<b>IV</b>	3. Comparative Listing of Indicators Used by Selected Country Authorities	<b>21</b>
<b>VI</b>	4. Statistical Issues Affecting MPIs	<b>32</b>

The following symbols have been used throughout this paper:

- ... to indicate that data are not available;
- to indicate that the figure is zero or less than half the final digit shown, or that the item does not exist;
- between years or months (for example, 1998–99 or January–June) to indicate the years or months covered, including the beginning and ending years or months;
- / between years (for example, 1998/99) to indicate a crop or fiscal (financial) year.

“Billion” means a thousand million.

Minor discrepancies between constituent figures and totals are due to rounding.

The term “country,” as used in this paper, does not in all cases refer to a territorial entity that is a state as understood by international law and practice; the term also covers some territorial entities that are not states, but for which statistical data are maintained and provided internationally on a separate and independent basis.
