Elasticity of Substitution	236
EXAMPLE 6.3 <i>Elasticities of Substitution in German Industries</i>	239
Special Production Functions	240
6.5 RETURNS TO SCALE	245
Definitions of Returns to Scale	245
EXAMPLE 6.4 <i>Returns to Scale in Electric Power Generation</i>	248
Returns to Scale versus Diminishing Marginal Returns	248
EXAMPLE 6.5 <i>Returns to Scale in Oil Pipelines</i>	249
EXAMPLE 6.6 <i>Technological Progress and Productivity Growth in U.K. Manufacturing Industries</i>	253
6.6 TECHNOLOGICAL PROGRESS	250

APPENDIX: THE ELASTICITY OF SUBSTITUTION FOR A COBB-DOUGLASS PRODUCTION FUNCTION 256**LEARNING BY DOING EXERCISES**

6.1 <i>Deriving the Equation of an Isoquant</i>	229
---	-----

6.2	<i>Calculating the Elasticity of Substitution</i>	238	
6.3	<i>Returns to Scale for a Cobb-Douglas Production Function</i>	247	
CHAPTER 7			
Costs and Cost Minimization		258	
7.1 COST CONCEPTS FOR DECISION MAKING 260			
	Opportunity Cost	260	
	EXAMPLE 7.1 <i>Economic Value Added</i>	262	
	Explicit versus Implicit Costs	262	
	Economic versus Accounting Costs	263	
	EXAMPLE 7.2 <i>DRAM Chips, Opportunity Costs, and the Difference Between Accounting Costs and Economic Costs</i>	263	
	Sunk versus Non-Sunk Costs	264	
	EXAMPLE 7.3 <i>Sparky Anderson, Mike Moore, and Sunk Costs when Managing a Major League Baseball Team</i>	265	
7.2 THE COST MINIMIZATION PROBLEM 268			
	Long Run versus Short Run	268	
	The Long-Run Cost-Minimization Problem	269	
	Isocost Lines	270	
	Graphical Characterization of the Solution to the Long-Run Cost-Minimization Problem	270	
	Corner-Point Solutions	274	
	Analogy to Consumer Theory	275	
7.3 COMPARATIVE STATICS ANALYSIS OF THE COST MINIMIZATION PROBLEM 276			
	Comparative Statics Analysis of Changes in Input Prices	276	
	EXAMPLE 7.4 <i>Oil Tankers</i>	278	
	Comparative Statics Analysis of Changes in Output	280	
	EXAMPLE 7.5 <i>Burke Mills Revisited</i>	281	
	Summarizing the Comparative Statics Analysis: The Input Demand Curves	282	
	The Price Elasticity of Demand for Inputs	284	
	EXAMPLE 7.6 <i>The Price Elasticity of Demand for Inputs in Manufacturing Industries</i>	286	
SHORT-RUN COST MINIMIZATION 287			
	Characterizing Costs in the Short Run	287	
	Cost Minimization in the Short Run	288	
	Comparative Statics: Short-Run Input Demand versus Long-Run Input Demand	290	
	More than One Variable Input	291	
APPENDIX: ADVANCED TOPICS IN COST MINIMIZATION 297			
	Solving the Cost-Minimization Problem Using the Mathematics of Constrained Optimization	297	
	Duality: "Backing Out" the Production Function from the Input Demand Functions	298	
LEARNING BY DOING EXERCISES			
	7.1 <i>Using the Cost Concepts for an Internet Business</i>	266	
	7.2 <i>Finding an Interior Cost Minimization Optimum for a Cobb-Douglas Production Function</i>	273	
	7.3 <i>Finding a Corner-Point Solution with Perfect Substitutes</i>	275	
	7.4 <i>The Input Demand Curves for a Cobb-Douglas Production Function</i>	283	
	7.5 <i>Short-Run Cost Minimization with One Variable Input</i>	291	
	7.6 <i>Short-Run Cost Minimization and Input Demand Functions with Two Variable Inputs</i>	292	
CHAPTER 8			
Cost Curves		300	
8.1 LONG-RUN COST CURVES 302			
	Long-Run Total Cost Curves	302	
	How Does the Long-Run Total Cost Curve Shift When Input Prices Change?	304	
	EXAMPLE 8.1 <i>How Would Input Prices Affect the Long-Run Total Costs for a Trucking Firm?</i>	307	
8.2 LONG-RUN AVERAGE AND MARGINAL COST 308			
	What Are Long-Run Average and Marginal Costs?	308	
	Relationship Between Long-Run Marginal and Average Cost Curves	311	
	EXAMPLE 8.2 <i>The Relationship Between Average and Marginal Cost in Higher Education</i>	312	
	Economies and Diseconomies of Scale	314	
	EXAMPLE 8.3 <i>Economies of Scale in Alumina Refining</i>	316	
	EXAMPLE 8.4 <i>Economics of Scale for "BackOffice" Activities in a Hospital</i>	317	
	Returns to Scale versus Economies of Scale	318	
	Measuring the Extent of Economies of Scale: The Output Elasticity of Total Cost	319	

8.3 SHORT-RUN COST CURVES	320	
Relationship Between the Long-Run and the Short-Run Total Cost Curves	322	
Short-Run Marginal and Average Costs	323	
The Long-Run Average Cost Curve as an Envelope Curve	325	
EXAMPLE 8.5 <i>The Short-Run and Long-Run Cost Curves for an American Railroad Firm</i>	329	
8.4 SPECIAL TOPICS IN COST	331	
Economies of Scope	331	
EXAMPLE 8.6 <i>Nike Enters the Market for Sports Equipment</i>	332	
Economies of Experience: The Experience Curve	334	
EXAMPLE 8.7 <i>The Experience Curve in the Production of EPROM Chips</i>	336	
8.5 ESTIMATING COST FUNCTIONS	337	
Constant Elasticity Cost Function	337	
Translog Cost Function	338	
APPENDIX: SHEPHARD'S LEMMA AND DUALITY	341	
What is Shephard's Lemma?	341	
Duality	341	
How Do Total, Average, and Marginal Cost Vary With Input Prices?	343	
Proof of Shephard's Lemma	344	
LEARNING BY DOING EXERCISES		
8.1 <i>The Long-Run Total Cost Curve for a Cobb-Douglas Production Function</i>	303	
8.2 <i>Deriving Long-Run Average and Marginal Costs from a Long-Run Total Cost Curve</i>	310	
8.3 <i>Deriving the Short-Run Total Cost Curve</i>	320	
8.4 <i>The Relationship Between Short-Run and Long-Run Average Cost Curves</i>	326	
PART 4 PERFECT COMPETITION		
CHAPTER 9		
<i>Perfectly Competitive Markets</i>		346
9.1 WHAT IS PERFECT COMPETITION?	348	
9.2 PROFIT MAXIMIZATION BY A PRICE-TAKING FIRM	349	
Economic Profit versus Accounting Profit	349	
EXAMPLE 9.1 <i>Wealth Creators and Wealth Destroyers in the United States</i>	351	
The Profit-Maximizing Output Choice for a Price-Taking Firm	352	
9.3 HOW THE MARKET PRICE IS DETERMINED: SHORT-RUN EQUILIBRIUM	355	
The Firm's Short-Run Cost Structure	355	
Short-Run Supply Curve for a Firm: All Fixed Costs are Sunk	356	
Short-Run Supply Curve for a Firm: Some Fixed Costs Are Sunk, Some Non-Sunk	359	
EXAMPLE 9.2 <i>The Supply Curve for an American Corn Producer</i>	364	
Short-Run Market Supply Curve	364	
EXAMPLE 9.3 <i>Short-Run Supply Curves for Copper</i>	366	
The Price Elasticity of Supply	369	
Short-Run Perfectly Competitive Equilibrium	370	
Comparative Statics Analysis of the Short-Run Equilibrium	372	
EXAMPLE 9.4 <i>Using Comparative Statics to Derive the Short-Run Price Elasticity for Fresh-Cut Roses on the "Back of an Envelope"</i>	374	
EXAMPLE 9.5 <i>The Price of Electricity on NordPool</i>	376	
9.4 HOW THE MARKET PRICE IS DETERMINED: LONG-RUN MARKET EQUILIBRIUM	377	
Long-Run Output and Plant-Size Adjustments by Established Firms	377	
The Firm's Long-Run Supply Curve	379	
Free Entry and Long-Run Perfectly Competitive Equilibrium	380	
EXAMPLE 9.6 <i>Free Entry into the Internet Access Market</i>	383	
The Long-Run Market Supply Curve	384	
EXAMPLE 9.7 <i>The Collapse of the Supertanker Market</i>	386	
Constant-Cost, Increasing-Cost, and Decreasing-Cost Industries	389	
What Does Perfect Competition Teach Us?	391	
EXAMPLE 9.8 <i>Free Entry into an Increasing-Cost Industry: The Solvent Extraction Business</i>	392	
9.5 ECONOMIC RENT AND PRODUCER SURPLUS	393	
Economic Rent	393	
Producer Surplus	397	

EXAMPLE 9.9 <i>Producer Surplus in the World Copper Market</i>	400
Economic Profit, Producer Surplus, Economic Rent	402

APPENDIX: PROFIT MAXIMIZATION IMPLIES COST MINIMIZATION	407
--	-----

LEARNING BY DOING EXERCISES

9.1 <i>Deriving the Short-Run Supply Curve for a Firm When there are Nonsunk Fixed Costs</i>	358
9.2 <i>Deriving the Short-Run Supply Curve for a Firm When there are Non-Sunk Fixed Costs</i>	361
9.3 <i>Deriving a Short-Run Market Equilibrium</i>	371
9.4 <i>Calculating a Long-Run Equilibrium</i>	382

CHAPTER 10

Competitive Markets: Applications 409

10.1 THE INVISIBLE HAND	411
10.2 IMPACT OF AN EXCISE TAX	413
Incidence of a Tax	418
EXAMPLE 10.1 <i>Gasoline Taxes</i>	420
10.3 SUBSIDIES	423
10.4 PRICE CEILINGS (MAXIMUM PRICE REGULATION)	425
EXAMPLE 10.2 <i>Scalping Super Bowl Tickets on the Internet</i>	430
EXAMPLE 10.3 <i>Price Ceilings in the Market for Natural Gas</i>	432
10.5 PRICE FLOORS (MINIMUM PRICE REGULATION)	435
EXAMPLE 10.4 <i>Unintended Consequences of Price Regulation in Airline Markets</i>	439
10.6 PRODUCTION QUOTAS	442
EXAMPLE 10.5 <i>Quotas for Taxi Cabs</i>	444
10.7 OTHER PRICE SUPPORTS	446
10.8 IMPORT TARIFFS AND QUOTAS	450
EXAMPLE 10.6 <i>Dumping</i>	455

LEARNING BY DOING EXERCISES

10.1 <i>Excise Tax</i>	416
10.2 <i>Subsidy</i>	425
10.3 <i>Effect of a Price Ceiling</i>	433
10.4 <i>Price Floor</i>	440
10.5 <i>Comparing a Tax, a Price Floor, and a Quota</i>	445

10.6 <i>Comparing Price Support Programs: Government Purchases and Acreage Limitations</i>	448
--	-----

PART 5 MARKET POWER

CHAPTER 11

Monopoly and Monopsony 462

11.1 PROFIT MAXIMIZATION BY A MONOPOLIST	464
The Profit Maximization Condition	464
A Closer Look at Marginal Revenue	467
Average Revenue and Marginal Revenue	469
The Monopoly Profit-Maximization Condition Shown Graphically	471
A Monopolist Does Not Have a Supply Curve	473
11.2 THE INVERSE ELASTICITY PRICING RULE	474
Price Elasticity of Demand and the Profit- Maximizing Price	475
Marginal Revenue and the Price Elasticity of Demand	476
The Inverse Elasticity Pricing Rule	477
EXAMPLE 11.1 <i>Chewing Gum, Baby Food, and the IEP</i>	481
The Monopolist Always Produces on the Elastic Region of the Market Demand Curve	482
IEPR Does Not Only Apply to Monopolists	483
Quantifying Market Power: The Lerner Index	484
EXAMPLE 11.2 <i>The Lerner Index of Market Power in the Breakfast Cereal Industry</i>	484
11.3 MONOPOLY COMPARATIVE STATICS	485
Shifts in Market Demand	485
EXAMPLE 11.3 <i>Coca Cola's Smart Vending Machines: An Application of the Monopoly Midpoint Rule</i>	488
Changes in Marginal Cost	489
EXAMPLE 11.4 <i>Do Cigarette Producers Act as a Profit-Maximizing Monopolist?</i>	491
11.4 MULTIPLE PLANT MONOPOLY	492
Output Choice With Two Plants	492
Profit Maximization by a Cartel	495
EXAMPLE 11.5 <i>Allocating Production Quotas in a Cartel: The Case of OPEC</i>	496

11.5 THE WELFARE ECONOMICS OF MONOPOLY	497		
The Monopoly Equilibrium Differs from the Perfectly Competitive Equilibrium	497		
Monopoly Deadweight Loss	498		
Rent-Seeking Activities	499		
11.6 WHY DO MONOPOLY MARKETS EXIST?	499		
Natural Monopoly	500		
Barriers to Entry	501		
<i>EXAMPLE 11.6 United States of America versus Microsoft: The Applications Barrier to Entry</i>	502		
11.7 MONOPSONY	503		
Monopsony Equilibrium	503		
An Inverse Elasticity Pricing Rule for Monopsony	507		
<i>EXAMPLE 11.7 Monopsony Power in the Market for Nurses</i>	507		
Deadweight Loss under Monopsony	508		
LEARNING BY DOING EXERCISES			
11.1 Marginal and Average Revenue for a Linear Demand Curve	471		
11.2 Computing a Monopoly Equilibrium By Equating Marginal Revenue to Marginal Cost	473		
11.3 Using the IEPR to Compute the Optimal Monopoly Price for a Constant Elasticity Demand Curve	478		
11.4 Using the IEPR to Compute the Optimal Monopoly Price for a Linear Demand Curve	479		
11.5 The Comparative Statics of a Shift in a Linear Demand Curve: The Monopoly Midpoint Rule	486		
11.6 Optimal Price and Output for a Multiplant Monopolist	493		
11.7 Calculating the Equilibrium in a Monopsony Market	505		
CHAPTER 12			
<i>Capturing Surplus</i>		514	
12.1 CAPTURING SURPLUS	516		
First-Degree Price Discrimination	517		
Second-Degree Price Discrimination	518		
Third-Degree Price Discrimination	518		
12.2 FIRST-DEGREE PRICE DISCRIMINATION	519		
<i>EXAMPLE 12.1 Undergraduate Financial Aid at American Universities</i>	523		
12.3 SECOND-DEGREE PRICE DISCRIMINATION	524		
Block Pricing	524		
<i>EXAMPLE 12.2 Declining Block Tariffs for Electricity</i>	528		
Subscription and Usage Charges	529		
12.4 THIRD-DEGREE PRICE DISCRIMINATION	531		
<i>EXAMPLE 12.3 Forward Integration to Implement Price Discrimination</i>	533		
Screening	535		
<i>EXAMPLE 12.4 Pricing Airlines Tickets</i>	535		
12.5 TYING (TIE-IN SALES)	538		
<i>EXAMPLE 12.5 IBM (1936)</i>	539		
Bundling	539		
Mixed Bundling	542		
12.6 ADVERTISING	542		
LEARNING BY DOING EXERCISES			
12.1 Capturing Surplus with First-Degree Price Discrimination	521		
12.2 Where Is the Marginal Revenue Curve with First-Degree Price Discrimination?	522		
12.3 Capturing Surplus with a Block Tariff	526		
12.4 Third-Degree Price Discrimination in Railroad Service	532		
12.5 Pricing Airline Tickets	536		
12.6 Markup and Advertising-to-Sales Ratio	546		
PART 6 IMPERFECT COMPETITION AND STRATEGIC BEHAVIOR			
CHAPTER 13			
<i>Market Structure and Competition</i>			550
13.1 TYPES OF MARKET STRUCTURES	552		
13.2 OLIGOPOLY WITH HOMOGENEOUS PRODUCTS	553		
The Cournot Model of Oligopoly	553		
<i>EXAMPLE 13.1 Cournot Equilibrium in the Corn Wet-Milling Industry</i>	560		
<i>EXAMPLE 13.2 Individual versus Group Rationality in the Copper Industry</i>	562		
Bertrand Price Competition in a Homogeneous Products Oligopoly	566		
Why Are the Cournot and Bertrand Equilibria Different?	568		
13.3 DOMINANT FIRM MARKETS	569		
<i>EXAMPLE 13.3 Dominant Firm Pricing by U.S. Steel</i>	572		

13.4 OLIGOPOLY WITH DIFFERENTIATED PRODUCTS	573		
What Is Product Differentiation?	573		
EXAMPLE 13.4 <i>Horizontal Product Differentiation—Apple versus Microsoft Windows</i>	575		
Bertrand Price Competition with Horizontally Differentiated Products	576		
EXAMPLE 13.5 <i>Bertrand Price Competition: Eurotunnel versus the Channel Ferry Boats</i>	582		
13.5 MONOPOLISTIC COMPETITION	584		
Short-Run and Long-Run Equilibrium in Monopolistically Competitive Markets	584		
Price Elasticity of Demand, Margins, and Market Structure	586		
EXAMPLE 13.6 <i>Wine or Roses? The Structure of Local Retail Markets</i>	587		
Do Prices Fall When More Firms Enter?	588		
EXAMPLE 13.7 <i>Can More Firms Lead to Higher Prices? The Case of Primary Care Physicians Markets</i>	589		
APPENDIX: THE COURNOT EQUILIBRIUM AND THE INVERSE ELASTICITY PRICE RULE	592		
LEARNING BY DOING EXERCISES			
13.1 <i>Computing a Cournot Equilibrium</i>	557		
13.2 <i>Computing the Cournot Equilibrium for Two or More Firms with Linear Demand</i>	563		
13.3 <i>Computing a Bertrand Equilibrium with Differentiated Products</i>	580		
CHAPTER 14			
<i>Game Theory and Strategic Behavior</i>	594		
14.1 THE CONCEPT OF NASH EQUILIBRIUM	596		
A Simple Game	596		
The Nash Equilibrium	597		
The Prisoners' Dilemma	597		
Dominant and Dominated Strategies	598		
EXAMPLE 14.1 <i>The Prisoners' Dilemma and the Law</i>	599		
Games with More than One Nash Equilibrium	603		
EXAMPLE 14.2 <i>The Game of Chicken between Sky TV and British Satellite Broadcasting in the U.K. Satellite Television Market</i>	604		
EXAMPLE 14.3 <i>Bank Runs</i>	605		
Mixed Strategies	608		
Summary: How to Find All the Nash Equilibria in a Simultaneous-Move Game With Two Players	610		
14.2 THE REPEATED PRISONERS' DILEMMA	610		
EXAMPLE 14.4 <i>Trench Warfare in World War I and the Repeated Prisoners' Dilemma</i>	613		
Lessons from the Repeated Prisoners' Dilemma	614		
EXAMPLE 14.5 <i>The Price War in the Costa Rican Cigarette Market</i>	615		
14.3 SEQUENTIAL-MOVE GAMES AND STRATEGIC MOVES	616		
Analyzing Sequential-Move Games	616		
The Strategic Value of Limiting One's Options	620		
EXAMPLE 14.6 <i>Irreversibility of Business Decisions in the Airline Industry</i>	623		
LEARNING BY DOING EXERCISES			
14.1 <i>Finding the Nash Equilibrium by Identifying Dominant Strategies: Coke versus Pepsi</i>	602		
14.2 <i>Finding All the Nash Equilibria in a Game</i>	607		
14.3 <i>An Entry Game</i>	618		
PART 7 SPECIAL TOPICS			
CHAPTER 15			
<i>Risk and Information</i>			627
15.1 DESCRIBING RISKY OUTCOMES	629		
Lotteries and Probabilities	629		
Expected Value	631		
Variance	631		
15.2 EVALUATING RISKY OUTCOMES	634		
Utility Functions and Risk Preferences	634		
Risk-Neutral and Risk-Loving Preferences	638		
15.3 BEARING AND ELIMINATING RISK	641		
Risk Premium	641		
When Would a Risk-Averse Person Choose to Eliminate Risk? The Demand for Insurance	645		
EXAMPLE 15.1 <i>Why Does Anyone Supply Insurance? A Brief History of Insurance and the Sharing of Risk</i>	646		
Asymmetric Information in Insurance Markets: Moral Hazard and Adverse Selection	647		

15.4 ANALYZING RISKY DECISIONS	649				
Decision Tree Basics	649				
Decision Trees with a Sequence of Decisions	652				
The Value of Information	654				
EXAMPLE 15.2 <i>The Real Options Revolution and the VPI</i>	656				
15.5 AUCTIONS	657				
Types of Auctions and Bidding Environments	657				
Auctions When Bidders Have Private Values	658				
Auctions When Bidders Have Common Values: The Winner's Curse	664				
EXAMPLE 15.3 <i>The Winners Curse in the Classroom</i>	666				
EXAMPLE 15.4 <i>The "Greatest Auction of Them All": The FCC's Broadband Spectrum Auction</i>	661				
LEARNING BY DOING EXERCISES					
15.1 <i>Computing the Expected Utility for Two Lotteries for a Risk-Averse Decision Maker</i>	637				
15.2 <i>Computing the Expected Utility for Two Lotteries: Risk-Neutral and Risk-Loving Decision Makers</i>	640				
15.3 <i>Computing the Risk Premium from a Utility Function</i>	644				
15.4 <i>Verifying the Nash Equilibrium in a First-Price Sealed-Bid Auction with Private Values</i>	660				
CHAPTER 16					
<i>General Equilibrium Theory</i>	672				
16.1 GENERAL EQUILIBRIUM ANALYSIS: TWO MARKETS	674				
EXAMPLE 16.1 <i>Internet Sales Taxes</i>	611				
16.2 GENERAL EQUILIBRIUM ANALYSIS: MANY MARKETS	679				
The Origins of Supply and Demand in a Simple Economy	679				
The General Equilibrium in Our Simple Economy	686				
Walras' Law	690				
16.3 GENERAL EQUILIBRIUM ANALYSIS: COMPARATIVE STATICS	691				
EXAMPLE 16.2 <i>The General Equilibrium Effects of the Gasoline Excise Tax</i>	694				
16.4 THE EFFICIENCY OF COMPETITIVE MARKETS	696				
What Is Economic Efficiency?	696				
Exchange Efficiency	697				
Input Efficiency	702				
Substitution Efficiency	705				
Pulling the Analysis Together: The Fundamental Theorems of Welfare Economics	708				
16.5 GAINS FROM FREE TRADE	709				
Free Trade Is Mutually Beneficial	710				
Comparative Advantage	713				
EXAMPLE 16.3 <i>How Will NAFTA Affect the U.S. Automobile Industry?</i>	714				
APPENDIX: DERIVING THE DEMAND AND SUPPLY CURVES FOR THE GENERAL EQUILIBRIUM IN FIGURE 16.9					
	719				
Deriving the Household and Market Demand Curves for Energy and Food	719				
Deriving the Market Demand Curves for Labor and Capital	720				
Deriving the Market Supply Curves for Energy and Food	724				
LEARNING BY DOING EXERCISES					
16.1 <i>The Conditions for a General Equilibrium</i>	676				
16.2 <i>The Conditions for a General Equilibrium</i>	688				
16.3 <i>Checking the Conditions for Exchange Efficiency</i>	700				
CHAPTER 17					
<i>Externalities and Public Goods</i>	726				
17.1 EXTERNALITIES	728				
EXAMPLE 17.1 <i>Negative Externality: Congestion on the Internet</i>	729				
Negative Externalities and Economic Efficiency	731				
EXAMPLE 17.2 <i>Congestion Pricing on the Highway</i>	742				
Positive Externalities and Economic Efficiency	743				
EXAMPLE 17.3 <i>Subsidizing Mass Transit</i>	745				
Property Rights and the Coase Theorem	746				

17.2 PUBLIC GOODS	749
Efficient Provision of a Public Good	750
EXAMPLE 17.4 <i>The Free Rider Problem in Public Broadcasting</i>	754

LEARNING BY DOING EXERCISES

17.1 <i>The Efficient Amount of Pollution</i>	733
17.2 <i>Emissions Fee</i>	736
17.3 <i>The Coase Theorem</i>	747
17.4 <i>Optimal Provision of a Public Good</i>	752

Mathematical Appendix 757

A.1 FUNCTIONAL RELATIONSHIPS	758
A.2 WHAT IS A MARGIN?	760
A.3 DERIVATIVES	763
A.4 HOW TO FIND A DERIVATIVE	764
Derivative of a Constant	764
Derivative of a Power Function	764
Derivatives of Sums and Differences	767
Derivatives of a Natural Logarithm	767
Derivatives of Products	768
Derivatives of Quotients	768
A.5 MAXIMIZATION AND MINIMIZATION PROBLEMS	768
<i>Optimal Quantity Choice Rules</i>	770

A.6 MULTIVARIABLE FUNCTIONS	770
<i>Finding a Maximum or a Minimum</i>	772
A.7 CONSTRAINED OPTIMIZATION	774
A.8 LAGRANGE MULTIPLIERS	776

LEARNING BY DOING EXERCISES

A.1 <i>Graphing Total Cost</i>	759
A.2 <i>Relating Average and Marginal Cost</i>	762
A.3 <i>Derivative of a Power Function</i>	765
A.4 <i>Utility and Marginal Utility</i>	767
A.5 <i>Derivatives of Sums and Differences</i>	767
A.6 <i>Using Derivatives to Find a Minimum</i>	11Q
A.7 <i>Marginal Utility with Two Independent Variables</i>	113
A.8 <i>Marginal Cost with Two Independent Variables</i>	
A.9 <i>Radio and TV Advertising</i>	
A.10 <i>The Farmers Fencing Problem</i>	775
A.11 <i>Radio and TV Advertising Revisited</i>	776
A.12 <i>The Farmers Fencing Problem Revisited</i>	111

SOLUTIONS TO SELECTED PROBLEMS	779
