INTRODUCTION

1 From Social Protection to Social Integration: A Glance at the Major Social Issues in the Advanced Countries	1
1 Social Protection and Social Integration	1
1.1 Social protection versus social integration?	2
1.2 The Welfare State and social integration	3
1.3 Social integration from industrial to post-industrial society	4
1.4 From the present shortcomings to a new type of social integration	5
2 The Contextual Challenges	5
2.1 The relationship between the active and non-active population: a mystification	5
2.2 The impact of the technological revolution	7
2.3 Poverty and marginalization	9
3 The Possible Perspective Issues	10
3.1 The de-institutionalization of social roles	10
3.2 De-scholarization and 'permanent education'	12
3.3 Cutting down working time	13
3.4 Towards guaranteed income	14
4 Employment and Activities Planning or the Crisis of the Welfare System	15
5 Summarizing the Transition Towards Social Integration and Planning	16
6 Brief Scheme Indicating How the Subject Will Be Treated, or Schedule of This Book	20

PART I CRITICAL ANALYSIS OF THE SOCIAL CHANGE 23

2 Structural Change: A Reappraisal of the Various Approaches	25
1 What is Meant by 'Structural Change' in the Contemporary Economy?	25

2	The Technological Approach	27
2.1	The historians of technology	27
2.2	Technology: is it exogenous or endogenous to economic progress?	28
3	The Economic Approach	29
3.1	The internal dynamic of economic progress	29
3.2	The Schumpeterian objection	31
3.3	The Rostow objections to the theories of economic development	37
3.4	Sylos Labini's answers	41
3.5	Beyond the economics of technological change	45
4	The Historical-Institutional Approach	50
4.1	The Marxian approach	51
4.2	The Marxian ambiguities	52
4.3	The 'managerialist' transformation	55
4.4	Persistent unilaterality of the 'Marxist' explanation	59
5	The Sociological Approach	61
5.1	Does a sociological approach exist?	61
5.2	The political factor in Weberian tradition	63
5.3	The technological roots of planning rationality	64
5.4	Re-evaluation of the political factor	65
3	Structural Change: Towards a Convergence of Various Approaches	69
1	Convergence	69
1.1	Convergence as the historical synthesis of change	69
1.2	A comprehensive vision of social transformation	71
2	The Crisis of Traditional Disciplinary Approaches	71
3	The Qualitative Change	78
3.1	The importance of qualitative change	78
3.2	Value, quality, evaluation and social choice	80
4	The Emergence of a Programmatic Approach to Change	82
4	The Change in the Structure of Consumption and the 'Tertiarization' Process	84
1	Growth and Industrialization as the Development of Mass Production	84
1.1	The interaction between technologies and final consumption	84
1.2	The first phase of industrialization: from non-mass consumption to mass consumption	85
1.3	Industrialization, productivity, development, redistribution	86

2	The Most Recent Changes in the Structure of Final Consumer Demand and in the Industrialization Model	87
3	The Historical Model of Mass Production and the Policies Implied (Fordism and Keynesism)	90
3.1	Adaptation of mass production to mass consumption	90
3.2	The discount of future productivity	91
3.3	The negative conditions for a productivity discount	91
3.4	The 'margins' of productivity increase	92
4	The 'Tetiarization' Process	93
4.1	The saturation of material goods and the growing demand for immaterial goods	93
4.2	The need for the differentiation of consumption	94
4.3	'New' demand and development	94
4.4	'Over-industrialization'	94
4.5	Towards a new model of society	95
5	The Change in the Structure of Production	97
1	Visions of the Crisis in Industrial Production	97
1.1	Various ways of recording the crisis	97
1.2	The crisis as 'dependency effect'	98
1.3	The industrial 'diffusion'	101
1.4	The 'theory' of industrial dualism	101
1.5	The crisis of mass production and the 're-emergence of the craft paradigm'	103
1.6	Beyond industrial diffusion	104
1.7	The 'decline' of global productivity	105
1.8	The explosion of the demand for public services	105
1.9	The development of the non-mercantile exchange	106
2	The Productive Dichotomy of the Economy	107
2.1	The increasing dichotomy between high-productivity and low-productivity sectors	107
2.2	The employment and incomes features of structural change	108
3	Changes Induced in the Concept of Development, Welfare and Employment	109
3.1	The idea of a 'steady state' economy	109
3.2	A different way of measuring welfare	111
3.3	A different way of conceiving and measuring employment	113
3.4	Policy implications of the new way to conceive employment	117

6	The Change in the Labour Market	119
1	The Basic Divergence Between the Traditional Labour Supply and Demand	120
1.1	The demand for 'quality-labour'	120
1.2	The personalization of labour and the new entrepreneurship	120
2	The New Behaviour of Labour Supply	122
3	The Case of Unemployment: Persistence of Inadequate Models of Interpretation	124
3.1	An optimal level of disaggregation in modelling	124
3.2	Past and future in modelling unemployment	127
3.3	Past and future in designing employment policies	128
4	Towards a New, Specific Labour-Market Policy	130
7	The Service Society versus the Industrial Society	133
1	The Substitution of Labour: A Constant Pattern of the Industrial Society Model	133
2	Human Labour at Zero Productivity in the Service Society Model	134
3	Economic Implications of the Change of Model	135
3.1	Performance indicators	135
3.2	The role of 'investment'	135
3.3	Basic economic motivations	136
3.4	The motivation and role of saving	136
4	Employment Typology	138
5	'Industrial Relations' Typology	140
6	The Role of the State	141
7	The Emergence of a 'Third' Sector	144
8	The Process of Redistribution in the Two Models of Society	147
1	The Redistribution of Labour and Income	147
1.1	The continuous dislocation of labour in industrial society	147
1.2	A misunderstanding about the usefulness of 'non-productivistic' sectors	148
1.3	The weight of the two sectors and differential characteristics of the distributive process in the two models	149
1.4	The characteristics of the redistributive process in the evolution of the industrial society model	150
1.5	The role of inflation in the redistributive process in the industrial society model	151

1.6	The role of inflation in the redistributive process in the service society model	152
1.7	Models of society and theories of capital	153
2	Differential Characteristics of the Distributive Processes in the Two Models of Society	154
2.1	Further analysis of the transitional relationship of productivity-prices from the industrial society to the service society model	155
2.2	Factors and circumstances which may limit the inflationary effect of productivity in the industrial society model	157
2.3	Inflation and 'unemployment-by-productivity'	159
9	The Expansion and Decline of Public Services	161
1	An Evolution in the Role and Concept of Public Services	161
2	The Meaning and Effects of the Expansion of Public Services	163
3	The Crisis Factors of the Public Sectors and Services	167
3.1	The financial limits of the state	168
3.2	Lack of efficiency, effectiveness and performance measure	170
3.3	Disaffection and dislike	172
4	Concluding Remarks: Towards a Reform of the Welfare State	172
PART II CRITICAL ANALYSIS OF THE MANAGEMENT PROBLEMS OF THE CHANGE		175
10	Beyond the Welfare State	177
1	'Welfare State' and 'Welfare Society'	177
1.1	A 'logical' analysis of the Welfare State	177
1.2	On equilibrium, disequilibrium, 'market' and the organizational society	178
2	Managing the 'Crisis' of the Welfare State	179
3	The Appropriate Reorganization of the Welfare State: Societal Planning	181
11	Beyond Capitalism?	184
1	Social Democracy, the Political Left in General, and Planning	184
2	'Alternatives' to Capitalism? A False Problem	185

3	Planning as an Essential Condition for the Passage to a 'Welfare Society'	187
3.1	On the so-called 'failures' of planning	187
3.2	The fundamental 'operations' of planning: income and labour mobility planning	189
3.3	The plan as a decision framework of reference and as a process	191
4	Social Bargaining, or Negotiation, as a Premise for Planning Efficiency	192
4.1	The traditional planning operators	192
4.2	The motivations of the social operators	193
5	The Crisis of 'Entrepreneurship'	195
5.1	The crisis of entrepreneurship as a motivational crisis of the operators	195
5.2	A new type of entrepreneurship: 'the Private Collective'	197
6	Towards the Institutionalization of the 'Independent' Sector	199
6.1	The relationship between the operational sectors	200
6.2	The 'third sector' and the general economic system	201
6.3	The 'third sector' and the welfare society	202
12	A New Social Model: The Associative Economy	204
1	The Emerging Forms of the Third Sector	204
1.1	The third sector in the USA	204
1.2	The third sector in Europe	205
1.3	A comparative vision of the third sector	209
2	The Expansion of the Third Sector	210
2.1	Current statistics: employment, expenditure, activity fields, financing	211
2.2	The substitution effect	212
3	Some Interpretations of the Third Sector	216
3.1	State failure theories	216
3.2	Market failure theories	216
3.3	Non-profit economy and ideology	218
3.4	'Third party government' hypothesis	219
3.5	'Functional dilettantism' hypothesis	220
4	A Structural Approach: The Third Sector in the Post-Industrial Economy	220
5	Further Guidelines for the Third Sector	222
5.1	The need for a better operational definition of the third sector	222
5.2	For a new institutional regulation of the associative economy	225

6	The Financing of the Associative Sector	226
6.1	Possible forms of public financing of the associative sector	227
6.2	New forms of 'private' and at the same time 'collective' financing of the associative sector and its statistical recording	228
6.3	Trade-union funds for investment	230
7	The Role of the Trade Unions in the Management of the Labour Market and of the New Forms of Production and Employment	232
8	Promotion of the Associative Sector in the Framework of a Comprehensive Plan of Development	233
13	New Policies and Instruments	235
1	New Tasks for the Public Sector	235
2	The Financial Limits of the State	235
2.1	General alternatives to public intervention	237
2.2	New criteria for managing public intervention	238
3	The Future of Strategic Planning	241
3.1	The new 'regulatory' role of the public sector	241
3.2	Central planning and direct intervention	242
3.3	Articulated or 'systemic' planning	244
4	Planning-Oriented Collective Bargaining	245
5	Planning-Oriented Social Accounting	247
6	Planning and the New Unionism	248
7	Planning and the Organized Consumer Movement	250
8	The 'Democratic' Meaning of Strategic Planning	252
