

Modelling Global Change

The Art of Integrated Assessment Modelling

Marco Janssen

Bureau for Environmental Assessment, RTVM, The Netherlands

ADVANCES IN ECOLOGICAL ECONOMICS

Edward Elgar

Cheltenham, UK • Northampton, MA, USA

Contents

<i>List of Figures and Tables</i>	viii
<i>Preface</i>	xv
1. Introduction	
1.1 The Issue	1
1.2 The Scope and Objectives	3
1.3 Structure of the Book	5
2. Global Change	
2.1 Introduction	6
2.2 The Human System	7
2.3 The Issues within the Human System	9
2.4 The Environmental System	12
2.5 The Issues within the Environmental System	17
2.6 Setting the Scope	21
3. Integrated Assessment Modelling	
3.1 Integrated Assessment	23
3.2 Integrated Assessment Models: A General Description	24
3.3 Limitations and Possibilities of Integrated Assessment Models	25
3.4 Integrated Assessment Modelling: Methods and Tools	27
3.5 Integrated Assessment Models of Global Climate Change	29
3.6 Retrospective	37
4. Methodological Issues	
4.1 Introduction	38
4.2 Optimization	40
4.3 Perspectives	44
4.4 The Evolutionary Modelling Approach	50

5. Optimizing the Climate Change Problem	
5.1 Introduction	60
5.2 The Model OMEGA	62
5.3 Optimization Methodology	68
5.4 Optimization Approaches	69
5.5 Analysis	75
5.6 Results	77
5.7 Conclusions	91
Appendix: Reduced version of OMEGA	92
6. Global Energy Strategies	
6.1 Introduction	94
6.2 Bottom-up versus Top-down Modelling	95
6.3 The Model	96
6.4 Methodology	98
6.5 Four Global Energy Scenarios	100
6.6 Climate Change Constraints	107
6.7 Delayed Response	112
6.8 Hedging Strategies	117
6.9 Integrated Policy for Climate Change and Acidification	121
6.10 Conclusions	124
7. The Initial Allocation of Emission Rights	
7.1 Introduction	125
7.2 Historical Regional CO ₂ - Emissions	127
7.3 Emission Debts	131
7.4 Emission Rights	141
7.5 Conclusions	155
8. The Battle of Perspectives	
8.1 Introduction	158
8.2 Perspectives and Agents	160
8.3 The Model	164
8.4 Modelling World Views and Management Styles	168
8.5 Changing Perspectives and Adaptive Behaviour	180
8.6 Conclusions	192

9. Managing Malaria	
9.1 Introduction	194
9.2 Malaria	197
9.3 Modelling Malaria: A Complex Adaptive Systems Approach	202
9.4 The Experiments	214
9.5 Conclusions	231
10. Conclusions and Discussion	
10.1 Major Findings	233
10.2 An Integrated Assessment Modelling Framework for Tomorrow	238
<i>References</i>	240
<i>Index</i>	260
