Contents

1	Introduction	3
2	Historical Trends	7
2.1	Early applications	9
3	Cooperative Game Theory Developments in Water Resources	13
3.1	Non-GT cost allocation schemes used in GT studies	15
3.2	Game theory cost allocation solutions	16
3.3	Developments in cooperative game theory solutions	21
4	Non-Cooperative Game Theory and Other Related Developments in Water Resources	25
4.1	Games in strategic form	25
4.2	Bankruptcy games	27
5	Reviews/Surveys	29
6	Sectoral Applications	33
6.1	Urban water supply and sanitation	33
6.2	Irrigation	37
6.3	Hydropower generation and reservoir operation	40
6.4	Water pollution control	43

6.5	Groundwater	49
6.6	Allocations in water resources	56
6.7	International/transboundary water	62
6.8	Water conflict and negotiation	72
6.9	Water and the environment	75
6.10	Watershed management and regulation/ river basin planning	77
6.11	Multipurpose water projects	79
7	Conclusions and Further Needs in the Field of Water	83
	Acknowledgements	87
	References	89
	Annex 1. Data Collection and Classification Methodology	111
	Annex 2: Game Theory Applications that were not Included in the Review	117
