Complexity and Management

Fad or radical challenge to systems thinking?

Ralph D. Stacey, Douglas Griffin
and Patricia Shaw

London and New York

Series preface *ix*

1 Introduction: getting things done in organizations 1
- "Getting things done, anyway" 3
- Ways of thinking 6
- Outline of the book 9

2 The age-old question of stability and change 12
- The claims of management complexity writers 17
- Moving toward a knowable future , 21
- Human freedom and the scientific method 22
- The importance of Kant's contribution 25
- © Conclusion 29

3 Moving toward an unknowable future 30
- e The perpetual construction,of the future 30
- *9* Chance and adaptation 39
- Alternatives to some of Darwin's views 41
- » Darwin and the neo-Darwinian synthesis 44
- Five ways of understanding stability and change 49
- » Conclusion 51

4 Limits of systems thinking: focusing on knowable futures 56
- s Dealing with human participation and freedom 58
- Scientific management: ignoring interaction 61
- Systems thinking: splitting choice and interaction 64
- , *m* Conclusion 82

5 How the complexity sciences deal with the future 85
m Chaos theory: unfolding an enfolded future 86
« Chaos theory as Formative Teleology 89
Dissipative structure theory: constructing an unknowable future 92
s Conclusion 103

6 Complexity and the emergence of novelty 106
® Complex adaptive systems: a life of their own 106
m Review of the management complexity writers'claim 119
* Conclusion: the challenge 123

7 Differing views on complexity in organizations 127
0 Complexity and the dynamics of industries: limits to control and the origins of novelty 130
s Marion's analysis of causality in complex systems 138
• Complexity and the dynamics of organizations: sustaining the illusion of control 141
© Conclusion 154

8 Complexity and human action 157
© Human action in the dominant management discourse: focusing on the individual 158
m Human action in complexity: retaining the individual focus 163
• Transformation and human action: focusing on relationship and participation 171
© Conclusion 181

9 Getting things done in organizations: from systems to complex responsive processes 183
® Key elements of our project 186
e The books in this series 193

Appendix 1: The origins of Western notions of causality 195
Appendix 2: Complexity sciences as sources of analogy 199
Appendix 3: The movement of our thought 207

Bibliography 214
