Contents

List of Tables and Figures	vii
Preface	ix
Acknowledgments	xv
Introduction to the Book's Divisions	1
Part I	3
Economic Interrelationships in the Presence of Teleological Equilibria	3
Basic Core of Economic Interdependencies	3
Alternative Output Possibilities	7
Our Fine-Tuned Universe	10
Economics: Some Intricate Facets of Its Universe	11
Cosmology and Economics	16
Some Fine-Tuning Physical Universe Parameters	19
Economics and Simplistic One-Sided Observations	26
An Elementary View of Business Cycle Equilibria	28
Keynesian Economics	29
Monetarism	32
Conclusion: A Vital Facet of This Book for All Readers to Consider	35

General Equilibrium in Economics	36
Basic Properties of the Analysis	37
The Point of Optimal Economic Welfare for a Nation	42
A Special Note about Figure 2 and Non-Market Oriented Equilibrium	44
General Equilibrium: Just An Accident?	46
Cosmological Forces and Their Counterpart Economic Forces	48
A Challenge to Teleological Economic Relationships.	49
The General Economic Equilibrium Simultaneous Equation System (The Economists' Current Counterpart to the Physicists' Search for a Unified Field Theory)	51
The Grand General Equilibrium Design for our Oligopolistic-Oligopsonistic Economy	53
A Special Note on Accidents, John Nash, and Our Force Factor tR	61
Conclusion to Part I	64
Appendix 1 to Part I:	67
The Multiple Interdependencies Behind the Imaginary Demand Curve (The Economists' Counterpart to the Physicists' Imagined Electric Lines of Force)	
Appendix 2 to Part I	69
A Note for Economists and Readers Seeking Further Understanding of our Figure 2 and Part I's General Equilibrium Analysis.	
Part II	75
Market Areas, Discriminatory Spatial Prices, and Economic Interdependencies – Our Teleological Business World	75
1. The Decision Process and Entrepreneurial Returns	76
2. Discriminatory and Nondiscriminatory Spatial Prices and Outputs Under Varying Market Conditions	99
3. Nonlinearity of Delivered Price Schedules and Predatory Pricing	123
4. Reverse Dumping: A Form of Spatial Price Discrimination	130

5. Basing Point Pricing and Production Concentration	146
6. Vertical Integration of Successive Oligopolists	165
7. Spatial Price Discrimination, Competition and Locational Effects	171
Part III	191
Spatial Microeconomics Interrelationships	191
1. Impacts of Distance on Microeconomic Theory	192
2. Spatial Pricing Patterns in the United States	217
3. Observations on the Shape and Relevance of the Spatial Demand Function	240
4. A Theory of Oligopolistic Competition	255
5. Related Market Conditions and Interindustrial Mergers: Reply	270
Appendix to Part III	275
6. Needed – A Return to the Classics in Regional Economic Development	276
Special Postlude One	295
Correlative Parameters Governing Our Physical and Economic Lives – All of Which Point to Intelligent Design Not Multiple Corresponding Accidents	
Special Postlude Two	301
Is Our World Too Complicated for Equations to Capture?	
Index	303
