PART I ECONOMICS AND THE ENVIRONMENT

| | | |
|----------|--|-----------|
| 1 | Environmental Economics and the Theory of Externalities | 3 |
| 1.1 | Market Failures | 4 |
| 1.2 | Descriptive Explanation of Market Failure | 6 |
| 1.3 | A Formal Model of Externalities | 7 |
| | 1.3.1 <i>Pareto Optimality</i> | 8 |
| | 1.3.2 <i>The Competitive Market</i> | 9 |
| | 1.3.3 <i>Market Intervention</i> | 11 |
| 1.4 | Points Going Forward | 12 |
| 1.5 | Summary | 14 |
| 1.6 | Further Reading | 15 |
| | Exercises | 15 |
| 2 | Environmental Problems and Policy Issues | 17 |
| 2.1 | Evolution of Environmental Policy and Economics | 17 |
| 2.2 | Major Pollutants and Pollution Problems | 21 |
| | 2.2.1 <i>Water Pollution</i> | 21 |
| | 2.2.2 <i>Air Pollution</i> | 23 |
| | 2.2.3 <i>Land Pollution</i> | 26 |
| | 2.2.4 <i>Pollution Problems and Economics</i> | 27 |
| 2.3 | Economics and Ecology | 28 |
| 2.4 | Policy Examples | 29 |
| | 2.4.1 <i>Sulfur Dioxide</i> | 29 |
| | 2.4.2 <i>Nutrient Surface Water Pollution in the US</i> | 30 |
| | 2.4.3 <i>Hazardous Waste in the US</i> | 31 |
| | 2.4.4 <i>Climate</i> | 32 |

| | | |
|---|--|-----------|
| 2.5 | Summary | 34 |
| 2.6 | Further Reading | 34 |
| 3 | Introduction to the Theory of Environmental Policy | 35 |
| 3.1 | A Simple Model of Damages and Costs | 35 |
| 3.1.1 | <i>Damage Function</i> | 36 |
| 3.1.2 | <i>Abatement Costs</i> | 36 |
| 3.1.3 | <i>Efficient Allocation</i> | 37 |
| 3.2 | Property Rights and the Coase Theorem | 39 |
| 3.2.1 | <i>Household Ownership of Pollution Rights</i> | 39 |
| 3.2.2 | <i>Firm Ownership of Pollution Rights</i> | 40 |
| 3.2.3 | <i>Coase Theorem</i> | 40 |
| 3.2.4 | <i>Comments on the Polluter Pays Principle</i> | 41 |
| 3.3 | Environmental Policy Instruments | 44 |
| 3.3.1 | <i>Command and Control</i> | 44 |
| 3.3.2 | <i>Emission Taxes</i> | 46 |
| 3.3.3 | <i>Auctioned Pollution Permits</i> | 48 |
| 3.3.4 | <i>Freely Distributed Transferable Permits</i> | 49 |
| 3.3.5 | <i>Subsidies</i> | 52 |
| 3.4 | Aggregate Marginal Abatement Cost Curve | 53 |
| 3.5 | Summary | 54 |
| 3.6 | Further Reading | 55 |
| | Exercises | 56 |
| PART II THE DESIGN OF ENVIRONMENTAL POLICY | | |
| 4 | Imperfect Information | 61 |
| 4.1 | Price Versus Quantities | 62 |
| 4.1.1 | <i>Damage Function Uncertainty</i> | 62 |
| 4.1.2 | <i>Abatement Cost Function Uncertainty</i> | 63 |
| 4.1.3 | <i>Weitzman Theorem</i> | 65 |
| 4.1.4 | <i>Contemporary Policy and Research Relevance</i> | 69 |
| 4.2 | Hybrid Policies | 70 |
| 4.2.1 | <i>Safety Valves</i> | 70 |
| 4.2.2 | <i>Approximating the Marginal Damage Curve</i> | 73 |
| 4.3 | Mechanism Design | 75 |
| 4.3.1 | <i>Kwerel's Mechanism</i> | 76 |
| 4.3.2 | <i>Montero's Mechanism</i> | 77 |
| 4.3.3 | <i>Second-Best Mechanism Design</i> | 82 |
| 4.4 | Summary | 86 |
| 4.5 | Further Reading | 87 |
| | Appendix A: Derivation of Weitzman Theorem Result | 88 |
| | Appendix B: Characterization of Optimal Second-Best Solution | 90 |
| | Exercises | 90 |
| 5 | Competitive Output Markets | 94 |
| 5.1 | Model Extension | 95 |
| 5.1.1 | <i>Cost Functions</i> | 95 |

| | | |
|----------|--|------------|
| 5.1.2 | <i>Market Demand</i> | 97 |
| 5.1.3 | <i>Welfare and Social Optimum</i> | 99 |
| 5.2 | Environmental Policy Instruments | 100 |
| 5.2.1 | <i>Taxes</i> | 101 |
| 5.2.2 | <i>Permits and Other Instruments</i> | 104 |
| 5.3 | Standards Reconsidered | 108 |
| 5.4 | Long Run Optimality of Environmental Policy Instruments | 111 |
| 5.4.1 | <i>Long Run Social Optimum</i> | 111 |
| 5.4.2 | <i>Standards</i> | 112 |
| 5.4.3 | <i>Taxes</i> | 113 |
| 5.4.4 | <i>Auctioned and Freely Distributed Permits</i> | 114 |
| 5.4.5 | <i>Subsidies</i> | 115 |
| 5.5 | An Expanded Examination of Abatement Costs | 116 |
| 5.6 | Summary | 119 |
| 5.7 | Further Reading | 120 |
| | Appendix: Proof of Proposition 5.3 | 120 |
| | Exercises | 121 |
| 6 | Non-Competitive Output Markets | 124 |
| 6.1 | Monopoly | 125 |
| 6.1.1 | <i>Taxation When Abatement is Not Possible</i> | 125 |
| 6.1.2 | <i>Taxation When Abatement is Possible</i> | 128 |
| 6.1.3 | <i>Regulating Output and Emissions Simultaneously</i> | 130 |
| 6.2 | Oligopolies | 131 |
| 6.2.1 | <i>Firm Behavior Under Emission Taxes in a Cournot Model</i> | 131 |
| 6.2.2 | <i>Regulator's Problem Under Cournot Oligopoly</i> | 133 |
| 6.2.3 | <i>Entry and Exit</i> | 135 |
| 6.3 | Extensions | 137 |
| 6.4 | Summary | 138 |
| 6.5 | Further Reading | 139 |
| | Exercises | 139 |
| 7 | Environmental Policy with Pre-existing Distortions | 142 |
| 7.1 | Extending the Model | 143 |
| 7.1.1 | <i>Optimum with No Labor Market Distortion</i> | 145 |
| 7.1.2 | <i>A Labor Market Distortion</i> | 146 |
| 7.2 | Second-Best Optimal Pollution Levels | 148 |
| 7.2.1 | <i>Non-revenue Raising Environmental Policy</i> | 148 |
| 7.2.2 | <i>Revenue Raising Environmental Policy</i> | 154 |
| 7.2.3 | <i>Prospects for a Double Dividend?</i> | 159 |
| 7.2.4 | <i>Second-Best Optimal Pollution</i> | 160 |
| 7.3 | An Extended Example | 161 |
| 7.3.1 | <i>Setting an Environmental Standard</i> | 162 |
| 7.3.2 | <i>Setting an Emission Tax</i> | 163 |
| 7.3.3 | <i>A Numerical Example</i> | 164 |
| 7.4 | Policy Instruments | 165 |

| | | |
|----------|---|------------|
| 7.4.1 | <i>Taxes and Auctioned Permits</i> | 165 |
| 7.4.2 | <i>Freely Distributed Permits and Command and Control</i> | 166 |
| 7.4.3 | <i>Subsidies</i> | 167 |
| 7.5 | Generalizations and Empirical Evidence | 167 |
| 7.5.1 | <i>A Generalization</i> | 167 |
| 7.5.2 | <i>Empirical Research and Policy Implications</i> | 169 |
| 7.6 | Summary | 170 |
| 7.7 | Further Reading | 171 |
| | Exercises | 172 |
| 8 | Institutional Topics in Cap and Trade Programs | 175 |
| 8.1 | The Spatial Dimension | 176 |
| 8.1.1 | <i>A Spatial Pollution Model</i> | 176 |
| 8.1.2 | <i>Decentralization</i> | 177 |
| 8.2 | The Temporal Dimension | 178 |
| 8.2.1 | <i>A Two-Period Model</i> | 179 |
| 8.2.2 | <i>Should Banking Be Allowed?</i> | 180 |
| 8.3 | Market Power | 182 |
| 8.4 | Transaction Costs | 187 |
| 8.4.1 | <i>Modeling Transaction Costs</i> | 187 |
| 8.5 | Initial Allocation Schemes | 191 |
| 8.5.1 | <i>Closed Trading Systems</i> | 192 |
| 8.5.2 | <i>Open Trading Systems</i> | 195 |
| 8.6 | Overlapping Regulations | 196 |
| 8.6.1 | <i>Permit Trading and Emission Taxes</i> | 196 |
| 8.6.2 | <i>Emission Trading and Emission Policies</i> | 197 |
| 8.7 | Monitoring and Compliance | 198 |
| 8.7.1 | <i>A Simple Model with Monitoring and Punishment</i> | 198 |
| 8.7.2 | <i>Incremental Punishment and Costly Monitoring</i> | 199 |
| 8.7.3 | <i>Second-Best Optimal Inspection Policy with Costly Inspection</i> | 200 |
| 8.7.4 | <i>Compliance and Monitoring Under Cap and Trade</i> | 201 |
| 8.8 | Summary | 203 |
| 8.9 | Further Reading | 205 |
| | Appendix: An Example of Beneficial and Harmful Banking | 205 |
| | Exercises | 207 |
| 9 | Ambient Pollution Control | 212 |
| 9.1 | Deterministic Non-point Source Pollution | 213 |
| 9.2 | Stochastic Ambient Pollution | 215 |
| 9.2.1 | <i>The Constrained Social Optimum</i> | 216 |
| 9.2.2 | <i>Decentralization of the Social Optimum</i> | 219 |
| 9.2.3 | <i>Uniform Tax</i> | 222 |
| 9.2.4 | <i>When Firms Can Observe their Idiosyncratic Shocks</i> | 223 |
| 9.2.5 | <i>When Firms Have Several Choices</i> | 224 |
| 9.2.6 | <i>Non-linear Tax Scheme</i> | 224 |
| 9.3 | Other Approaches | 225 |

| | | |
|-----------|--|------------|
| 9.4 | Policy and Experimental Evidence | 226 |
| 9.5 | Summary | 228 |
| 9.6 | Further Reading | 229 |
| | Appendix A: Second-Best Optimal Firm-Specific Taxes with Multiple Inputs | 229 |
| | Appendix B: Derivation of (9.39) | 231 |
| | Exercises | 231 |
| 10 | Liability | 234 |
| 10.1 | Basic Model | 235 |
| 10.2 | Liability Rules for a Solvent Firm | 238 |
| | 10.2.1 <i>Strict Liability</i> | 238 |
| | 10.2.2 <i>Negligence Rule</i> | 239 |
| 10.3 | Liability Rules for a Judgment-Proof Firm | 240 |
| | 10.3.1 <i>Strict Liability</i> | 241 |
| | 10.3.2 <i>Negligence Rule</i> | 243 |
| 10.4 | Liability Rules If Insurance is Available | 244 |
| | 10.4.1 <i>Risk Neutrality</i> | 245 |
| | 10.4.2 <i>Risk Aversion</i> | 246 |
| | 10.4.3 <i>Compulsory Insurance</i> | 251 |
| | 10.4.4 <i>Lender Liability</i> | 253 |
| 10.5 | Alternative Causality | 254 |
| | 10.5.1 <i>Model Extension</i> | 254 |
| | 10.5.2 <i>Proportional Liability</i> | 255 |
| | 10.5.3 <i>Collective Liability</i> | 256 |
| | 10.5.4 <i>Costly Monitoring</i> | 256 |
| 10.6 | Multi-causality | 257 |
| 10.7 | Examples of Environmental Liability Laws | 258 |
| 10.8 | Summary | 260 |
| 10.9 | Further Reading | 261 |
| | Appendix A: Proof of Proposition 10.5 | 262 |
| | Appendix B: Proof of Proposition 10.6 | 262 |
| | Appendix C: Proof of Proposition 10.7 | 263 |
| | Exercises | 264 |
| 11 | Innovation and Adoption of New Technology | 267 |
| 11.1 | The Private Innovation Model | 268 |
| | 11.1.1 <i>Decentralized Decisions</i> | 269 |
| 11.2 | Investment Spillovers | 270 |
| | 11.2.1 <i>Second-Best Optimal Environmental Policy</i> | 271 |
| 11.3 | Discrete Adoption Decisions | 272 |
| | 11.3.1 <i>Additional Model Features</i> | 272 |
| | 11.3.2 <i>Adoption Incentives Under Different Policy Instruments</i> | 274 |
| | 11.3.3 <i>Ranking of Policy Instruments</i> | 279 |
| | 11.3.4 <i>The Socially Optimal Degree of Technology Adoption</i> | 282 |
| | 11.3.5 <i>Decentralization of Optimal Solution</i> | 285 |
| 11.4 | Environmental R&D and Licensing | 288 |

| | | |
|-----------|--|------------|
| 11.4.1 | <i>Value of a General Process Innovation</i> | 289 |
| 11.4.2 | <i>A Model of R&D</i> | 290 |
| 11.4.3 | <i>A Model of Environmental Innovation</i> | 291 |
| 11.5 | A Comprehensive Model of R&D and Technology Adoption | 293 |
| 11.5.1 | <i>Socially Optimal Allocation</i> | 294 |
| 11.5.2 | <i>Decentralized Decision-Making and First-Best Regulation</i> | 295 |
| 11.5.3 | <i>Second-Best Analysis: Environmental Policy Only</i> | 297 |
| 11.6 | Experimental evidence | 303 |
| 11.7 | Summary | 304 |
| 11.8 | Further Reading | 306 |
| | Appendix A: Derivation of (11.92) | 307 |
| | Appendix B: Ex Ante Regulation After R&D and Technology Pricing | 307 |
| | Appendix C: Simultaneous Decisions on the Tax Rate and Technology Price | 309 |
| | Appendix D: Derivation of (11.101) | 310 |
| | Exercises | 310 |
| 12 | International Environmental Problems | 313 |
| 12.1 | Transboundary Pollution in an Autarky Model | 315 |
| 12.1.1 | <i>Model</i> | 315 |
| 12.1.2 | <i>Non-cooperative Behavior</i> | 316 |
| 12.1.3 | <i>Cooperative Behavior</i> | 316 |
| 12.2 | Commodity Transfer | 318 |
| 12.3 | Multiple Commodities and Proper Trade | 321 |
| 12.3.1 | <i>Model Extension</i> | 322 |
| 12.3.2 | <i>Efficient Allocation</i> | 322 |
| 12.3.3 | <i>Unilateral Environmental Policy in a Small Open Economy</i> | 324 |
| 12.4 | Large Open Economies | 325 |
| 12.4.1 | <i>Optimal Unilateral Policy with a Foreign Emission Tax</i> | 326 |
| 12.4.2 | <i>Optimal Unilateral Policy with a Foreign Emission Standard</i> | 330 |
| 12.4.3 | <i>Internationally Mobile Factors</i> | 332 |
| 12.4.4 | <i>Separation of Instruments</i> | 332 |
| 12.5 | Imperfect Competition and Environmental Dumping | 333 |
| 12.5.1 | <i>Extension of the Basic Model to Imperfect Competition</i> | 334 |
| 12.6 | Interactions with Energy Markets | 336 |
| 12.6.1 | <i>Model Adjustments</i> | 336 |
| 12.6.2 | <i>Spatial Leakage</i> | 337 |
| 12.6.3 | <i>Intertemporal Leakage and the Green Paradox</i> | 338 |
| 12.7 | International Coalition Formation | 340 |
| 12.8 | Kyoto Mechanisms: JI and CDM | 341 |
| 12.9 | Does Trade Liberalization Induce More or Less Pollution? | 344 |
| 12.9.1 | <i>A Stylized Ricardian Model</i> | 344 |
| 12.10 | Summary | 347 |
| 12.11 | Further Reading | 348 |

| | | |
|----------------------------------|--|------------|
| | Appendix: Proof of Proposition 12.2 | 349 |
| | Exercises | 351 |
| 13 | Accumulating Pollutants | 353 |
| 13.1 | The Accumulating Pollutant Cost-Damage Model | 354 |
| | 13.1.1 <i>Stock Dynamics</i> | 354 |
| | 13.1.2 <i>Abatement Cost and Damage</i> | 354 |
| 13.2 | Dynamic Optimality | 355 |
| | 13.2.1 <i>Discrete Time</i> | 355 |
| | 13.2.2 <i>Continuous Time</i> | 357 |
| | 13.2.3 <i>The Steady State</i> | 358 |
| | 13.2.4 <i>Optimal Path to the Steady State</i> | 360 |
| | 13.2.5 <i>Phase Diagrams</i> | 361 |
| | 13.2.6 <i>Policy Instruments and Decentralized Decision-Making</i> | 367 |
| | 13.2.7 <i>Final Remarks</i> | 368 |
| 13.3 | Exhaustible Resources and Pollution Control | 368 |
| | 13.3.1 <i>Pure Resource Extraction Model</i> | 369 |
| | 13.3.2 <i>Optimal Extraction of a Polluting Resource</i> | 371 |
| 13.4 | Summary | 375 |
| 13.5 | Further Reading | 376 |
| | Appendix A: Introduction to the Calculus of Optimal Control | 376 |
| | Appendix B: Linear Marginal Damage and Marginal Abatement Cost Curves | 379 |
| | Appendix C: Proof of Proposition 13.1 | 381 |
| | Exercises | 386 |
| PART III VALUING THE ENVIRONMENT | | |
| 14 | Theory of Applied Welfare Analysis | 391 |
| 14.1 | General Setup | 392 |
| 14.2 | Price Change Welfare Measures | 394 |
| | 14.2.1 <i>Compensating and Equivalent Variation</i> | 394 |
| | 14.2.2 <i>Consumer Surplus</i> | 398 |
| | 14.2.3 <i>Towards Measurement</i> | 402 |
| 14.3 | Quantity Change Welfare Measures | 405 |
| | 14.3.1 <i>Compensating and Equivalent Variation</i> | 406 |
| | 14.3.2 <i>The Fundamental Challenge of Measurement</i> | 409 |
| 14.4 | WTP and WTA | 410 |
| 14.5 | Welfare Analysis Under Uncertainty | 413 |
| 14.6 | Summary | 416 |
| 14.7 | Further Reading | 417 |
| | Exercises | 418 |
| 15 | Revealed Preference Models | 420 |
| 15.1 | The Fundamental Challenge Revisited | 421 |
| | 15.1.1 <i>A Direct Approach</i> | 422 |
| | 15.1.2 <i>An Indirect Approach</i> | 423 |
| | 15.1.3 <i>Why Revealed Preference?</i> | 424 |

| | | |
|-----------|---|------------|
| 15.2 | Complements | 425 |
| | 15.2.1 Ordinary Demand Functions | 427 |
| | 15.2.2 Specifying Ordinary Demand Equations | 431 |
| | 15.2.3 Application Preview | 434 |
| 15.3 | Substitutes | 434 |
| | 15.3.1 Technology and Behavior | 435 |
| | 15.3.2 Exact Welfare Measures | 438 |
| | 15.3.3 Bounding Results | 440 |
| | 15.3.4 Application Preview | 441 |
| 15.4 | Quality-Differentiated Market Goods | 442 |
| | 15.4.1 Hedonic Model | 443 |
| | 15.4.2 Application Preview | 448 |
| 15.5 | Summary | 449 |
| 15.6 | Further Reading | 450 |
| | Appendix A: Proof of Proposition 15.2 | 450 |
| | Appendix B: Proof of Proposition 15.3 | 453 |
| | Appendix C: Proof of Proposition 15.4 | 454 |
| | Exercises | 455 |
| 16 | Discrete Choice Models | 457 |
| 16.1 | Conceptual Basis | 458 |
| | 16.1.1 Theoretical Discrete Choice Model | 458 |
| | 16.1.2 Towards an Empirical Model | 460 |
| | 16.1.3 A Running Example | 461 |
| 16.2 | Basic Econometrics | 462 |
| | 16.2.1 Conditional Logit Model | 463 |
| | 16.2.2 Specification | 464 |
| 16.3 | Identification | 468 |
| 16.4 | Features of the Logit Model | 472 |
| 16.5 | Advanced Econometrics | 473 |
| 16.6 | Welfare Computation | 477 |
| | 16.6.1 The Linear in Parameters Logit Model | 477 |
| | 16.6.2 The Role of Income | 479 |
| 16.7 | Summary | 480 |
| 16.8 | Further Reading | 482 |
| | Exercises | 482 |
| 17 | Recreation | 485 |
| 17.1 | Theoretical Model | 487 |
| | 17.1.1 Underlying Assumptions | 488 |
| | 17.1.2 Some Generalizations | 489 |
| 17.2 | Data Structures | 491 |
| | 17.2.1 A Running Example | 492 |
| 17.3 | Empirical Models | 493 |
| | 17.3.1 Demand Systems | 494 |
| | 17.3.2 RUM Models | 499 |
| | 17.3.3 Corner Solution Models | 506 |

| | | |
|-----------|---|------------|
| | 17.3.4 <i>Summary of Empirical Models</i> | 514 |
| 17.4 | Modeling Issues | 514 |
| | 17.4.1 <i>Choice Set Definition</i> | 515 |
| | 17.4.2 <i>Opportunity Cost of Time</i> | 517 |
| | 17.4.3 <i>Onsite Time</i> | 521 |
| | 17.4.4 <i>Dynamics</i> | 523 |
| 17.5 | Summary | 524 |
| 17.6 | Further Reading | 525 |
| | Exercises | 525 |
| 18 | Property Value Models | 529 |
| 18.1 | Hedonic Property Value Models: Theory | 530 |
| | 18.1.1 <i>Consumer's Choice Problem</i> | 531 |
| | 18.1.2 <i>A Running Example</i> | 536 |
| 18.2 | Hedonic Property Value Models: Welfare Measurement | 536 |
| | 18.2.1 <i>Localized Changes in Quality</i> | 537 |
| | 18.2.2 <i>General Equilibrium Effects</i> | 539 |
| 18.3 | Hedonic Property Value Models: Estimation | 541 |
| | 18.3.1 <i>First Stage Estimation</i> | 541 |
| | 18.3.2 <i>Second Stage Estimation</i> | 546 |
| 18.4 | Structural Models | 552 |
| | 18.4.1 <i>Discrete Choice Models</i> | 553 |
| | 18.4.2 <i>Sorting Models</i> | 556 |
| | 18.4.3 <i>Advantages and Disadvantages of a Structural Approach</i> | 560 |
| 18.5 | Quasi-experimental Approaches | 561 |
| | 18.5.1 <i>Background and Motivation</i> | 561 |
| | 18.5.2 <i>Alternative Identification Strategies</i> | 564 |
| | 18.5.3 <i>Structural Versus Quasi-experimental Analysis</i> | 567 |
| 18.6 | Summary | 568 |
| 18.7 | Further Reading | 570 |
| | Exercises | 570 |
| 19 | Stated Preference Methods | 572 |
| 19.1 | Stated Preference Approaches | 574 |
| | 19.1.1 <i>Contingent Valuation Method</i> | 576 |
| | 19.1.2 <i>Discrete Choice Experiments</i> | 579 |
| | 19.1.3 <i>Contingent Behavior</i> | 582 |
| 19.2 | Empirical Models for Stated Preference Data | 583 |
| | 19.2.1 <i>Binary Choice</i> | 583 |
| | 19.2.2 <i>Discrete Choice Experiments</i> | 589 |
| 19.3 | Incentive Properties of Stated Preference Surveys | 592 |
| | 19.3.1 <i>Incentive Properties of CVM</i> | 593 |
| | 19.3.2 <i>Incentive Properties of Discrete Choice Experiments</i> | 595 |
| 19.4 | Validity | 596 |
| | 19.4.1 <i>Criterion Validity</i> | 597 |
| | 19.4.2 <i>Convergent Validity</i> | 599 |

| | | | |
|--|--------|--|------------|
| | 19.4.3 | <i>Construct Validity</i> | 600 |
| | 19.4.4 | <i>Content Validity</i> | 601 |
| 19.5 | | Best Practice and Experimental Design | 603 |
| | 19.5.1 | <i>Best Practice</i> | 604 |
| | 19.5.2 | <i>Experimental Design</i> | 607 |
| 19.6 | | Combining SP and RP Data | 609 |
| | 19.6.1 | <i>Methodological Topics</i> | 609 |
| | 19.6.2 | <i>When Should RP and SP Data Be Combined?</i> | 611 |
| 19.7 | | Summary | 612 |
| 19.8 | | Further Reading | 613 |
| | | Exercises | 614 |
| 20 | | Health Valuation | 617 |
| 20.1 | | Mortality Risk Valuation – Modeling | 619 |
| | 20.1.1 | <i>Static Model</i> | 619 |
| | 20.1.2 | <i>Life Cycle Model</i> | 622 |
| | 20.1.3 | <i>Lessons from Theory</i> | 627 |
| 20.2 | | Mortality Risk Valuation – Empirical Models | 627 |
