| 2.2.1 | International aviation             | 10 |
| 2.2.2 | Domestic aviation                  | 12 |
| 2.3   | Economic motivation for regulation | 13 |
| 2.4   | Regulatory reform in aviation      | 18 |
| 2.4.1 | European reform                    | 19 |
| 2.5   | Conclusion                         | 23 |

## **Part I Environmental Costs in Air Transport Markets**

|       |   |    |
|-------|---|----|
| 3     | Evaluating environmental externalities          | 27 |
| 3.1   | Introduction                                    | 27 |
| 3.2   | Externalities                                   | 27 |
| 3.3   | External effects of air transport               | 31 |
| 3.3.1 | Physical impact: some evidence                  | 33 |
| 3.4   | Evaluating external effects                     | 36 |
| 3.5   | Conclusion                                      | 42 |
| 4     | Noise   | 45 |
| 4.1   | Introduction                                    | 45 |
| 4.1.1 | Aircraft noise valuation                        | 46 |
| 4.2   | Survey methods                                  | 47 |
| 4.3   | Hedonic pricing                                 | 49 |
| 4.3.1 | Meta-analysis and transfer of valuation results | 51 |
| 4.4   | Conclusion                                      | 57 |
| 5     | Emissions                                       | 60 |
| 5.1   | Introduction                                    | 60 |
| 5.2   | Global damage: the greenhouse effect            | 62 |
| 5.3   | Local air pollution                             | 66 |
| 5.3.1 | Valuation: mortality                            | 66 |
| 5.3.2 | Valuation: morbidity                            | 69 |
| 5.3.3 | Exposure—response relations and cost estimates  | 70 |

|       |   |    |
|-------|---|----|
| 5.4   | Conclusion                                      | 72 |
| 6     | Environmental costs in European aviation        | 73 |
| 6.1   | Introduction                                    | 73 |
| 6.2   | Noise exposure                                  | 73 |
| 6.3   | Exposure to local air pollution                 | 77 |
| 6.4   | Accident risk                                   | 78 |
| 6.5   | Environmental cost estimates                    | 79 |
| 6.5.1 | Aircraft-specific environmental costs           | 79 |
| 6.5.2 | Environmental costs in European airline markets | 83 |
| 6.6   | Conclusion                                      | 87 |

## **Part II Economic Analysis of Air Transport Liberalization**

|       |  |     |
|-------|--|-----|
| 7     | Frequency choice in air transport markets                | 93  |
| 7.1   | Introduction   | 93  |
| 7.2   | A model of airline competition                           | 94  |
| 7.2.1 | The demand model   | 94  |
| 7.2.2 | Cost and profit  | 96  |
| 7.3   | Monopoly   | 97  |
| 7.4   | Single-departure competition                             | 98  |
| 7.5   | Symmetric multi-departure competition                    | 100 |
| 7.5.1 | Simultaneous frequency-price competition                 | 103 |
| 7.5.2 | Dynamic frequency-price competition                      | 104 |
| 7.5.3 | Comparative statics analysis                             | 105 |
| 7.6   | Welfare analysis   | 106 |
| 7.6.1 | Evaluation   | 107 |
| 7.6.2 | Optimal versus market solutions                          | 110 |
| 7.7   | Conclusion   | 111 |
| 8     | Frequency choice and liberalization: simulation modeling | 113 |
| 8.1   | Introduction   | 113 |
| 8.2   | Symmetric solutions                                      | 113 |
| 8.2.1 | Results: inelastic demand                                | 114 |
| 8.2.2 | Results: elastic demand                                  | 117 |
| 8.3   | Asymmetric frequency competition                         | 121 |
| 8.3.1 | Configurations   | 121 |
| 8.3.2 | Price equilibrium  | 124 |
| 8.3.3 | Frequency equilibrium                                    | 125 |
| 8.3.4 | Simulation results                                       | 128 |
| 8.4   | Conclusion   | 131 |
| 9     | Airline liberalization in networks                       | 133 |
| 9.1   | Introduction   | 133 |
| 9.2   | The model  | 134 |
| 9.2.1 | Demand   | 134 |
| 9.2.2 | Cost and profit  | 135 |

|                   |   |     |
|-------------------|---|-----|
| 9.2.3             | Calibration   | 135 |
| 9.3               | A one-hub network                                   | 137 |
| 9.3.1             | Monopoly  | 137 |
| 9.3.2             | Leg competition                                     | 140 |
| 9.4               | A two-hub network                                   | 141 |
| 9.4.1             | Monopoly  | 142 |
| 9.4.2             | Hub competition                                     | 143 |
| 9.5               | Conclusion  | 145 |
| 10                | Welfare effects of European airline liberalization  | 146 |
| 10.1              | Introduction  | i   |
| 10.2              | A theoretical model                                 | 147 |
| 10.3              | The econometric model                               | 150 |
| 10.4              | Estimation and results                              | 153 |
| 10.4.1            | Sample  | 153 |
| 10.4.2            | Estimation results                                  | 154 |
| 10.5              | Evaluation  | 159 |
| 10.5.1            | The impact on consumer welfare                      | 159 |
| 10.5.2            | The impact on environmental costs                   | 162 |
| 10.6              | Conclusion  | 164 |
| 11                | Conclusion  | 166 |
| 11.1              | Summary   | 166 |
| 11.2              | Looking ahead: implications for policy and research | 170 |
| <i>Appendix A</i> | <i>Proof of the positive frequency effect</i>       | 175 |
| <i>Appendix B</i> | <i>Data and calibration</i>                         | 176 |
| <i>Appendix C</i> | <i>Sign of the frequency-price derivatives</i>      | 179 |
| <i>Appendix D</i> | <i>Sign of airline 2's profit derivative</i>        | 180 |
