1	The Background of Inter-Enterprise Cooperative Ties in Japan	1
	Introduction: Late Development and Cooperative Ties in Japan, 1	
	Cooperative Technological Ties Involving Large "Modern" and Small "Semi-Traditional" Enterprises: Industrial Dualism and Late Development, 3	
	Technological Cooperation Involving the Industrial House (Zaibatsu And Keiretsu) Groupings, 11	
	The Early Postwar Years: The Business Groups, Industrial Groups, and Technological Cooperation, 15	
	The Role of the Public Sector, 19	
	Further Discussion, 21	
	Notes, 22	
2	The Use of Inter-Enterprise Ties in the Development of the Computer and Telecommunications Industry in Japan	31
	Characteristics of the Early Postwar "Catch Up" Period, 31	
	The Turning Point: Innovation in Frontier Industries, 34	
	General Changes in Firm Structure and Behavior to Facilitate Innovation in New Fields, 36	

The Emergence of the Combined Computer and
Telecommunications Industry in Japan, 40
Changing Forms of Inter-Enterprise Cooperation in the
Computer and Telecommunications Industry, 45
Further Discussion, 50
Notes, 52

Cooperation Between Firms in the Same Industry: Case Studies Involving Applied Research

Introduction to the Case Studies, 57
General Characteristics of the Applied Intra-Industry
Research Projects, 60
NTT-Sponsored Applied Intra-Industry Cooperative
Research Projects, 65
Computer Development Under the MITI Reorganization
Program, 75
Conclusions: Conditions that Allow Successful Applied
Intra-Industry Cooperative Research, 81
Further Discussion, 83
Notes, 85

Cooperation Between Firms in the Same Industry: Case Studies Involving Relatively Basic (or "Fundamental") Research

General Characteristics of the Basic Research Projects, 91
The MITI-Sponsored VLSI Program and Other Cooperative
Basic Research Projects, 92
Comparisons with Applied Intra-Industry Cooperative
Research, 100
Further Discussion, 108
Notes, 111

Cooperation Between Firms in Different Industries for Purposes of Innovation, and Comparisons with Intra- Industry Research

Forms of Inter-Industry Research, 115
General Characteristics of Inter-Industry Cooperative
Research Projects, 118

Cooperation for the Development of Individual Products
and Simple Systems, 121

Cooperation for the Development of Large-Scale Systems,
124

Complementarity of Different Types of Inter-Industry
Cooperative Projects, 129

Inter-Industry and Intra-Industry Cooperation: A
Comparison of Main Points, 132

Further Discussion, 135

Notes, 138

6 Possible Implications for Other Late Developing Countries 145

Introduction, 145

Timing and Cooperative Technological Ties: "Earlier"
Versus "Later" Late Development, 149

Cooperative Ties in the Least Industrialized Countries, 152

Cooperative Ties in Other "Early" And "Middle"
Latecomers: The Case of the "NICs" and "Next NICs",
157

Conclusions, 180

Notes, 182

Appendix 201
