Water Supply Network  
District Metering  
Theory and Case Study

**411** Springer

# Contents

<b>1 Water Leakage Management</b>	<b>1</b>
1.1 Loss control and localization	3
1.2 Pressure management	7
<b>2 Water District Metering policy and practice</b>	<b>11</b>
2.1 Physical and Virtual District Metering	13
2.2 District Metering design criteria	16
2.3 Experiences in the world	19
<b>3 Design Support Methodology</b>	<b>25</b>
3.1 Water District Metering Design	25
3.2 Water Pressure Management Design	36
<b>4 Case study: Monterusciello network</b>	<b>39</b>
4.1 Pilot site description	40
4.2 The hydraulic model	43
4.3 District Metering design	46
4.4 Measurement devices	53
4.5 Remote Control System	58
4.6 DMA Pressure Management	67
4.7 Estimation of cost and savings with pressure control	78
4.8 Conclusion	84
Bibliography	87
