Econophysics and Companies

Statistical Life and Death in Complex Business Networks

Hideaki Aoyama Yoshi Fujiwara Yuichi Ikeda Hiroshi Iyetomi and Wataru Souma

> CAMBRIDGE UNIVERSITY PRESS

Contents

	List	of	figures	<i>page</i> ix	
	List	List of tables			
	Aboi	ut the a	uthors	xvi	
	Fore	Foreword			
	Pref		xxi		
	Prol	ogue		xxiii	
1	New	New insights			
	L.I	A scie	entific approach	1	
		1.1.1	Science of complex systems	3	
		1.1.2	The emergence of econophysics	3	
	1.2	Distributions and fluctuations			
	1.3	Are networks complex?			
	1.4	Chang	Change in the environment surrounding companies		
		1.4.1	Outline of the Japanese electrical and electronics and		
			automobile industries	8	
		1.4.2	The electrical and electronics industry	9	
		1.4.3	The automobile industry	10	
		1.4.4	Industrial structures and business networks	1 1	
2	Size	Size distribution			
	2.1	Prelin	ninaries	14	
		2.1.1	Flows and stocks	14	
		2.1.2	Size distribution and Pareto's law	15	
		2.1.3	Other distributions with a long tail	21	
	2.2	Distri	Distribution of personal income		
		2.2.1	Income distribution and Pareto's law	22	
	2.3	Distri	26		
		2.3.1	Size distribution of companies	26	
		2.3.2	Size of European companies	28	
		2.3.3	A caveat: sample and true distributions	30	

Contents

	2.4	Pareto's law		33	
		2.4.1	Gini and Robin Hood	35	
		2.4.2	Simulation: the inverse-function method	39	
		2.4.3	Devil's Staircase	40	
		2.4.4	Oligopoly and monopoly	42	
		2.4.5	Pareto's 80-20 rule	46	
		2.4.6	The fractal dimension	51	
	2.5	Side s	tory: 'long-tail phenomena'	54	
	2.6	(<i>i</i> — 1	and phase transition	56	
3	Cor	Company growth as fluctuations			
	3.1	Gibra	t's law and detailed balance	60	
		3.1.1	Growth-rate and Gibrat's law	61	
		3.1.2	Data for Japanese companies	64	
		3.1.3	Data for European companies	65	
		3.1.4	Gibrat revisited	67	
		3.1.5	Detailed balance	69	
		3.1.6	Relation between Pareto's and Gibrat's laws and the		
			detailed balance	72	
		3.1.7	Copulas	74	
	3.2	Digres	ssion: personal income fluctuation	78	
		3.2.1	Gibrat's law and detailed balance	78	
		3.2.2	Breakdown of the laws	80	
		3.2.3	Side story: public notice of high-tax payers, and		
			lost data in Japan	81	
	3.3	Small	and medium-sized companies	83	
		3.3.1	Large-scale data for small and medium-sized enterprises	83	
		3.3.2	Size dependence of growth	84	
	3.4	Comp	anies' bankruptcy	87	
		3.4.1	Companies'activity and bankruptcy	87	
		3.4.2	Lifetime and debt at bankruptcy	88	
	3.5	The p	roduction function and ridge theory	91	
		3.5.1	The production function	91	
		3.5.2	Ridge theory for companies' growth	92	
4	Cor	nplex b	usiness networks	99	
	4.1	Introd	uction to network science	99	
	4.2	1, 2, 3,, 6 degrees of separation		106	
	4.3	Netwo	orks in the economy	111	
		4.3.1	The shareholding network	113	
		4.3.2	The interlocking directors'network	115	
		4.3.3	The transaction network	116	
		4.3.4	The innovation network	118	

4.4	Network indices			
	4.4.1	Degree centrality >	122	
	4.4.2	Shortest path length	123	
	4.4.3	Clustering coefficient	123	
	4.4.4	The betweenness centrality of nodes	125	
	4.4.5	Cliques	125	
4.5	Statist	tical properties of network indices	126	
	4.5.1	Comparison of industries by using network		
		indices	126	
	4.5.2	Degree distribution	128	
	4.5.3	Correlations related to degree	131	
	4.5.4	The shareholding network and company size	133	
4.6	Dynar	nics of the company network	136	
	4.6.1	Change in the shareholding network	136	
	4.6.2	Change of degree distribution	139	
	4.6.3	Correlation between companies in networks	143	
An a	agent-b	ased model for companies	152	
5.1	Gibra	t's process	152	
5.2	Mode	l of the shareholding network	154	
	5.2.1	Reproduction of size distribution	155	
	5.2.2	Reproduction of degree distribution	156	
	5.2.3	Effects of nodal characteristics	157	
5.3	Balan	158		
	5.3.1	The basic agent model	159	
	5.3.2	Representative agents	163	
	5.3.3	Reduction to a multiplicative process	164	
	5.3.4	Distribution of company sizes	165	
	5.3.5	Synchronised bankruptcy	168	
5.4	Network effects on wealth distribution			
	5.4.1	Model construction	170	
	5.4.2	Network effects	170	
	5.4.3	Clustering of wealth	172	
5.5	Mode	lling the transaction network	175	
	5.5.1	Autonomous companies	175	
	5.5.2	Model of bounded rationality	180	
Pers	spective	es for practical applications	184	
6.1	Development of business strategies			
	6.1.1	Valuation of companies	184	
	6.1.2	Optimum capital structure	188	
	6.1.3	Decision-making for business entry and exit	190	
	6.1.4	Decision-making under a given economic trend	193	

Contents

6.2	Chain bankruptcy and credit risk		
	6.2.1	Transaction network	196
	6.2.2	The relationship of debtors and creditors	198
	6.2.3	The causes of bankruptcy and the link effect	199
	6.2.4	Magnitude of link effect	200
	6.2.5	The ripple effect	201
	6.2.6	Propagation of credit risk on the transaction network	206
6.3	Business model and business information		
	6.3.1	The industrial group as a business model	209
	6.3.2	Robustness of industrial groups	214
	6.3.3	Synergy in industrial groups	215
	6.3.4	Business information systems	216
