Introduction by Fabio Petri	1
Introduction by Frank Hahn	27
1 Existence of GE: are the cases of non-existence a cause for serious worry? ELVIO ACCINELLI	35
2 Learning in intertemporal equilibrium models and the sunspot case ALOISIO P ARAUJO AND WILFREDO L. MALDONADO	58
3 Disequilibrium and stability FRANKLIN M FISHER	74
4 Statistical equilibrium in economics: method, interpretation, and an example DUNCAN K FOLEY	95
5 Savings, investment and capital in a system of general intertemporal equilibrium Appendix I: the determination of the γ and S schedules Appendix II: two notes on Hahn on 'the neo-Ricardians' PIERANGELO GAREGNANI Mathematical note to chapter 5 MICHELE TUCCI	117 141 149 173
6 Some implications of endogenous contract enforcement for general equilibrium theory HERBERT GINTIS	176

vi	<i>Contents</i>	
7	Macroeconomics and general equilibrium FRANK HAHN	206
8	'Classical' vs. 'neoclassical' theories of value and distribution and the long-period method HEINZ D. KURZ AND NERI SALVADORI	216
9	Endogenous uncertainty and rational belief equilibrium: a unified theory of market volatility MORDECAI KURZ	246
10	Incentives and the stock market in general equilibrium MICHAEL MAGILL AND MARTINE QUINZII	283
11	Intermediation, the stock market and intergenerational transfers MICHAEL MAGILL AND MARTINE QUINZII	315
12	The sequential indeterminacy problem MICHAEL MANDLER	341
13	General equilibrium and the destiny of capitalism à la Schumpeter MICHIO MORISHIMA	362
14	A 'Sraffian' critique of general equilibrium theory, and the classical-Keynesian alternative FABIO PETRI	387
15	Competitive equilibrium and non-cooperative game theory: noise and bounded rationality HAMID SABOURIAN	422
16	Applications of the classical approach BERTRAM SCHEFOLD	439
17	General equilibrium: problems, prospects and alternatives - an attempt at synthesis ALAN KIRMAN	468
18	General equilibrium: problems, prospects and alternatives - final discussion	486
