Preface xi

1 Introduction 1

2 Culture and the labour market 5
2.1 Introduction 5
2.2 Culture and economic behaviour in the labour market 6
2.3 The constitutive effects of culture 7
2.4 The regulatory effects of culture 10
2.5 Social norms and instrumental reason 14
2.6 Summary and conclusion 18

3 Approaches to the analysis of cultural effects in the labour market 20
3.1 Introduction 20
3.2 Theoretical approaches to the analysis of culture 21
a) The origins of social norms 21
b) The relationship between social norms and individual economic behaviour 25
c) Norm-guided behaviour and actual market outcomes: the role of market and political processes 29
3.3 Empirical approaches to the analysis of cultural effects 32
3.4 Summary and conclusion 34

4 A model of the relationship between norms of equity, reference level norms and skill-based wage differentials 37
4.1 Introduction 37
4.2 The stability of skill-based wage differentials 38
4.3 Efficiency wage models of the role of social norms in wage determination 39

4.4 Theoretical framework 40
4.5 Fairness as equity versus reference level norms 42
4.6 The relationship between norms, effort and skill-based wage differentials 43
4.7 The determination of wage relativities 46
4.8 Discussion of the model's predictions 48
4.9 Summary and conclusion 49

5 Community attitudes to skill-based wage differentials 50
5.1 Introduction 50
5.2 Data and approach 51
a) Measurement of attitudes to skill differentials 52
5.3 Legitimate skill-based wage differences 53
5.4 The determinants of attitudes towards skill-based wage differentials 56
5.5 International and inter-temporal differences in legitimate skill-based differentials 61
5.6 Summary and conclusion 63

6 Norms of equality and the wage structure in fourteen countries 65
6.1 Introduction 65
6.2 Background: international differences in earnings inequality 66
6.3 Data and approach 68
a) Measurement of attitudes to inequality 69
b) Inequality scales 69
c) Issues associated with the measurement of attitudes to inequality 70
6.4 International differences in attitudes to inequality 71
6.5 International differences in attitudes to inequality: a more detailed analysis 73
a) Legitimate and perceived levels of inequality 74
b) The role of demographic, political, economic and class factors in the determination of attitudes to inequality 81
c) Attitudes to inequality among the elite and ordinary workers 84
d) International comparison of attitudes to inequality 86
6.6 Summary and conclusion 87

7 Norms of equality in a changing world: evidence from six countries 90
7.1 Introduction 90
7.2 Background: changes in earnings inequality 91
7.3 Data and approach 92
7.4 Overview of attitudes to inequality 94
7.5 Changes in attitudes to inequality: a more detailed analysis 96
a) Legitimate and perceived levels of inequality 100
b) The changing role of demographic, political, economic and class factors in the determination of attitudes to inequality 103
c) Attitudes to inequality among the elite and ordinary workers 104
d) International comparison of changes in attitudes to inequality 106
7.6 Summary and conclusion 107

8 Norms of need and minimum wages 110
8.1 Introduction 110
8.2 Theoretical background 111
a) Testing for the existence of norms of need 114
8.3 Data on community attitudes to minimum wage controls 115
8.4 Approach to the analysis of variations in attitudes to the legitimacy of minimum wage controls 116
8.5 Evidence on the determinants of attitudes to minimum wage controls 120
8.6 Summary and conclusion 125
Appendix 8.1 Frequency distribution of attitudes to minimum wage controls 127

9 Summary and conclusion 130
