Part I: Getting Started With Excel Dashboards and Reports... 7

Defining Dashboards and Reports	9
Defining reports	10
Defining dashboards	11
Preparing for Greatness	12
Establish the audience and purpose for the dashboard	12
Delineate the measures for the dashboard	13
Catalog the required data sources	14
Define the dimensions and filters for the dashboard	15
Determine the need for drill-down features	15
Establish the refresh schedule	16
A Quick Look at Dashboard Design Principles	16
Rule number 1: Keep it simple	17
Use layout and placement to draw focus	18
Format numbers effectively	19
Use titles and labels effectively	20

Data Modeling Best Practices	22
Separating data, analysis, and presentation	22
Starting with appropriately structured data	25
Avoiding turning your data model into a database	28
Using tabs to document and organize your data model	29
Testing your data model before building reporting components on top of it	31
Excel Functions That Really Deliver	32
The VLOOKUP function	32
The HLookup function	36
The Sumproduct function	37
The Choose function	41
Using Smart Tables That Expand with Data	43
Converting a range to an Excel table	44
Converting an Excel table back to a range	46

Part II: Building Basic Dashboard Components**47****Chapter 3: Dressing Up Your Data Tables****49**

Table Design Principles	49
Use colors sparingly	50
De-emphasize borders	52
Use effective number formatting	54
Subdue your labels and headers	55
Getting Fancy with Custom Number Formatting	57
Number formatting basics	57
Formatting numbers in thousands and millions,	59
Hiding and suppressing zeroes	62
Applying custom format colors	62
Formatting dates and times	63

Chapter 4: Sparkling Inspiration with Sparklines**65**

Introducing Sparklines	65
Understanding Sparklines	67
Creating sparklines	68
Understanding sparkline groups	70
Customizing Sparklines	71
Sizing and merging sparkline cells	71
Handling hidden or missing data	72
Changing the sparkline type	73
Changing sparkline colors and line width	73
Using color to emphasize key data points	73
Adjusting sparkline axis scaling	74
Faking a reference line	75
Specifying a date axis	77
Autoupdating sparkline ranges	78

Chapter 5: Formatting Your Way to Visualizations**79**

Enhancing Reports with Conditional Formatting	79
Applying basic conditional formatting	80
Adding your own formatting rules manually	88
Show only one icon	91
Show Data Bars and icons outside of cells	94
Representing trends with Icon Sets	96
Using Symbols to Enhance Reporting	98
The Magical Camera Tool	102
Finding the Camera tool	102
Using the Camera tool	103
Enhancing a dashboard with the Camera tool	105

Table of Contents

Chapter 6: The Pivotal Pivot Table	107
An Introduction to the Pivot Table	107
The Four Areas of a Pivot Table	108
Values area	108
Row area	109
Column area	109
Filter area	110
Creating Your First Pivot Table	III
Changing and rearranging your pivot table	114
Adding a report filter	115
Keeping your pivot table fresh	116
Customizing Your Pivot Table Reports	119
Changing the pivot table layout	119
Customizing field names	120
Applying numeric formats to data fields	122
Changing summary calculations	122
Suppressing subtotals	124
Showing and hiding data items	127
Hiding or showing items without data	128
Sorting your pivot table	132
Creating Useful Pivot-Driven Views	133
Producing top and bottom views	133
Creating views by month, quarter, and year	137
Creating a percent distribution view	139
Creating a YTD totals view	141
Creating a month-over-month variance view	142
 Part III: Building Advanced Dashboard Components....	 145
Chapter 7: Charts That Show Trending	147
Trending Dos and Don'ts	147
Using chart types appropriate for trending	148
Starting the vertical scale at zero	150
Leveraging Excel's logarithmic scale	151
Applying creative label management	153
Comparative Trending	156
Creating side-by-side time comparisons	156
Creating stacked time comparisons	158
Trending with a secondary axis	160
Emphasizing Periods of Time	163
Formatting specific periods	163
Using dividers to mark significant events	165
Representing forecasts in your trending components	166
Other Trending Techniques	167
Avoiding overload with directional trending	167
Smoothing data	168

Chapter 8: Grouping and Bucketing Data **173**

Creating Top and Bottom Displays	173
Incorporating top and bottom displays into dashboards	174
Using pivot tables to get top and bottom views	175
Using Histograms to Track Relationships and Frequency	178
Adding formulas to group data	179
Adding a cumulative percent	183
Using a pivot table to create a histogram	185
Emphasizing Top Values in Charts	187

Chapter 9: Displaying Performance against a Target **191**

Showing Performance with Variances	191
Showing Performance against Organizational Trends	193
Using a Thermometer-Style Chart	194
Using a Bullet Graph	195
Creating a bullet graph	196
Adding data to your bullet graph	200
Final thoughts on formatting bullet graphs....'	200
Showing Performance against a Target Range	203

Part W: Advanced Reporting Techniques **207**

Chapter 10: Macro-Charged Dashboarding **209**

Why Use a Macro?	209
Recording Your First Macro	210
Running Your Macros	214
Enabling and Trusting Macros	217
Macro-enabled file extensions	217
Enabling macro content	217
Setting up trusted locations	218
Excel Macro Examples	219
Building navigation buttons	219
Dynamically rearranging pivot table data	220
Offering one-touch reporting options	221

Chapter 11: Giving Users an Interactive Interface **223**

Getting Started with Form Controls	223
Finding Form controls	224
Adding a control to a worksheet	226
Using the Button Control	227
Using the Check Box Control	228
Check box example: Toggling a chart series on and off	229

Table of Contents

Using the Option Button Control	232
Option Button Example: Showing Many Views through One Chart....!	233
Using the Combo Box Control	236
Combo Box Example: Changing Chart Data with a Drop-Down Selector	237
Using the List Box Control	239
List Box Example: Controlling Multiple Charts with One Selector	241
Chapter 12: Adding Interactivity with Pivot Slicers	245
Understanding Slicers	245
Creating a Standard Slicer	247
Formatting Slicers	250
Size and placement	250
Data item columns	250
Slicer color and style	251
Other slicer settings	252
Controlling Multiple Pivot Tables with One Slicer	253
Creating a Timeline Slicer	254
Using Slicers as Form Controls	256
 Part V: Working With the Outside World	 261
Chapter 13: Using External Data for Your Dashboards and Reports	263
Importing Data from Microsoft Access	263
The drag-and-drop method	264
The Microsoft Access Export wizard	265
The Get External Data icon	266
Importing Data from SQL Server	271
Chapter 14: Sharing Your Workbook with the Outside World	275
Protecting Your Dashboards and Reports	275
Securing access to the entire workbook	275
Limiting access to specific worksheet ranges	279
Protecting the workbook structure	283
Linking Your Excel Dashboards to PowerPoint	284
Creating a link between Excel and PowerPoint	284
Manually updating links to capture updates	286
Automatically updating links	288
Distributing Your Dashboards via a PDF	289
Distributing Your Dashboards to SkyDrive	291
Limitations when Publishing to the Web	294

Part VI: The Part of Tens **295**

Chapter 15: Ten Chart Design Principles **297**

Avoid Fancy Formatting	297
Skip the Unnecessary Chart Junk	299
Format Large Numbers Where Possible	301
Use Data Tables instead of Data Labels	302
Make Effective Use of Chart Titles	304
Sort Your Data before Charting	304
Limit the Use of Pie Charts	305
Don't Be Afraid to Parse Data into Separate Charts	306
Maintain Appropriate Aspect Ratios	307
Don't Be Afraid to Use Something Other Than a Chart	308

Chapter 16: Ten Questions to Ask Before Distributing Your Dashboard **309**

Does My Dashboard Present the Right Information?	309
Does Everything on My Dashboard Have a Purpose?	309
Does My Dashboard Prominently Display the Key Message?	310
Can I Maintain This Dashboard?	310
Does My Dashboard Clearly Display Its Scope and Shelf Life?	311
Is My Dashboard Well Documented?	311
Is My Dashboard Overwhelmed with Formatting and Graphics?	312
Does My Dashboard Overuse Charts When Tables Will Do?	312
Is My Dashboard User-Friendly?	313
Is My Dashboard Accurate?	314

index **315**
