Preface.	xi
------------------	----

PART I

The Economic Value of Water: Concepts and Theory

1. Water, Economics, and the Nature of Water Policy Issues.	3
1.1 Why Is Nonmarket Valuation Needed?.	4
1.2 The Role of Economic Valuation in Water Management.	10
1.3 The Nature of Economics and the Evaluation of Public Policies.	16
2. Conceptual Framework and Special Problems in Valuing Water . . .	23
2.1 Economic Value Versus Other Concepts of Value.	23
2.2 Economic Criteria for Resource Allocation and Valuation.	25
2.3 Economic Valuation in the Absence of Market Prices.	30
2.4 What Types of Water Values Can Be Identified?—	36
2.5 Looking Ahead: An Overview and Taxonomy of Water Valuation Methods.	42
3. Methods for Valuing Producers' Uses of Water.	50
3.1 Some Preliminaries.	51
3.2 Welfare Concepts for Valuing Water in Producers' Good Uses.	53
3.3 Applied Valuation of Producers' Water Uses with Deductive Techniques.	57
3.4 The Basic Residual Method 1: The Product Exhaustion Theorem.	58
3.5 The Basic Residual Method 2: The Theory of Economic Rents.	62
3.6 Practical Issues in Implementing a Residual Analysis.	68
3.7 The Special Problem of Owned Inputs in Residual Imputations.	73
3.8 Extensions: The Change in Net Rents Method and Mathematical Programming Models.	83

3.9	Misconceived Water Valuation Methods with Versions of the Residual Method.	87
3.10	Concluding Evaluation of the Residual Method.	99
3.11	The Alternative Cost Method and Other Less-Used Deductive Techniques.	102
3.12	Valuing Producers' Water Using Inductive Techniques.	105
3.13	Concluding Comments on Valuation in Producers' Uses.	115
4.	Applied Methods of Valuation of Water as Environmental Public Goods.	118
4.1	Revealed Preference Methods for Environmental Valuation.	119
4.2	Travel Cost Methods.	120
4.3	The Hedonic Property Value Method Once Again.	129
4.4	Defensive Behavior and Damage Cost Methods.	133
4.5	Expressed Preference Methods.	134
4.6	The Contingent Valuation Method.	135
4.7	Choice Modeling.	148
4.8	Concluding Comments on Expressed Preference Methods.	151
4.9	Benefit Transfer.	152
4.10	General Conclusions Regarding Valuation of Water-Related Public Goods.	156

PART II

Applications of Valuation Methods

5.	Valuation of Water Used in Irrigated Crop Production.	161
5.1	Background.	161
5.2	Recapitulation of the Conceptual Framework for Valuing Irrigation Water.	166
5.3	The Water-Crop Production Function.	167
5.4	Inductive Techniques for Valuing Irrigation Water.	172
5.5	Other Inductive Methods Using Primary and Secondary Data for Valuing Irrigation Water.	188
5.6	Deductive Techniques for Valuing Irrigation Water: The Residual Method and Variations.	193
5.7	The Alternative Cost Method Applied to Valuing Irrigation Water . . .	213
5.8	Measuring Benefits of Improved Quality of Irrigation Water.	214
5.9	Concluding Remarks on Valuation of Irrigation Water.	219
6.	Valuing Water Used by Industry.	222
6.1	Industrial Water Use.	223
6.2	Inductive Techniques for Valuing Water in Offstream Industrial Uses.	225
6.3	Deductive Techniques for Valuing Water in Offstream Industrial Uses.	230
6.4	Valuing Water in Instream Industrial Uses: Hydropower.	234

6.5 Valuing Water in Instream Industrial Uses: Waterborne Transportation	241
6.6 Concluding Remarks on Valuation of Industrial Water.	244
7. Valuing Water in Municipal Uses	246
7.1 Demand and Value of Water in Residential Uses: Overview.	247
7.2 Econometric Methods for Measuring At-Site Residential Water Demand.	249
7.3 Other Methods for Estimating At-Site Residential Water Demand	255
7.4 Finding an At-Source Value of Residential Water from an At-Site Demand Function.	256
7.5 Measuring Benefits of Residential Water Supply Reliability.	262
7.6 Valuing Residential Water in Developing Countries.	264
7.7 Valuing Water in Commercial Uses.	268
7.8 Concluding Remarks.	269
8. Valuation of Selected Water-Related Public Goods.	271
8.1 Valuing Instream Flows and Reservoir Levels for Outdoor Recreation.	271
8.2 Valuation of Water Quality Improvements.	276
8.3 Measuring Benefits of Flood Risk Reduction.	290
9. Conclusions.	302
References.	305
Glossary.	327
Approximate Conversion Factors: Water Volumes and Flows.	337
Index.	339
About the Author.	357
