Financial Econometrics Methods and models

Peijie Wang

i ^ ^ Taylor & Francis Group LONDON AND NEW YORK

Detailed contents

1 Stochastic processes and financial time series

- 1.1 Introduction 1
- 1.2 Stochastic processes and their properties 3 1.2.1 Martingales'< 4
 - 1.2.2 Random walks 4
 - 1.2.3 Gaussian white noise processes 4
 - 1.2.4 Poisson processes 5
 - 1.2.5 Markov processes 6
 - 1.2.6 Wiener processes 6
 - 1.2.7 Stationarity and ergodicity 6
- 1.3 The behaviour and valuation of security prices 7
 - 1.3.1 Generalised Wiener processes 7
 - 1.3.2 ho processes 8
 - 1.3.3 Ito's lemma 8
 - 1.3.4 Geometric Wiener processes and financial variable behaviour in the short term and long run 9

1

1.3.5 Valuation of derivative securities and beyond 11 References 12

2 Unit roots, cointegration and other comovenients in time series 14

- 2.1 Unit roots and testing for unit roots 14
 - 2.1.1 Dickey and Fuller 16
 - 2.1.2 Phillips and Perron 16
 - 2.1.3 Kwiatkowski, Phillips, Schmidt and Shin 17
 - 2.1.4 Panel unit root tests 17
- 2.2 Cointegration 18
- 2.3 Common trends and common cycles 20
- 2.4 Examples and cases 22
- 2.5 Empirical literature 27 Questions and problems 30 References 32

3	Time-varying volatility models - GARCH and stochastic volatility •		35
	3.1	ARCH and GARCH and their variations 35	
		3.1.1 ARCH and GARCH models 35	
		3.1.2 Variations of the ARCH/GARCH model 37	
	3.2	Multivariate GARCH 39	
		3.2.1 Constant correlation 39	
		3.2.2 Full parameterisa.tion 40	
		3.2.3 Positive definite parameterisation 40	
	3.3	Stochastic volatility 43	
	3.4	Examples and cases 44	
	3.5	Empirical literature 50	
		Questions and problems 54	
		References 54 "	
4	Shock persistence and impulse response analysis		58
	4.1	Univariate persistence measures 59	
	4.2	Multivariate persistence 61	
	4.3	Impulse response analysis and variance decomposition 64	
	4.4	Non-orthogonal cross-effect impulse response analysis 67	
	4.5	Examples and, cases 68	
	4.6	Empirical literature 76	
		Questions and problems 79	
		References 80	
5	Modelling regime shifts: Markov switching models		82
	5.1	Markov chains 82	
	5.2	Estimation 83	
	5.3	Smoothing 86	
	5.4	Time-varying transition probabilities 88	
	5.5	Examples and cases 89	
	5.6	Empirical literature 94	

Questions and problems 96 References 97

6 Present value models and tests for rationality and market efficiency

6.1 The basic present value model audits time series characteristics 99

99

viii Detailed contents

- 6.2 The VAR representation 101
- 6.3 The present value model in logarithms with time-varying discount rates 104
- 6.4 The VAR representation for the present value model in the log-linear form 106
- 6.5 Variance decomposition 107
- 6.6 Examples and cases 108
- 6.7 Empirical literature 114 Questions and problems 116 References 116

7 State space models and the Kalman filter '

- 7.1 State space expression 118
- 7.2 Kalman filter algorithm 119
- 7.3 Time-varying coefficient models 120
- 7.4 State space models of commonly used time series processes 121
 - 7.4.1 AR(p) process 121
 - 7.4.2 ARMA(p,q) process 122
 - 7.4.3 Stochastic volatility 123
 - 7.4.4 Time-varying coefficients 124
- 7.5 Examples and cases 125
- 7.6 Empirical literature 130 Questions and problems 132 References 132

8 Frequency domain analysis of time series

- 8.1 The Fourier transform and spectra 134
- 8.2 Multivariate spectra, phases and coherence 138
- 8.3 Frequency domain representations of commonly used time series processes 139
 - 8.3.1 AR (p) process 139
 - 8.3.2 MA(q) process 140
 - 8.3.3 VAR (p) process 140
- 8.4 Test statistics for persistence and time series properties 140 8.4.1 Persistence spectra 140
 - 8.4.2 Test statistics and associated patterns and behaviour 141
- 8.5 Examples and cases 145
- 8.6 Empirical literature 149 Questions and problems 152 References 153

134

118

9 Research tools and sources of information

- 9./ Financial economics and econometrics literature on the Internet 155
- 9.2 Econometrics packages for financial and economic time series 157.
- 9.3 Learned societies and professional associations 159
- 9.4 Organisations and institutions 162
 - 9.4.1 International financial institutions and other organisations 162
 - 9.4.2 Major stock exchanges, option and futures exchanges and regulators 164 j
 - 9.4.3 Central banks 168
