## **An Introduction to Economic Dynamics**

**Ronald Shone** 

## Contents

List of tables and boxes Preface	viii ix
Introduction	IX
11 Definitions and concents	1
1.1 Definitions and concepts	1
1.2 Dynamic models	5
14 Dynamical systems on a spreadsheet	5
15 Experimentation	9
16 Difference equations	10
17 Attractors and repellors	10
18 Nonlinear dynamical systems	12
19 Continuous models	20
1.10 Continuous differential equations on a spreadsheet	22
1.11 Conclusion	25
Exercises	25
~	
Demand and supply dynamics	
2.1 Beyond the textbook	27
2.2 The linear cobweb model	31
2.3 Experimentation	34
2.4 Different expectations	35
2.5 The Goodwin model of expectations	37
2.6 Nonlinear cobwebs	39
2.7 Ceilings and floors	40
2.8 Cobwebs in interrelated markets	43
Exercises	45
Simple Keynesian dynamics	
3.1 The Keynesian-cross diagram	48
3.2 Some simple dynamics	50
3.3 Experimentation: 1	52
3.4 The dynamic multiplier	54
3.5 A dynamic model with taxes	56
3.6 Experimentation: 2	58
3.7 The multiplier-accelerator model	60
3.8 Introduction of net exports	63
3.9 Experimentation: 3	66
Exercises	67

vi Contents

Constructing trajectories in the	pnase	plane
----------------------------------	-------	-------

4.1 Trajectories and fixed points	69
4.2 Isoclines and vector forces: continuous models	72
4.3 Constructing continuous trajectories with a spreadshee	et 74
4.4 Isoclines and vector forces: discrete models	76
4.5 Constructing discrete trajectories with a spreadsheet	77
4.6 A cautionary note	78
4.7 A variety of trajectories	79
4.8 Limit cycles	84
4.9 Lorenz curves and strange attractors	85
4.10 Conclusion	87
Exercises	89
IS-LM dynamics	
5.1 The static model	91
5.2 Instantaneous money market adjustment	94
5.3 A continuous model	98
5.4 Continuous IS-LM on a spreadsheet	101
5.5 A discrete version of the IS-LM model	105
5.6 Interest rate ceiling	107
5.7 Conclusion	108
Exercises	108
Inflation-unemployment dynamics	
6.1 The Phillips curve	110
6.2 A simple macroeconomic model of inflation	111
6.3 The dynamics of the simple model	115
6.4 Dynamic model with positive inflation	117
6.5 A change in the money supply	123
6.6 A change in the natural level of unemployment	124
6.7 Continuous model	125
6.8 Conclusion	127
Exercises	128
Dynamics of the firm	
7.1 Introduction	130
7.2 Monopoly and advertising	130
7.3 Advertising model: discrete version	133
7.4 Diffusion models	135
7.5 Static theory of oligopoly	138
7.6 Discrete dynamic model with output adjusting	
instantaneously	140
7.7 Dynamic oligopoly with three firms	142
7.8 Partial-adjustment duopoly model	143
Exercises	146

8	Saddles and rational expectations	
	8.1 What are saddles?	149
	8.2 Two examples	150
	8.3 The Dornbusch model under perfect foresight	157
	8.4 A numerical example	161
	8.5 A rise in the money supply	164
	8.6 Announcement effects	166
	8.7 Discrete systems exhibiting saddle solutions	170
	Exercises	172
9	Fiscal dynamics and the Maastricht Treaty	
	9.1 Budgetary concepts	174
	9.2 Budget dynamics with no inflation and no monetary	
	financing	176
	9.3 A numerical example	180
	9.4 Budget dynamics with inflation and money plus bond	
	financing	181
	9.5 Some numerical examples	184
	9.6 Budget criteria of the Maastricht Treaty	188
	9.7 Some final observations on the Maastricht Treaty	191
	Exercises	192
10	A little bit of chaos	
	10.1 Introduction	194
	10.2 Defining bifurcations	195
	10.3 Saddle-node bifurcation	198
	10.4 A transcritical bifurcation and a pitchfork bifurcation	200
	10.5 The logistic equation, periodic-doubling bifurcations	
	and chaos	202
	10.6 Sensitivity to initial conditions and unusual patterns	207
	10.7 Van der Pol equations and a Hopf bifurcation	209
	10.8 Lorenz equations again ,	211
	Exercises	213
	Brief answers to selected exercises	215
	Further reading	220
	Index	221
