# Contents summary

*Preface* xiii

***Part I*** **The tools of macroeconomics**

**1 Macroeconomic essentials 3**

**2 Booms and recessions I: the Keynesian cross 32**

**3 Money, exchange rates and all that 58**

**4 Booms and recessions II: the Mundell-Fleming model 84**

**5 Enter aggregate supply 107**

**6 Booms and recessions III: aggregate supply and demand 135**

**7 Economic growth 169**

***II*** **The issues of European integration**

**8 Endogenous economic policy (one more tool) 197**

**9 The European Monetary System at work 218**

**10 Inflation and central bank independence 241**

**11 Budget deficits and public debt 273**

**12 Unemployment and growth 299**

**A primer in econometrics 329**

*Index* **349**

# Contents in full

*Preface* xiii

## *Part I* The tools of macroeconomics

**1 Macroeconomic essentials 3**
1.1 The issues of macroeconomics 3
1.2 Essentials of macroeconomic accounting 7
1.3 Beyond accounting 19
Chapter summary 25
Exercises 26
Recommended reading 27
Appendix: Logarithms, growth rates and logarithmic scales 28

**2 Booms and recessions I: the Keynesian cross** 32
2.1 The circular flow model again: terminology and overview 36
2.2 Income determination: a first pass 40
2.3 Income determination: a second pass 44
2.4 An intertemporal view of consumption and investment 47
Chapter summary 52
Exercises 53
Recommended reading 55
Applied problems 56

**3 Money, exchange rates and all that 58**
3.1 The money market, the interest rate and the *LM* curve 59
3.2 Aggregate demand, the interest rate and the exchange rate: the *IS* curve 64
3.3 Enter the exchange rate: the *FE* curve 70
3.4 Equilibrium in all three markets 74
Chapter summary 78
Exercises 79
Recommended reading 81
Applied problems 81

**4 Booms and recessions II: the Mundell-Fleming model 84**
4.1 Fiscal policy in the Mundell-Fleming model 85
4.2 Monetary policy in the Mundell-Fleming model 88

4.3 The algebra of monetary and fiscal policy in the Mundell-Fleming model 90
4.4 Comparative statics versus transition dynamics 91
4.5 Transition dynamics with expected depreciation 93
4.6 When prices move 97
4.7 Today's exchange rate and the future 100
Chapter summary 102
Exercises 103
Recommended reading 104
Applied problems 104

**5 Enter aggregate supply 107**
5.1 Potential income and the labour market 108
5.2 Why is there unemployment in equilibrium? 114
5.3 Why may actual output deviate from potential output? 127
Chapter summary 130
Exercises 131
Recommended reading 133
Applied problems 133

**6 Booms and recessions III: aggregate supply and demand** 135
6.1 The short-run aggregate supply curve 136
6.2 The aggregate demand curve 137
6.3 The *DAD-SAS* model 143
6.4 Inflation expectations 147
6.5 The *DAD-SAS* model at work 149
Chapter summary 160
Exercises 161
Recommended reading 162
Appendix: The algebra of the *DAD* curve (optional) 162
Appendix: The genesis of the *DAD-SAS* model 164
Applied problems 166

**7 Economic growth 169**
7.1 A model of equilibrium: the Solow growth model 169
7.2 Why incomes may differ 174
7.3 What about consumption? 177
7.4 Population growth and technological progress 180
7.5 Empirical merits and deficiencies of the Solow growth model 183
7.6 The role of human capital 186
7.7 Beyond Solow 189
Chapter summary 190
Exercises 191
Recommended reading 193
Applied problems 193

## *Part II* The issues of European integration

**8 Endogenous economic policy (one more tool) 197**
8.1 What do politicians want? 198
8.2 Political business cycles 200
8.3 Rational expectations 203
8.4 Policy games 205
8.5 Ways out of the time inconsistency trap 209
Chapter summary 212
Exercises 214
Recommended reading 215
Applied problems 216

**9 The European Monetary System at work 218**
9.1 Preliminaries 219
9.2 German unification 220
9.3 The European Monetary System 225
9.4 Exchange rate target zones 228
9.5 Speculative attacks 233
Chapter summary 237
Exercises 238
Recommended reading 239
Applied problems 239

**10 Inflation and central bank independence 241**
10.1 Inflation, central bank independence and the EMS 242
10.2 Supply shocks and central bank independence 250
10.3 Disinflations and the sacrifice ratio 257
10.4 Lessons for European monetary union 266
Chapter summary 268
Exercises 269
Recommended reading 270
Applied problems 271

**11 Budget deficits and public debt** 273
11.1 The government budget 274
11.2 The dynamics of budget deficits and the public debt 275
11.3 Maastricht, the fisc and the central bank 286
11.4 What is wrong with having deficits and debt? 289
11.5 Does monetary union need budget rules? 292
11.6 EU members in the light of Maastricht fiscal policy criteria 293
Chapter summary 295
Exercises 296
Recommended reading 297
Applied problems 297

**12 Unemployment and growth** 299
12.1 European integration and growth 300
12.2 Linking unemployment and growth 305
12.3 European unemployment 307
12.4 Lessons, remedies and prospects 321
Chapter summary 323
Exercises 324
Recommended reading 325
Applied problems 326

**Appendix A primer in econometrics** 329
A.1 First task: estimating unknown parameters 330
A.2 Second task: testing hypotheses 333
A.3 A closer look at OLS estimation 335
Appendix summary 345
Exercises 346
Recommended reading 347
