Foreword xiii

Benjamin Schneider and Arthur P. Brief

Prologue xv

Everett M. Rogers

Acknowledgments xvii

Part I Overview 1

1. An Introduction 3

Why Is Technological Innovation Important? 4

Why Now? 5

Who Should Read This Book? 7

Organization and Structure of the Book 8

2. Technological Innovation: Definitions and Perspectives 9

Technology 9

Innovation 10

The Knowledge Base of Technology 11

The Social Context and Content of Technology 14

Radical Versus Incremental Technological Innovation 18

Product Versus Process Technological Innovations 20

Technological Innovation and Success 22

Summary 24

Notes 25

3. Technological Innovation as a Process 27

- The Life Cycle of Technological Innovation 27
- Nonlinearity 30
- Who or What Innovates: The Unit of Analysis Problem 32
- Summary 49
- Notes 50

Part II The Creation and Dissemination of Technology

4. The Production of Basic Science 53

- Boundaries and Scope of Basic Science 56
- Basic Science/Academic Science 57
- Academic Scientists and the Scientific Pipeline 58
- Academic Disciplines and Academic Science 59
- The Invisible College 60
- Determinants of Academic Research Quantity and Quality 62
- Recent Changes in the Structure of Academia 63
- Change at the University Periphery 64
- Cooperative Research: Myth and Reality 65
- A Contrast: The Japanese Experience 70
- Organizational and Individual Incentives for Commercialization 72
- Summary 73
- Notes 74

5. Issues in Applied Research and Development 75

- Introduction 75
- Applied Research and Development: An Overview 77
- The Elements of an R&D Strategy 82
- Industry and Market Characteristics 85
- Federal Policy and Company R&D 94
- Project Selection: Theories and Practice 103
- Project Management 105
- Studies of Intergroup Communications 108
- Studies of Project Groups: Looking at Teams and Teamwork 112
- R&D Outcomes: Assessing the R&D Innovation Activity 113
- Notes 115

6. The Deployment of Technology 117

- The Basic Problem 117
- Models of Social Interaction in Technology Deployment 118
- An Innovation-Based Model: Diffusion Analysis 121
- A Context-Based Approach 124
- Nature of the Technology 126

Characteristics of Users	133
Characteristics of Deployers	136
Boundaries Between Users and Deployers	137
Characteristics of Communication and Transaction Mechanisms	141
Choosing Deployment Tactics	144
Assessing Technological Deployment Efforts	144
Notes	146

Part III The Adoption and Implementation of Technology 149

7. The Context for Change: Organization, Technology, and Environment 151

Organization, Technology, and Environment: The Context for Innovation Decisions	152
Organizational Context	154
Technological Context	163
External Environmental Context	166
The Importance of Context	174
Notes	175

8. Decision Processes in Technological Innovation 177

What Is an Adoption Decision?	178
Understanding Adoption Decision Making	181
Who Makes the Decisions?	189
The Innovation Adoption Process: A Reprise	195
Notes	195

9. Implementation 197

What Is Implementation?	197
Perspectives on Implementation	204
Implementation Activities Derived from the Four Perspectives	213
Summary	231
Notes	232

Part IV Further Considerations 233

10. Issues of Science and Technology Policy 235

Premises and Principles of Science, Technology, and Innovation Public Policy	236
Current Themes in U.S. Science, Technology, and Innovation Policy	241

A Discourse on Policy Options and Interconnectivity	249
Summary	257
Notes	258
