1985

Acknowledgments v

1. Introduction and Overview, F. Thomas Juster and Frank P. Stafford 1
Conceptual Framework 2
Part I: Methodological Issues 4
Part II: Conceptualization and Description 8
Part III: Modeling Behavior 13

PART I: METHODOLOGICAL ISSUES

; i

2. Conceptual and Methodological Issues Involved in the Measurement of Time Use, F. Thomas Juster 19
Introduction 19
Time as a Unit of Measure 19
Money vs. Time: Some Differences 20
Administrative Needs 21
Accounting Period 22
Double-Entry Accounting 22
Equilibrium Properties 23
Constraints and Control Totals 23
Salience and Recall 24
Alternative Methodologies 25
Available Data from Administrative Sources 25
Direct Observation 26
Frequency and Duration Surveys 27
Estimates from Time Diaries 28

3. The Validity and Reliability of Diaries versus Alternative Time Use Measures, John P. Robinson	33
Validity Studies	34
Ann Arbor Sample	34
Jackson Sample	35
National Sample	38
Social Desirability	40
Brief or "Background" Activities	41
Aggregate Reliability or Consistency	41
Nondiary or Stylized Time Use	45
Multiple Activities	46
Single Activities	50
Concluding Comments	59
4. The Validity and Quality, of Time Use Estimates Obtained from Recall Diaries, F. Thomas Juster	63
Introduction	63
Indirect Tests of Validity	65
Tests of Data Quality	65
Analytic Framework	66
Empirical Results	71
Direct Evidence on Validity	79
Respondent/Spouse Matches	79
"Stylized Reconstruction"	83
Analytic Evidence on Validity	86
Conclusions	88
5. Sample Design Issues in Time Diary Studies, Graham Kalton	93
Reliability of Time Use Estimates	101
Estimation of Mean Time Spent on Particular Activities and the Optimum Number of Weekdays Sampled	103
Estimating a Regression Equation	105
Application of Theoretical Results	108
PART II: CONCEPTUALIZATION AND DESCRIPTION	
6. A Conceptual Framework for the Analysis of Time Allocation Data, F. Thomas Juster, Paul N. Courant, and Greg K. Dow	113
Introduction	113
Resources, Activities, and Outcomes	117
Specification of System Elements	117
Formal Framework of the System	122
Introduction	122

Basic System Elements123
Basic System Characteristics126
Appendix 6.A: The Value-Added Problem in Measuring Net Social Output127
7. Patterns of Time Use, Martha S. Hill133
Introduction133
Data134
Typical Pattern of Adult Time Use135
Personal Care137
Market Work137
Passive Leisure138
House/Yard Work138
Social Entertainment138
Active Leisure139
Services/Shopping139
Organizations and Child Care139
Education140
Differences Between Men and Women142
Differences Across Age Subgroups150
Regional Variations154
Day-of-Week Variations157
Seasonal Variations161
Vacation-Related Differences in Time Use165
Summary166
8. Investments of Time by Men and Women, F. Thomas Juster177
Introduction177
The Time Allocation Data Base181
Theoretical Considerations181
Psychological Perceptions183
Empirical Estimates185
Basic Findings187
Descriptive/Analytic Relationships193
Appendix 8.A: Scaling the Investment Fractions Using Process Benefit Ratings202
9. Investments of Time in Houses and Durables, Martha S. Hill205
Introduction205
Valuing Nonmarket Productive Activity206
Time Use Data210
Analysis211
Patterns of Repair and Maintenance Work211
Comparison of Time Use Estimates217

Modeling Repair/Maintenance Activity.	220
Theoretical Framework	221
Empirical Model	225
Effects of Independent Variables.	230
Relationship Between the True Measure of Time Spent in Repair/Maintenance and Its Indicators.	232
Summary and Implications for Future Research	233
Appendix 9. A: Comparisons of Time Use Study Estimates - of Time and Money Inputs to Home Production with Those from Other Sources.	234
Comparison of Market-Wage and Value-Added Estimates of Dollar Values of Time Inputs.	234
Comparison of Time Use Study Estimates of Market Purchases with Those from Other Sources.	237
10. The Use of Time and Technology by Households in the United States, Frank P. Stafford and Greg J. Duncan.	245
Introduction	245
Break Time, Work Pace, and On-the-Job Training- Some Descriptive Statistics.	250
Life-Cycle Variations in Time Use While at Work	264
Nonmarket Time Use of Those in the Labor Market	269
Descriptive Statistics.	269
Substitution and Income Effects on Market and Nonmarket Time Use for Married Men	274
Organization of Household Production.	278
Summary.	282
11. Changes in Time Use: An Historical Overview, John P. Robinson.	289
The Value of Time Diary Data in Analyzing Social Change	290
Methods of Comparison.	291
Empirical Results.	298
Multivariate Controls.	300
Differences for Population Subgroups.	304
Summary and Conclusions.	306
12. A Note on Recent Changes in Time Use, F. Thomas Juster.	313
Panel Results.	323
Appendix 12.A: Components of Activity Aggregates.	330
13. Preferences for Work and Leisure, F. Thomas Juster.	333
The Data Base.	334
Reliability.	337

14. How Children Use Time, Susan Goff Timmer, Jacquelynne Eccles, and Kerth O'Brien	353
Survey Design	353
Nature of the Questionnaire	354
Issues in Using Children's Time Use Data	355
Accuracy of Interpreting Differences in Children's Time Use	358
Parents' Time Use	361
Maternal Employment and Parents' Use of Time	362
Parents' Educational Attainment and Use of Time	363
Mothers' Marital Status and Mothers' Time Use	363
Presence of Babies in the Household and Parents' Time Use	364
Children's Time Use	365
Differences Between Boys' and Girls' Time Use	365
Age Differences	366
Interactions Between Age and Sex	370
Relationship Between Mothers' Marital Status and Children's Time Use	371
Maternal Employment Status and Children's Time Use	373
Indicators of Socioeconomic Status and Children's Time Use	375
Presence of Babies in the Household and Children's Use of Time	379
Summary	380

PART III: MODELING BEHAVIOR

15. Issues in Modeling Behavior with Time Use Data, Frank P. Stafford	383
Measurement Error and Economic Models of Time Use	384
Analysis of Household Behavior Using Time Diary Information	386
Labor Supply	386
Marriage and the Division of Household Responsibility	389
Analysis of Time-of-Day Patterns	390
Panel Analysis	393
16. Goods, Time, and Well-Being: The Joint Depend- ence Problem, Greg K. Dow and F. Thomas Juster	397
Goods and Time	399
Characteristics of the Data	402
Process Well-Being: Description and Distributional Findings	403
17. Parental Care of Children: Time Diary Estimates of Quantity, Predictability, and Variety, C. Russell Hill and Frank P. Stafford	415
Previous Studies	416

Empirical Results	421
Conclusion	435
18. Constraints and Complementarities in Time Use,	
Martha S. Hill and F. Thomas Juster	439
Theoretical Structure	440
Constraints	440
Productivity and Skills	442
Preferences	443
Methodological Issues	444
Empirical Models of Activity	446
Independent Variables	446
Dependent Variables	448
Expected Effects of Predictor Variables	449
Regression Results	454
Summary	465
Appendix 18.A: Activity Classification Scheme Used in the	
Analysis	467
19. Lifetime Fertility, Child Care, and Labor Supply,	
C. Russell Hill and Frank P. Stafford	471
A Theoretical Approach: Quantity, Quality, and Earnings	
Capacity	473
Econometric Model	478
The Distinction Between Lifetime and	
Short-Run Responses	478
An Econometric Model of Lifetime Decisions	479
Empirical Results for the Lifetime Model	484
Discussion and Conclusions	488
20. Implications of Home Production and Inventory	
Adjustment Processes for Time-of-Day Demand for	
Electricity, Daniel H. Hill	493
Introduction	493
Optimal Inventory Policy	494
Data and Analysis	500
Assessing the Relative-Importance of Various Home Activities	
on the Residential Curve	507
Conclusions and Directions for Future Research	512
PART IV: DESCRIPTION OF AVAILABLE TIME USE	
DATA BASES	515
References	529
