About the Authors xvii

Preface xix

PART ONE
Introduction

CHAPTER 1 **Microeconomics** 1

Introduction 1
Optimal Production Decisions 2
Pricing Policy 3
Efficient Allocation of a Society's Resources 3
Public Policy Concerning Market Structure 5
Microeconomics: Problem Solving and Science 6
Human Wants and Resources 7
Technology 8
Tasks Performed by an Economic System 9
Our Mixed Capitalist System 10
The Price System and Microeconomics 12
Example 1.1: Hungary's Rough Transition toward the Price System 13
Model-Building and the Role of Models 14
Evaluating a Model 15
SUMMARY 16 QUESTIONS/PROBLEMS 17

CHAPTER 2 **Demand and Supply** 20

Introduction 20
Markets 20
The Demand Side of the Market 21
Example 2.1: Coffee Bars Invade Manhattan 26
The Supply Side of the Market 31
Example 2.2: The Price of Cotton: Highest since the Civil War 33

Determinants of Price 36
Price Floors and Ceilings 41
Example 2.3: Rent Control, California-Style: Mobile-Home Owners versus Park Owners 43
SUMMARY 45 QUESTIONS/PROBLEMS 46

PART TWO
Consumer Behavior and Market Demand

CHAPTER 3 **Tastes and Preferences of the Consumer** 51
Introduction 51
Consumer Preferences 52
Indifference Curves 53
The Concept of Utility 56
The Marginal Rate of Substitution 57
Example 3.1: Deciphering the Shapes of Indifference Curves 59
The Budget Line 61
Equilibrium of the Consumer 64
Example 3.2: Consumer Choice and the New Phone Rates 66
Corner Solutions 68
Corner Solutions and Diminishing Marginal Rates of Substitution 69
Revealed Preference and the Measurement of Indifference Curves 71
Determinants of Consumer Tastes and Preferences 73
Example 3.3: The Food Stamp Program 74
Budget Allocation by New York State: An Application 75
SUMMARY 77 QUESTIONS/PROBLEMS 78
Appendix Ordinal and Cardinal Utility 81

CHAPTER 4 **Consumer Behavior and Individual Demand** 87
Introduction 87
Effects of Changes in Consumer Money Income 88
Example 4.1: Expenditures and Income 94
Effects of Changes in Commodity Prices 95
Substition and Income Effects 98
Example 4.2: Energy Tax and Rebate Proposal 103
Consumer Surplus 104
Indexes of the Cost of Living 112
Example 4.3: Household Response to Higher Energy Prices and Their Associated Losses in Consumer Surplus 113
Example 4.4: Calculating a Cost-of-Living Index 119
SUMMARY 120 QUESTIONS/PROBLEMS 121

CHAPTER 5 **Derivation of the Market Demand Curve** 126
Introduction 126
The Price Elasticity of Demand 128
Example 5.1: Residential Demand for Water 129

The Income Elasticity of Demand 130
The Cross-Price Elasticity of Demand 133
Example 5.2: Fur Sales Take a Hit 135
Shifting Demand Curves 136
The Seller's Side of the Market and Marginal Revenue 137
Example 5.3: Demand and the Distribution of Aggregate Income 138
Industry and Firm Demand Curves 142
The Measurement of Demand Curves 144
Example 5.4: Attracting Quality Students with Partial Scholarships 147
SUMMARY 148 QUESTIONS/PROBLEMS 149

CHAPTER 6 **Choices Involving Risk** 153

Introduction 153
Probability 153
Expected Monetary Value 155
Investing in an Oil Venture: A Case Study 156
The Expected Value of Perfect Information 157
How Much Are Accurate Weather Forecasts Worth to Raisin Producers? A Case Study 158
The Expected Value of Partial Information 159
Should a Person Maximize Expected Monetary Value? 161
Maximizing Expected Utility 162
Should the Company Really Invest in the Oil Venture? 163
Preferences Regarding Risk 164
Example 6.1: Hospitals and the Health Insurance Bind 167
Why People Buy Insurance 169
How Much Insurance Should an Individual Buy? 170
Example 6.2: Are Two Consultants Better Than One? 171
Revisiting the Value of Information When People Are Averse to Risk 176
Behavior in the Face of Risk 178
The Precautionary Principle 179
Example 6.3: The Cost of Exposure Limits That Have Been Set by Applying the Precautionary Principle 181
SUMMARY 182 QUESTIONS/PROBLEMS 183

CROSS-CHAPTER CASE I PART TWO Demand for Airline Travel and the Pricing of Tickets 186

PART THREE
The Firm: Its Technology and Costs 191

CHAPTER 7 **The Firm and Its Technology** 191

Introduction 191
Firm Owners and Managers: A Principal-Agent Problem 193
Technology and Inputs 195
The Short Run and the Long Run 195
Example 7.1: Is a CEO Really Worth Half a Billion Dollars per Year? 196

The Production Function 198
The Law of Diminishing Marginal Returns and the Geometry of Average and Marginal Product Curves 202
The Production Function: Two Variable Inputs 204
Isoquants 205
Substitution among Inputs 207
The Long Run and Returns to Scale 209
The Measurement of Production Functions 211
Example 7.2: Should Two Kansas Wheat Farms Merge? 213
SUMMARY 216 QUESTIONS/PROBLEMS 217

CHAPTER 8 **Optimal Input Combination and Cost Functions** 220

Introduction 220
Optimal Combination of Inputs 221
Production of Wheat: An Application 225
Costs 226
Example 8.1: Rice-Milling in Indonesia 228
Pollution Control: An Application 229
Social Costs versus Private Costs 231
Explicit Costs versus Implicit Costs 231
Proper Comparison of Alternatives 231
Cost Functions in the Short Run 232
Example 8.2: Least-Cost Reductions of Carbon Emissions 241
Cost Functions in the Long Run 243
Economies of Scope 250
The Measurement of Cost Functions 250
Example 8.3: The Shape of the Short-Run Marginal Cost Curve 255
SUMMARY 256 QUESTIONS/PROBLEMS 257

CROSS-CHAPTER CASE | PART THREE Production and Cost Theory at Work: The Cost of Climate Policy 261

PART FOUR
Market Structure, Price, and Output

CHAPTER 9 **Perfect Competition** 269

Introduction 269
Perfect Competition 270
Price Determination in the Short Run 271
Example 9.1: Auctions and Experimental Economics 278
Price Determination in the Long Run 280
Example 9.2: What Would Be the Effects of National Dental Insurance? 284

Example 9.3: The Market for Sulfur Emissions Permits 291
Agricultural Prices and Output: An Application 293
SUMMARY 295 QUESTIONS/PROBLEMS 295

CHAPTER 10 Applying the Competitive Model 300

Introduction 300
Producer Surplus and Total Surplus 300
Perfect Competition and the Maximization of Total Surplus 303
The Effect of a Price Ceiling 305
Example 10.1: A Price Ceiling for Gasoline 306
New York Apartments: A Case Study 308
The Effect of a Price Floor 310
Agricultural Price Supports: Another Case Study 311
Protecting Domestic Producers: Tariffs and Quotas 312
Restrictions on U.S. Imports of Japanese Autos: A Third Case Study 314
Example 10.2: Gains and Losses from Steel Import Quotas 316
Effects on Price of an Excise Tax 318
Deadweight Loss from an Excise Tax 320
Example 10.3: Should the Gasoline Tax Be Raised? 322
Postcript 323
SUMMARY 324 QUESTIONS/PROBLEMS 324

CHAPTER 11 Monopoly 329

Introduction 329
Short-Run Equilibrium Price and Output 333
Long-Run Equilibrium Price and Output 338
Example 11.1: Playing the Slots at Foxwoods 339
Multiplant Monopoly 341
A Comparison of Monopoly with Perfect Competition 343
Monopoly Power 345
Price Discrimination 346
Example 11.2: The Microsoft Finding and the Value of Startup Software Companies 347
Two-Part Tariffs and Tying 353
Example 11.3: Two-Part Tariffs in the National Football League 354
Bundling: Another Pricing Technique 356
Public Regulation of Monopoly 358
Case Studies 360
SUMMARY 362 QUESTIONS/PROBLEMS 364

CHAPTER 12 Monopolistic Competition and Oligopoly 369

Introduction 369
Monopolistic Competition 369

Equilibrium Price and Output in the Short and Long Runs 371
Excess Capacity and Product Diversity 373
Markup Pricing 374
Comparisons with Perfect Competition and Monopoly 376
Advertising Expenditures: A Simple Model 377
Optimal Advertising Expenditures: A Graphical Analysis 379
The Social Value of Advertising 380
Example 12.1: Advertising, Spectacles, and the FTC 382
Oligopoly 383
The Nash Equilibrium 384
An Example of a Nash Equilibrium: The Cournot Model 385
The Stackelberg Model 389
The Bertrand Model 392
Collusion and Cartels 393
Example 12.2: The Retail Market for Tires 397
The Instability of Cartels 398
The OPEC Oil Cartel: An Application 399
Example 12.3: The International Supply of Crude Oil 400
Price Leadership 402
Entry and Contestable Markets 404
SUMMARY 406 QUESTIONS/PROBLEMS 407

CHAPTER 13 Game Theory and Strategic Behavior 410

Introduction 410
The Theory of Games 411
Game Trees 412
Nash Equilibria: Further Discussion 414
Maximin Strategies 416
Example 13.1: Should Amherst Buy All Its Steel from Duquesne? 417
The Prisoners' Dilemma 418
Cheating on a Cartel Agreement 420
The Repeated Prisoners' Dilemma and the Tit-for-Tat Strategy 421
Strategic Moves 423
Example 13.2: The Role of Incentives and Contracts 424
Threats: Empty and Credible 426
Deterrence of Entry 428
Limit Pricing 430
First-Mover Advantages 430
Example 13.3: How Governments Can Tilt the Outcome of Oligopoly 432
Capacity Expansion and Preemption 434
Nonprice Competition 435
The Effects of Oligopoly 436
SUMMARY 437 QUESTIONS/PROBLEMS 438

CROSS-CHAPTER CASE | PART FOUR Shaking the Tree of Global Telecommunications Markets 442

PART FIVE
Markets for Inputs

CHAPTER 14 **Price and Employment of Inputs** 445

Introduction 445
Profit Maximization and Input Employment 446
The Firm's Demand Curve: The Case of One Variable Input 448
The Firm's Demand Curve: The Case of Several Variable Inputs 450
The Market Demand Curve 452
Determinants of the Price Elasticity of Demand for an Input 453
The Market Supply Curve 455
Example 14.1: Income and Substitution Effects in the Supply of Labor 458
Equilibrium Price and Employment of an Input 459
Rent 462
Imperfectly Competitive Output Markets 464
Example 14.2: Does Immigration Benefit the United States? 467
Monopsony 468
Example 14.3: Effects of Increasing the Minimum Wage 474
SUMMARY 480 QUESTIONS/PROBLEMS 481

CHAPTER 15 **Investment Decisions** 486

Introduction 486
Intertemporal Choice: Consumption and Saving 487
Interest Rates and Investment 490
The Equilibrium Level of Interest Rates 492
Present Value 493
Valuing a Stream of Payments 495
The Net Present Value Rule for Investment Decisions 497
Example 15.1: Neil Simon Goes Off-Broadway 499
The Investment Decision: An Example 500
Real versus Nominal Interest Rates 502
Risk and Diversification 503
Diversifiable and Nondiversifiable Risk 504
The Capital-Asset Pricing Model 506
Including Risk in Net Present Value Calculations: Some Examples 507
The Stock Market: The Efficient Markets Hypothesis 508
Internal Rates of Return and Bond Yields 509
How Much Is a Bond Worth? 511
Example 15.2: Game Theory in Action: Investment as a Strategic Decision 513
Pricing Exhaustible Resources 514
Example 15.3: Game Theory in Action: A Tit-for-Tat Time Horizon 518
SUMMARY 520 QUESTIONS/PROBLEMS 521

CROSS-CHAPTER CASE | PART FIVE Sex Discrimination and Comparable Worth 526

PART SIX
Information, Efficiency, and Government

CHAPTER 16 **General Equilibrium Analysis and Resource Allocation** 531

Introduction 531
Partial Equilibrium Analysis versus General Equilibrium Analysis 532
The Existence of General Equilibrium 533
A Simple Model of General Equilibrium 534
Example 16.1: Deregulation of Railroads and Trucks 538
Resource Allocation and the Edgeworth Box Diagram 539
Exchange 542
Production 544
Example 16.2: Allocation of Fissionable Material 546
The Production Possibilities Curve 547
Production and Exchange 548
SUMMARY 552 QUESTIONS/PROBLEMS 553

CHAPTER 17 **The Promotion of Economic Efficiency** 556

Introduction 556
A Definition of Economic Efficiency 557
Marginal Conditions for Economic Efficiency 558
The Utility Possibilities Curve 561
Equity Considerations 563
Example 17.1: John Rawls on Social Justice 564
Perfect Competition and Economic Efficiency 565
External Economies and Diseconomies 567
Example 17.2: External Diseconomies on the Highways 571
Increasing Returns, Public Goods, and Imperfect Information 573
Static Efficiency and Economic Progress 574
Example 17.3: Fairness, Equity, and Efficiency 577
SUMMARY 579 QUESTIONS/PROBLEMS 579
Appendix Economic Benefits from Free Trade 582

CHAPTER 18 **The Prevalence of Asymmetric Information** 585

Introduction 585
Used Cars: An Example of Asymmetric Information 586
A Graphical Analysis of the Market for Used Cars 586
Example 18.1: Asymmetric Information in the Fixture Market 589
Asymmetric Information and Market Failure 589
Adverse Selection: A Problem of Hidden Information 590
Consequences of Adverse Selection 591
Market Signaling 593
Example 18.2: Dawat, McDonald's, and the Importance of Reputation 594

Moral Hazard: A Problem of Hidden Action 596
Principal-Agent Problems 598
Example 18.3: Game Theory in Action: Superior Knowledge as a Deterrent to Entry 601
Efficiency Wage Theory 603
SUMMARY 605 QUESTIONS/PROBLEMS 606

CHAPTER 19 **Public Goods, Externalities, and the Role of Government** 609

Introduction 609
Characteristics of a Public Good 609
Efficient Output of a Public Good 610
Provision of Public Goods 612
Example 19.1: The Effect of Voting Rules 614
Externalities: The Case of Environmental Pollution 615
Example 19.2: Game Theory in Action: The Tragedy of the Commons from a Strategic Perspective 620
Property Rights and Coase's Theorem 623
Government Intervention and Benefit-Cost Analysis 624
Example 19.3: Economic Efficiency and Global Policy to Combat Climate Change 628
Anemia Reduction in Indonesia, Kenya, and Mexico: An Application 630
Limitations of Government Effectiveness 631
SUMMARY 634 QUESTIONS/PROBLEMS 635

CROSS-CHAPTER CASE | PART SIX The FCC and the "Biggest Auction in the Known Universe" 639

Glossary of Terms A1

Brief Answers to Odd Numbered Questions A13

Index A33
