# CONTENTS

## PREFACE XV

## CHAPTER 1 AN INTRODUCTION TO MICROECONOMICS 1

- 1.1 The Scope of Microeconomic Theory 1
- 1.2 The Nature and Role of Theory 2
- 1.3 Positive Versus Normative Analysis 3
- 1.4 Market Analysis and Real Versus Nominal Prices 4
- 1.5 Basic Assumptions About Market Participants 5
- 1.6 Opportunity Cost 6
  - Economic Versus Accounting Costs 7
  - Sunk Costs 8
- 1.7 Production Possibility Frontier 9
- Summary 12
- Key Concepts and Terms 12
- Review Questions and Problems 12

## CHAPTER 2 SUPPLY AND DEMAND 15

- 2.1 Demand and Supply Curves 15
  - The Demand Curve 15
  - Shifts in the Demand Curve 17
  - The Supply Curve 20
  - Shifts in the Supply Curve 21
- 2.2 Determination of Equilibrium Price and Quantity 22
- 2.3 Adjustment to Changes in Demand or Supply 24
  - Using the Supply-Demand Model to Explain Market Outcomes 26
- 2.4 Government Intervention in Markets: Price Controls 27
  - Rent Control 27
  - Who Loses, Who Benefits? 29
- 2.5 Elasticities 32
  - Price Elasticity of Demand 32
  - Calculating Price Elasticity of Demand 34
  - Demand Elasticities Vary Among Goods 37
  - The Estimation of Demand Elasticities 38
  - Three Other Elasticities 39
- Summary 41
- Key Concepts and Terms 42
- Review Questions and Problems 42

**CHAPTER 3 THE THEORY OF CONSUMER CHOICE 45**

3.1	The Budget Line	45
	The Geometry of the Budget Line	47
	Shifts in Budget Lines	48
3.2	Preferences of the Consumer	51
	Consumer Preferences Graphed as Indifference Curves	52
	Curvature of Indifference Curves	55
	Individuals Have Different Preferences	57
	Graphing Economic Bads and Economic Neuters	58
	Perfect Substitutes and Complements	59
3.3	The Consumer's Choice	60
	A Corner Solution	62
	The Composite Good Convention	62
3.4	Changes in Income and Consumption Choices	65
	Normal Goods	66
	Inferior Goods	67
	The Food Stamp Program	69
3.5	Are People Selfish?	72
3.6	The Utility Approach to Consumer Choice	74
	The Consumer's Optimal Choice	76
	Relationship to Indifference Curves	78
	Summary	79
	Key Concepts and Terms	79
	Review Questions and Problems	80

**CHAPTER 4 INDIVIDUAL AND MARKET DEMAND 83**

4-1	Price Changes and Consumption Choices	83
	The Consumer's Demand Curve	85
	Some Remarks About the Demand Curve	85
	Do Demand Curves Always Slope Downward?	87
4.2	Income and Substitution Effects of a Price Change	88
	Income and Substitution Effects Illustrated: The Normal-Good Case	88
	The Income and Substitution Effects Associated with a Gasoline-Tax-Plus-Rebate Program	90
4.3	Income and Substitution Effects: Inferior Goods	93
	The Giffen Good Case: How Likely?	95
4-4	From Individual to Market Demand	96
4-5	Consumer Surplus	99
	Consumer Surplus and Indifference Curves	103
4-6	Price Elasticity and the Price-Consumption Curve	104
4-7	The Basics of Demand Estimation	107
	Experimentation	107
	Surveys	107
	Regression Analysis	108

Summary	112
Key Concepts and Terms	112
Review Questions and Problems	112

## CHAPTER 5 USING CONSUMER CHOICE THEORY 115

5.1 Excise Subsidies, Health Care, and Consumer Welfare	115
Using the Consumer Surplus Approach	118
5.2 Public Schools and the Voucher Proposal	120
5.3 Paying for Garbage	123
Does Everyone Benefit?	125
5.4 The Consumer's Choice to Save or Borrow	127
A Change in Endowment	129
Changes in the Interest Rate	130
5.5 Investor Choice	132
Investor Preferences Toward Risk	135
Minimizing Exposure to Risk	139
Key Concepts and Terms	141
Review Questions and Problems	141

## CHAPTER 6 PRODUCTION 143

6.1 Relating Output to Inputs	143
6.2 Production When Only One Input Is Variable	144
Total, Average, and Marginal Product Curves	146
The Relationship Between Average and Marginal Product Curves	146
The Geometry of Product Curves	148
The Law of Diminishing Marginal Returns	149
6.3 Production When All Inputs Are Variable	151
Production Isoquants	151
MRTS and the Marginal Products of Inputs	154
Using MRTS: Speed Limits and Gasoline Consumption	155
6.4 Returns to Scale	156
6.5 Empirical Estimation of Production Functions	161
Summary	165
Key Concepts and Terms	165
Review Questions and Problems	165

## CHAPTER 7 THE COST OF PRODUCTION 169

7.1 The Nature of Cost	169
7.2 Short-Run Cost of Production	170
Measures of Short-Run Cost	170
Behind Cost Relationships	172

7.3	Short-Run Cost Curves	173
	Marginal Cost	173
	Average Cost	175
	Marginal-Average Relationships	176
	The Geometry of Cost Curves	176
7.4	Long-Run Cost of Production	177
	Isocost Lines	177
	Least Costly Input Combinations	179
	Interpreting the Tangency Points	180
	The Expansion Path	182
	Is Production Cost Minimized?	182
7.5	Input Price Changes and Cost Curves	184
7.6	Long-Run Cost Curves	187
	The Long Run and Short Run Revisited	189
7.7	Importance of Cost Curves to Market Structure	191
7.8	Using Cost Curves: Controlling Pollution	193
7.9	Economies of Scope	196
7.10	Estimating Cost	197
	Summary	199
	Key Concepts and Terms	199
	Review Questions and Problems	200

## **CHAPTER 8    PROFIT MAXIMIZATION IN PERFECTLY COMPETITIVE MARKETS    203**

8.1	The Assumptions of Perfect Competition	203
8.2	Profit Maximization	204
8.3	The Demand Curve Facing the Competitive Firm	207
8.4	Short-Run Profit Maximization	208
	Short-Run Profit Maximization Using Per-Unit Curves	210
	Operating at a Loss in the Short Run	212
8.5	The Perfectly Competitive Firms' Short-Run Supply Curve	214
	Output Response to a Change in Input Prices	216
8.6	The Short-Run Industry Supply Curve	216
	Price and Output Determination in the Short Run	218
8.7	Long-Run Competitive Equilibrium	220
	Zero Profit When Firms' Cost Curves Differ?	223
8.8	The Long-Run Industry Supply Curve	224
	Constant-Cost Industry	225
	Increasing-Cost Industry	227
	Decreasing-Cost Industry	229
	Comments on the Long-Run Supply Curve	231
8.9	When Does the Competitive Model Apply?	233

Summary	234
Key Concepts and Terms	235
Review Questions and Problems	235

## **CHAPTER 9 USING THE COMPETITIVE MODEL 237**

9.1 The Evaluation of Gains and Losses	237
Producer Surplus	237
Consumer Surplus, Producer Surplus, and Efficient Output	239
The Deadweight Loss of a Price Ceiling	241
9.2 Excise Taxation	243
Who Bears the Burden of the Tax?	247
The Deadweight Loss of Excise Taxation	248
9.3 Airline Regulation and Deregulation	251
What Happened to the Profits?	252
After Deregulation	254
The Push for Reregulation	256
9.4 City Taxicab Markets	257
The Illegal Market	259
9.5 Consumer and Producer Surplus, and the Net Gains from Trade	261
The Gains from International Trade	263
The Link Between Imports and Exports	265
9.6 Government Intervention in Markets: Quantity Controls	266
Sugar Policy: A Sweet Deal	266
Key Concepts and Terms	269
Review Questions and Problems	270

## **CHAPTER 10 MONOPOLY 273**

10.1 The Monopolist's Demand and Marginal Revenue Curves	273
10.2 Profit-Maximizing Output of a Monopoly	275
Graphical Analysis	276
The Monopoly Price and Its Relationship to Elasticity of Demand	278
10.3 Further Implications of Monopoly Analysis	281
10.4 The Measurement and Sources of Monopoly Power	285
Measuring Monopoly Power	287
The Sources of Monopoly Power	287
Barriers to Entry	288
Strategic Behavior by Firms: Incumbents and Potential Entrants	290
10.5 The Efficiency Effects of Monopoly	292
A Dynamic View of Monopoly and Its Efficiency Implications	294
10.6 Public Policy Toward Monopoly	296
Regulation of Price	298

Summary	300
Key Concepts and Terms	300
Review Questions and Problems	300

**CHAPTER 11 PRODUCT PRICING WITH MONOPOLY POWER 303**

11.1 Price Discrimination	303
Other Degrees of Price Discrimination	305
11.2 Three Necessary Conditions for Price Discrimination	308
11.3 Price and Output Determination with Price Discrimination	310
11.4 Two-Part Tariffs	314
Many Consumers, Different Demands	315
11.5 Intertemporal Price Discrimination and Peak-Load Pricing	319
Peak-Load Pricing	322
Summary	325
Key Concepts and Terms	325
Review Questions and Problems	325

**CHAPTER 12 MONOPOLISTIC COMPETITION AND OLIGOPOLY 329**

12.1 Price and Output Under Monopolistic Competition	329
Determination of Market Equilibrium	330
Monopolistic Competition and Efficiency	332
12.2 Oligopoly and the Cournot Model	335
The Cournot Model	336
Evaluation of the Cournot Model	339
12.3 Other Oligopoly Models	340
The Stackelberg Model	340
The Dominant Firm Model	343
12.4 Cartels and Collusion	347
Cartelization of a Competitive Industry	347
Why Cartels Fail	349
Oligopolies and Collusion	352
The Case of OPEC	353
Summary	356
Key Concepts and Terms	357
Review Questions and Problems	357

**CHAPTER 13 GAME THEORY AND THE ECONOMICS OF INFORMATION 359**

13.1 Game Theory	359
Determination of Equilibrium	360

13.2	The Prisoner's Dilemma Game	363
	The Prisoner's Dilemma and Cheating by Cartel Members	365
	A Prisoner's Dilemma Game You May Play	367
13.3	Repeated Games	369
	Do Oligopolistic Firms Always Collude?	371
	Game Theory and Oligopoly: A Summary	372
13.4	Asymmetric Information	373
	The "Lemons" Model	373
	Market Responses to Asymmetric Information	374
13.5	Adverse Selection and Moral Hazard	377
	Adverse Selection	377
	Moral Hazard	379
13.6	Limited Price Information	381
13.7	Advertising	382
	Advertising as Information	383
	Summary	386
	Key Concepts and Terms	386
	Review Questions and Problems	386

## CHAPTER 14 USING NONCOMPETITIVE MARKET MODELS 389

14-1	The Size of the Deadweight Loss of Monopoly	389
	Other Deadweight Losses of Monopoly	392
14-2	Do Monopolies Suppress Inventions?	393
14.3	Natural Monopoly	395
	Regulation of Natural Monopoly	397
	Regulation of Natural Monopoly in Practice	398
14-4	Government-Established Cartels: The Case of the British Columbia Egg Marketing Board	400
	Estimating the Deadweight Loss: The First Round	401
	Estimating the Deadweight Loss: The Second Round	402
14-5	More on Game Theory: Iterated Dominance and Commitment	405
	Iterated Dominance	406
	Commitment	408
	Key Concepts and Terms	410
	Review Questions and Problems	410

## CHAPTER 15 EMPLOYMENT AND PRICING OF INPUTS 411

15.1	The Input Demand Curve of a Competitive Firm	411
	The Firm's Demand Curve: One Variable Input	412
	The Firm's Demand Curve: All Inputs Variable	414
	The Firm's Demand Curve: An Alternative Approach	415

15.2	Industry and Market Demand Curves for an Input	417
	A Competitive Industry's Demand Curve for an Input	418
	The Elasticity of an Industry's Demand Curve for an Input	419
	The Market Demand Curve for an Input	421
15.3	The Supply of Inputs	422
15.4	Industry Determination of Price and Employment of Inputs	424
	Process of Input Price Equalization Across Industries	425
15.5	Input Price Determination in a Multi-Industry Market	429
15.6	Input Demand and Employment by an Output Market Monopoly	431
15.7	Monopsony in Input Markets	433
	Summary	435
	Key Concepts and Terms	436
	Review Questions and Problems	436

## CHAPTER 16 WAGES, RENT, INTEREST, AND PROFIT 439

16.1	The Income-Leisure Choice of the Worker	439
	Is This Model Plausible?	441
16.2	The Supply of Hours of Work	441
	Is a Backward-Bending Labor Supply Curve Possible?	443
	The Market Supply Curve	445
16.3	The General Level of Wage Rates	445
16.4	Why Wages Differ	448
	Compensating Wage Differentials	450
	Differences in Human Capital Investment	451
	Differences in Ability	452
16.5	Economic Rent	452
16.6	Monopoly Power in Input Markets: The Case of Unions	454
16.7	Borrowing, Lending, and the Interest Rate	458
16.8	Investment and the Marginal Productivity of Capital	459
	The Investment Demand Curve	460
16.9	Saving, Investment, and the Interest Rate	462
	Equalization of Rates of Return	464
16.10	Why Interest Rates Differ	464
16.11	Valuing Investment Projects	465
	Summary	467
	Key Concepts and Terms	468
	Review Questions and Problems	468

## CHAPTER 17 USING INPUT MARKET ANALYSIS 471

17.1	Minimum Wage Law	471
	Further Considerations	473
	How Large Are the Effects of the Minimum Wage?	474

The Minimum Wage: An Example of an Efficiency Wage?	476
17.2 Who Really Pays for Social Security?	477
But Do Workers Bear All the Burden?	478
17.3 The NCAA Cartel	480
An Input Buyers'Cartel	481
The NCAA as a Cartel of Buyers	482
Eliminate the Cartel Restrictions on Pay?	484
17-4 Discrimination in Employment	486
What Causes Average Wage Rates to Differ?	488
17.5 The Earned Income Tax Credit	490
Effect on Budget Lines	491
Effect on Work Incentives	492
Key Concepts and Terms	494
Review Questions and Problems	494

## CHAPTER 18    **GENERAL EQUILIBRIUM ANALYSIS AND ECONOMIC EFFICIENCY    497**

18.1 Partial and General Equilibrium Analysis Compared	497
The Mutual Interdependence of Markets Illustrated	498
When Should General Equilibrium Analysis Be Used?	499
18.2 Economic Efficiency	500
Efficiency as a Goal for Economic Performance	502
18.3 Conditions for Economic Efficiency	503
The Benefits of Trade	503
The Edgeworth Exchange Box	504
The Edgeworth Exchange Box with Indifference Curves	506
Efficiency in the Distribution of Goods	508
Competitive Equilibrium and Efficient Distribution	510
18.4 Efficiency in Production	514
The Edgeworth Production Box	515
The Production Contract Curve and Efficiency in Production	517
General Equilibrium in Competitive Input Markets	517
18.5 The Production Possibility Frontier and Efficiency in Output	518
Efficiency in Output	519
An Economy's PPF and the Gains from International Trade	521
18.6 Competitive Markets and Economic Efficiency	524
The Role of Information	526
18.7 The Causes of Economic Inefficiency	528
Market Power	528
Imperfect Information	529
Externalities/Public Goods	530
Summary	531
Key Concepts and Terms	531
Review Questions and Problems	531

**CHAPTER 19 PUBLIC GOODS AND EXTERNALITIES 535**

19.1	What Are Public Goods?	535
	The Free-Rider Problem	536
19.2	Efficiency in the Provision of a Public Good	538
	Efficiency in Production and Distribution	540
	Patents	541
19.3	Externalities	542
	External Costs	543
	External Benefits	545
19.4	Externalities and Property Rights	547
	The Coase Theorem	549
19.5	Controlling Pollution, Revisited	550
	The Market for Los Angeles Smog	553
	Summary	555
	Key Concepts and Terms	555
	Review Questions and Problems	555

**MATHEMATICAL APPENDIX 557****ANSWERS TO SELECTED PROBLEMS 568****INDEX 577**
