Introduction		1
	I <sup>i</sup>	
1 System-wide issues		5
1.1 Theories of portfolio choice		5
1.2 Justifications for the existence of the financial system		18
1.3 Corporate governance		21
1.4 A functional approach to the financial system		23
1.5 Bank-based versus market-based systems		25
1.6 Financial development and financial structure	•	29
1.7 Factors underlying recent financial change		32
2 The key differences between the balance sheets		37
2.1 Sources of data		38
2.2 Sectoral differences		40
2.3 Instrument differences		48
2.4 Statistical differences		50
<i>Appendix 2.1: Other assets</i>		51
3 Aspects of the macroeconomic history of the G-7		54
3.1 A long-term view		54
3.2 Demographic aspects		56
3.3 The last three decades		58
4 Corporate finance		62
4.1 Corporate finance and balance sheet structure - theoretical background		62
4.2 Agency costs and cyclical effects		65

4.3	Financial structure and industrial development	68
4.4	Empirical evidence on corporate financing patterns	70
4.5	Company sector balance sheets	74
4.6	Flow data for the corporate sector	81
4.7	Ownership of equities	85
5	The household sector	89
5.1	The household sector - theoretical background	89
5.2	The household sector - empirical background	93
5.3	Household/personal sector balance sheets	102
5.4	Flow data for the household sector	109
6	The general government sector	114
6.1	General government sector - theoretical and empirical background	114
6.2	General government sector balance sheets	118
6.3	Ownership of government bonds	123
7	The foreign sector	125
7.1	Foreign sector - theoretical and empirical background	125
7.2	Foreign sector balance sheets	129
7.3	International investment positions derived from the balance of payments data	135
8	The financial sector	143
8.1	The financial sector - theoretical and empirical background	143
8.2	Financial institutions sector balance sheets	145
9	The banking sector	151
9.1	The banking sector - theoretical and empirical background	151
9.2	Banking sector balance sheets	155
10	Insurance companies, pension funds and mutual funds	161
10.1	Portfolio behaviour of institutional investors	161
10.2	Investment considerations for the differing types of institutional investor	163
10.3	Empirical work on aggregate institutional portfolios	166
10.4	Life insurance and pension fund balance sheets	169
10.5	Mutual fund balance sheets	172

11	Confronting theoretical paradigms with the data	177
11.1	Are structural differences in line with the stylised models?	177
11.2	Are there indications of convergence?	184
11.3	Equity markets and corporate finance in France and the G-7	193
11.4	Is there any evidence that the balance sheets affect overall economic behaviour or performance?	195
	Conclusion	199
