Contents

	Page
Preface	v
I Overview	1
II What Causes Balance of Payments Crises?	5
Different Episodes, Different Determinants?	5
Searching for Common Symptoms	7
III Issues in the Design of Early Warning Systems	10
What Are We Trying to Predict?	10
How to Generate Predictions	11
What Variables to Include and How to Measure Them?	12
IV How Well Do the Models Perform?	13
Kaminsky-Lizondo-Reinhart Model	14
Frankel-Rose Model	15
Sachs-Tornell-Velasco Model	16
Developing Country Studies Division Model	18
Out-of-Sample Performance: 1997	18
Summary of Effectiveness	21
V The Implementation of an Early Warning System	25
Appendix. A Survey of the Literature on Currency Crises	26
References	30
Box	
Section	
IV 1. Summary Measures of Model Performance	16
Tables	
Section	
II 1. Fifteen Heavily Indebted Countries: Summary Indicators	6
IV 2. Performance of Kaminsky-Lizondo-Reinhart (KLR) Indicators	15
3. Predictive Power of Kaminsky-Lizondo-Reinhart (KLR), Frankel-Rose (FR), and Developing Country Studies Division (DCSD) Models—In-Sample	17
4. Correlation of Actual and Predicted Rankings Based on Sachs-Tornell-Velasco (STV) Approach: In-Sample	19
