<i>Prologue</i>	<i>page</i> xiii
<i>Preface</i>	xvii
Part I: Background for analysis	1
Chapter 1 Introduction	3
1.1 Overview	3
1.2 On the nature of humans and bubbles	7
Macro aspects	7
Social and utility theory aspects	11
Psychology and money	13
Equilibrium aspects	14
1.3 Central features	14
1.4 On defining bubbles	15

Chapter 2	Bubble stories	27
2.1	Tulips	27
2.2	England and France, 1700s	29
	South Sea Bubble	29
	Mississippi Bubble	30
2.3	The Roaring Twenties	32
2.4	Japan 1989	34
2.5	Tech/Internet Stocks, 1987 and 2000	38
2.6	Housing, credit, and commodities, 2002-8	42
	Housing and credit	42
	Commodities	46
2.7	Conclusions	48
Chapter 3	Random walks	60
3.1	The efficient market hypothesis	61
3.2	Capital Asset Pricing Models	62
3.3	Volatility aspects	65
	Volatility and modern portfolio theory	65
	Volatility implications	66
3.4	Conclusions	69
Chapter 4	Bubble theories	77
4.1	Rational expectations	77
4.2	Behavioral features	79
	Behavioral finance I	79
	Behavioral finance II	81
	Herding and anomalies	84
4.3	Asset bubble and crash analyses	86
	Rational bubbles and crashes	88
	Other studies	91
	Testing methods	95
	Flow of funds factors	96
	Crashes	98
4.4	Power laws and chaos concepts	99
	Power laws	99
	Chaos concepts	103
4.5	Conclusions	104
Chapter 5	Framework for investigation	120
5.1	What's a bubble?	121
5.2	Credit, debt, and other commonalities	123
5.3	Entropy and information	127

<i>Contents</i>	ix
5.4 Toward a new theory	130
Characterizational issues	130
Geary's test	131
Length and number of runs	132
Launch zone conditions	133
Peak zone conditions	133
Real runs analysis	134
Transactions volume aspects	139
5.5 Conclusions	140
Part II: Empirical features and results	151
Chapter 6 Bubble basics	153
6.1 Equity risk premiums	154
Overview	154
Estimation problems	154
6.2 Preliminaries	161
Procedural approach	163
Searching for launch zones	165
6.3 Persistence measures	166
6.4 Equilibrium concepts	168
Equilibrium concepts I - quasi-equilibrium	169
Equilibrium concepts II - Walras, Benassy, and Malinvaud	170
6.5 Trading volume and variance	172
6.6 Conclusions	173
Chapter 7 Bubble dynamics	183
7.1 Setting up	183
7.2 Path-length, elasticity, and exponentiality	184
Path-lengths	185
Elasticity	187
Absolute quasi-equilibrium	189
Exponentiality	191
Finding bubbles	194
Bubble strength indicator	197
7.3 Reality checks	200
First interpretations	200
Market metrics	201
Coincidental history	202
7.4 Conclusions	205

Chapter 8 Money and credit features	215
8.1 Historical perspectives	215
Theories	215
Realities	217
8.2 Liquidity issues	218
8.3 Role of central banks	222
8.4 Conclusions	223
Chapter 9 Behavioral risk features	229
9.1 Behavioral risk premium	229
9.2 High anxiety	230
9.3 Crooked smiles	230
9.4 Transactions per unit time	233
9.5 Conclusions	237
Chapter 10 Crashes, panics, and chaos	242
10.1 Crashes and panics	242
Crashes	242
Panics and collapses	243
Business cycle aspects	246
Crash strength indicator	248
An empirical application	250
Liquidity effects	253
10.2 Thresholds and velocities	256
10.3 Chaos concepts applied	257
Overview	257
Lyapunov exponents	258
10.4 Conclusions	259
Chapter 11 Financial asset bubble theory	269
11.1 Research results	
11.2 Predictability and forecasting	
Predictability	
In reality	
Forecasting	
11.3 Knowns, unknowns, and conjectures	
Facts	
Unknowns	
Conjectures	
11.4 Further research directions	

<i>Contents</i>	xi
APPENDICES	283
A. Methodological details for finding bubbles	285
B. Observation lookup table	287
C. Damodaran annual statistics	291
<i>Glossary</i>	293
<i>References</i>	301
<i>Index</i>	339
