

Perspectives for European e-learning businesses

Markets, technologies and strategies

Joachim Hasebrook
Werner Herrmann
Dirk Rudolph

Cedefop Reference series; 47

Luxembourg: Office for Official Publications of the European Communities, 2003

Table of contents

Introduction	9
1. European policies and perspectives	15
1.1. E-Europe 2002 and e-Europe 2005 initiatives	15
1.1.1. Benchmarking	16
1.2. E-learning initiative	17
1.2.1. Infrastructures and equipment	18
1.2.2. Training at all levels	21
1.3. E-learning support activities of the European Centre for the Development of Vocational Training (Cedefop)	27
2. European e-learning: introduction and review	29
2.1. Key enabling technologies	31
2.2. Key e-learning markets	35
2.3. Key trends in global e-learning	39
3. State of the global education economy	43
3.1. Main driving forces of global e-learning markets	43
3.2. E-learning for K-12	45
3.2.1. The technology shortage in K-12	47
3.3. E-learning for higher education	48
3.3.1. The post-secondary e-learning market	50
3.3.2. Case study: Smarthinking.com	52
3.4. E-learning for continuing education	53
3.4.1. Case study: Efiport.de	54
3.5. E-learning for corporate training worldwide	55
3.6. E-learning for corporate training in Europe	57
3.7. E-learning for non-traditional market segments	62
4. E-learning and its economics	64
4.1. Knowledge, technology, strategy	64
4.2. Web-based learning: e-learning	67
4.3. Learning organisation and organisational learning	68
4.4. Knowledge and abilities	71
4.5. Psychological factors of success	75
4.6. Economics of e-learning	78
4.6.1. Learning and cost efficacy	79
4.6.2. The process of controlling	81
4.6.3. Calculating success	84

4.7.	Recent investment activities in the education economy	86
4.8.	Realistic optimism versus blind euphoria	89
4.9.	Lessons from e-learning failures	92
4.9.1.	Case study: Hungry Minds	92
4.9.2.	Case studies: Tutor.com and Tutornet.com	93
4.10.	The 'lemon problem' of educational portals	94
4.11.	The European e-learning market after the dot.com crash	95
5.	Applications of e-learning	99
5.1.	Potentials of e-learning	99
5.2.	Potentials of multimedia	101
5.3.	The myths of multimedia learning	103
5.3.1.	Myth 1: more media leads to a better understanding	103
5.3.2.	Myth 2: hypertexts help to convey structural knowledge	104
5.3.3.	Myth 3: web is easy, print is tough	106
5.4.	Effects of specific media	107
5.4.1.	Case study: digital educational business TV	108
5.5.	Adaptive multimedia	110
5.5.1.	Case study: expert systems for vocational guidance	110
5.6.	Cooperative learning	113
5.6.1.	Case study: cooperative learning in a European banking institute	114
5.6.2.	Comparison of WBT and seminar	116
5.6.3.	Factors of cooperative online learning	117
5.7.	E-learning for economic development	120
5.8.	Public and private expenditures for education	122
5.9.	E-learning in developing countries	124
5.10.	Developing regions: Asia and Africa	127
5.10.1.	Company profiles and alliances from Asian e-learning	128
5.10.2.	Internet use and e-learning in Africa	129
5.11.	Advantages of e-learning for education in developing countries	132
5.12.	Exploiting free resources on the web	134
6.	Enabling technologies	138
6.1.	Lack of e-learning standards	140
6.2.	The XML standard	141
6.3.	LANs: wired and wireless	142
6.3.1.	Wireless LAN security	143
6.4.	Virtual private networks	143
6.5.	Laptops, PDAs and handheld PCs	144
6.5.1.	M-learning	145
6.6.	Network computers	146
6.6.1.	Case study: Sun Microsystems' network computing for Amsterdam's primary schools	146

6.7. E-books	147
6.8. Artificial intelligence, voice recognition, and speech-to-text	148
6.8.1. Adaptive systems	150
6.9. Search engines and ontologies	151
6.10. Streaming video	152
6.11. Copyright protection through digital rights management	152
6.11.1. Digital rights management (DRM)	153
6.11.2. DRM solutions	153
6.11.3. DRM security	154
6.11.4. DRM standards	154
6.11.5. Case study: Xerox' ContentGuard DRM solution	155
6.12. Web-based multimedia presentations	155
6.12.1. CD-ROM-based interactive	155
6.12.2. Case study: reusable artificial intelligence tutoring system shell (RAITSS)	156
6.13. Collaborative computing tools and groupware	157
6.14. Simulations	158
6.14.1. Case study: Motorola, Inc.	159
7. E-learning market strategies	160
7.1. From education to investor relations	160
7.2. Virtual communities for business relationships	161
7.3. E-learning technology for new markets	162
7.4. E-learning portals for e-learning content	163
7.5. Using e-learning to scale education products to the global market	164
7.6. Demos, samples and free courseware	166
7.7. Customised and profitable education	167
7.8. Content over technology	168
7.9. Versions for optimal profits and market growth	169
7.10. Opportunities in continuing education	171
7.11. Opportunities serving non-traditional students	172
7.12. Technology plus quality content	175
7.13. E-learning vendors	176
7.13.1. K-12	178
7.13.2. Post secondary	181
7.13.3. Corporate training	184
7.13.4. Lifelong learning	190
8. References	194
9. Acknowledgements	204
10. Abbreviations	205
11. About the authors	206
