

# Quantitative Development Policy Analysis

Elisabeth Sadoulet  
Alain de Janvry

THE JOHNS HOPKINS UNIVERSITY PRESS  
BALTIMORE AND LONDON

# Contents

List of Figures.....	xi
List of Tables.....	xii
Preface.....	xiv
Chapter 1. The Quantitative Analysis of Development Policy.....	1
1.1. Approaches to Development Theory: The Role of the State and Policy.....	1'
1.2. Rationales for Government Intervention.....	3
1.2.1. Efficiency Oriented Interventions.....	3
1.2.2. Nonefficiency Oriented Interventions.....	4
1.3. Conceptual Framework.....	5
1.4. The Role of Quantitative Policy Analysis.....	7
1.5. Criteria for Policy Evaluation.....	10
1.5.1. Welfare.....	11
1.5.2. Political Feasibility.....	23
Exercise 1. Production Function: Technological Change and Factor Substitutability ....	25
References.....	29
Chapter 2. Demand Analysis.....	32
2.1. Objectives of Demand Analysis and Role of Theory.....	32
2.1.1. Demand Analysis for Policy Making.....	32
2.1.2. Alternative Approaches to the Analysis of Demand.....	33
2.2. Theory of Consumer Behavior and Demand Analysis.....	34
2.2.1. Basic Model.....	34
2.2.2. Separability and Stepwise Budgeting.....	36
2.3. Estimation of Engel Functions.....	37
2.4. Estimation of Price Elasticities from Cross-Sectional Data*.....	38
2.5. Estimation of Complete Demand Systems.....	41
2.5.1. The Linear Expenditure System.....	42
2.5.2. The Almost Ideal Demand System.....	43
2.5.3. The Generalized Almost Ideal Demand System.....	44
2.5.4. Estimation Problems*.....	44
2.5.5. Effects of Household Characteristics*.....	46
2.6. Examples.....	47
2.6.1. LES and AIDS Estimations.....	47
2.6.2. Numerical Values.....	48
2.6.3. Quantity and Quality Elasticities.....	49
2.7. Policy Implications.....	49
2.7.1. Setting Commodity Priorities in Agricultural Research for Nutritional Improvement.....	49
2.7.2. The Relationship between Calorie Intake and Income.....	51
Exercise 2. Food Subsidies in Morocco.....	52
References.....	59

Chapter 3. The Profit Function Approach to Supply and Factor Demand.....	61
3.1. The Basic Theory of Production.....	62
3.1.1. The Profit Function.....	62
3.1.2. The System of Output Supply and Factor Demand.....	63
3.2. Examples of Profit Functions and Derived Systems of Output Supply and Factor Demand.....	64
3.2.1. Normalized Cobb-Douglas.....	64
3.2.2. Generalized Leontief.....	65
3.2.3. Normalized Quadratic.....	65
3.2.4. Translog.....	66
3.3. Cost Function and Associated Systems of Factor Demands.....	66
3.4. Estimation of the System.....	67
3.5. Examples.....	68
3.5.1. The Role of Public Goods in the Punjab.....	68
3.5.2. Agricultural Price Policy in Argentina.....	70
3.6. Short-Run versus Long-Run Supply Response.....	72
3.7. Aggregate Supply Response.....	73
3.7.1. Linking the Aggregate Elasticity to the Factor Supply.....	75
3.7.2. Econometric Estimates.....	76
Exercise 3. Price Incentives and Public Goods for Indian Agriculture.....	78
References.....	82
Chapter 4. Supply Response: Expectations Formation and Partial Adjustment.....	84
4.1. Alternative Approaches to the Measurement of Supply Response.....	84
4.1.1. Structural Form Approaches: Estimation of the Structure and Derivation of the Supply Response.....	84
4.1.2. Reduced Form Approaches: Direct Estimation of the Supply Response.....	85
4.2. Nerlovian Models of Supply Response.....	86
4.2.1. The General Nerlovian Supply Response Model.....	86
4.2.2. Restricted Nerlovian Supply Response Model.....	88
4.2.3. Simplified Models with either No Partial Adjustment or No Expectations Formation.....	88
4.3. Results Using Nerlovian Models of Supply Response.....	90
4.4. Examples of Nerlovian Models.....	92
4.4.1. Supply Response of Maize in Thailand under Risk.....	92
4.4.2. Supply Response under Controlled Prices in Egypt.....	92
4.4.3. Other Supply Response Studies.....	95
4.5. Producer Response to Lagged Prices and the Dynamics of Markets.....	96
4.6. Alternative Expectations Models.....	98
4.7. The Rational Expectations Approach*.....	99
4.7.1. General Model.....	99
4.7.2. Estimating Supply Response.....	100
4.7.3. Criticisms of the Rational Expectations Approach.....	102
Exercise 4. Supply Response for Groundnuts in Sub-Saharan Africa.....	102
References.....	110

Chapter 5. Behavior and Welfare under Risk.....	112
5.1. Price Determination and Sources of Fluctuations.....	112
5.2. Impact of Price Risk on the Level and Variability of Agricultural Income.....	113
5.3. Measuring the Cost of Risk.....	116
5.3.1. Certainty Equivalent Income and Risk Premium.....	116
5.3.2. Risk Aversion.....	118
5.3.3. Utility Functions with Constant Absolute or Relative Risk Aversion.....	119
5.3.4. The Magnitude of Income Risk.....	120
5.4. Welfare and Supply of Risk-Neutral Farmers.....	120
5.5. Welfare and Supply of Risk-Averse Farmers.....	122
5.6. The Household's Response to Price Risk*.....	124
5.7. Instruments of Price Stabilization.....	126
5.8. Market Integration and Price Stabilization.....	127
5.9. Measures of Food Security at the National Level.....	129
5.10. Example: Evaluation of the Brazilian Price Band Proposal.....	132
Exercise 5. Food Security in India.....	134
References.....	138
Chapter 6. Household Models.....	140
6.1. Household Behavior and Policy Analysis.....	140
6.2. Integrating Producer, Consumer, and Worker Decisions into a Household Problem.....	141
6.2.1. Producer Problem.....	141
6.2.2. Consumer Problem.....	142
6.2.3. Worker, Problem.....	142
6.2.4. Consumer-Worker Problem.....	142
6.2.5. Household Problem.....	143
6.3. Specification of a Household Model.....	143
6.3.1. Home Time.....	143
6.3.2. Definition of the Household Unit.....	144
6.3.3. Who Decides?.....	144
6.3.4. Net Buyers versus Net Sellers of Food and/or Labor.....	144
6.4. Separable Household Model with Perfect Markets.....	145
6.4.1. The Model and Its Solution.....	145
6.4.2. Comparative Statics Results.....	146
6.4.3. Empirical Results with Separable Models.....	148
6.5. Household Model with Market Failures.....	149
6.5.1. Why Markets Fail.....	149
6.5.2. A Household Model with Market Failures and Credit Constraint.....	151
6.5.3. Empirical Results with Nonseparable Models.....	154
6.6. When and How to Use a Household Model.....	159
6.6.1. When to Use Which Approach?.....	159
6.6.2. Econometric Estimation of Household Models and Tests of Separability*.....	160
6.6.3. Econometric Estimation of Supply or Marketed Surplus When There Are Price Bands.....	162
6.6.4. Calibration and Simulation with a Household Model.....	163
6.7. Intertemporal Household Models.....	164

6.7.1. Basic Intertemporal Consumption Model under Certainty: Life-Cycle Model.....	164
6.7.2. Permanent Income Model under Income Uncertainty.....	165
6.7.3. Liquidity Constraint and Household Strategies to Mitigate Risk.....	166
6.7.4. Empirical Evidence on Risk Coping and Risk Management.....	167
Exercise 6. Household Responses to Price Incentives.....	168
References.....	173
Chapter 7. Price Distortions: Indicators and Partial Equilibrium Analysis.....	176
7.1. Reference Prices.....	176
7.2. Indicators of Protection and Incentives.....	178
7.2.1. Nominal and Real Protection.....	178
7.2.2. Effective and Real Effective Protection.....	179
7.2.3. Effective Subsidy Coefficient (ESC).....	182
7.2.4. Producer and Consumer Subsidy Equivalents (PSE and CSE).....	183
7.2.5. Direct, Indirect, and Total Nominal Protection Rates.....	184
7.3. Indicators of Comparative Advantage.....	185
7.4. Partial Equilibrium Analysis of Price Distortions.....	189
7.4.1. The Concepts of Consumer and Producer Surplus.....	189
7.4.2. Measurement of the Partial Equilibrium Effects of an Export Tax on Agriculture.....	191
7.4.3. Partial Equilibrium Analysis of Other Price Interventions.....	193
7.5. Effective Protection When Domestic and Foreign Commodities Are Imperfect Substitutes*.....	204
7.6. Political Economy of Price Distortions.....	206
Exercise 7. Effects of Price Distortions and Investment in Research on Efficiency and Welfare.....	208
References.....	212
Chapter 8. The Real Exchange Rate.....	214
8.1. Market and Effective Exchange Rates.....	214
8.2. The Market for Foreign Currency and the Real Exchange Rate.....	215
8.3. The Equilibrium Exchange Rate.....	218
8.3.1. The Purchasing Power Parity Equilibrium Exchange Rate.....	218
8.3.2. The Elasticity Approach.....	219
8.4. Forces Affecting the Real Exchange Rate.....	221
8.4.1. Shift in Export Earnings from Productivity Change or Commodity Boom.....	223
8.4.2. Shift in Import Demand from Price Shock or Expansionary Domestic Policies.....	225
8.4.3. Capital Outflow or Debt Accumulation.....	225
8.4.4. Trade Policies.....	226
8.5. Impact of Trade Distortions on the Real Exchange Rate.....	228
8.5.1. The Elasticity Approach.....	228
8.5.2. The Three-Sector Model and the $\alpha$ Factor*.....	229
8.5.3. Estimating the Equilibrium Exchange Rate with the CO Approach*.....	232
Exercise 8. Exchange Rate and Trade Policies in Pakistan.....	233
References.....	239

Chapter 9. Transactions Costs and Agrarian Institutions.....	241
9.1. Efficiency: Technical, Allocative, and Economic.....	242
9.1.1. Definitions.....	242
9.1.2. Measurements.....	244
9.2. Technical Change and Productivity Growth*.....	248
9.2.1. Disembodied Technical Change.....	248
9.2.2. Total Factor Productivity.....	250
9.2.3. Discrete Measures of Technical Change and TFP.....	251
9.2.4. Biased Technical Change.....	252
9.3. Efficiency and Productivity under Transactions Costs.....	254
9.3.1. The Concepts of Transactions Costs and Effective Prices.....	254
9.3.2. Measurement of Efficiency under Transactions Costs.....	255
9.3.3. Measurement of Total Factor Productivity under Transactions Costs.....	256
9.4. Household Behavior under Transactions Costs and Productivity Differentials.....	258
9.4.1. A Model of Household Behavior.....	258
9.4.2. Determinants of the Relation between TFP and Farm Size.....	261
9.5. Transactions Costs and Institutional Solutions: Sharecropping.....	262
Exercise 9. Relationship between Farm Size and Productivity: The Economics of Land Reform.....	266
References.....	270
Chapter 10. Input-Output Tables, Social Accounting Matrices, and Multipliers.....	273
10.1. Social Accounting Matrices.....	274
10.2. Example: A Social Accounting Matrix for Ecuador, 1980.....	276
10.3. Construction of a SAM: Data Requirements.....	280
10.4. The Measure of Agricultural Surplus.....	281
10.5. The Input-Output Model.....	285
10.5.1. Equations.....	285
10.5.2. Interpretation and Extension.....	287
10.6. SAM Multipliers.....	288
10.7. Applications and Extensions of the SAM Multiplier Analysis.....	291
Exercise 10. Input-Output and Social Accounting Matrix Multipliers in Morocco.....	295
References.....	301
Chapter 11. Multimarket Models.....	302
11.1. The Multimarket Approach.....	302
11.1.1. Consistency Frameworks.....	303
11.1.2. Mathematical Programming Approaches.....	303
11.1.3. Industry and Sectoral Econometric Models.....	306
11.2. Structural Logic of the Model.....	307
11.3. Equations of a Multimarket Model.....	309
11.4. Writing and Solving a Multimarket.....	311
11.5. Examples of Multimarket Analyses of Agricultural Policy.....	312
11.5.1. Incidence of the Green Revolution and Public Investments in India.....	312
11.5.2. Stabilization Policies and Agriculture in Senegal.....	320
11.6. Conclusion.....	323
Exercise 11.1. A Multimarket for the Grain-Livestock Sector in North Africa.....	323

Exercise 11.2. Policy Simulation with a Multimarket for Brazil.....	332
References.....	339
Chapter 12. Computable General Equilibrium Models.....	341
12.1. The Structure of CGE Models.....	342
12.1.1. Agents and Their Behavior.....	342
12.1.2. Market Equilibrium.....	342
12.1.3. Macroconstraints.....	343
12.1.4. Homogeneity and Numeraire.....	343
12.2. The Macroeconomics of CGE Models.....	344
12.2.1. Foreign Trade and the Real Exchange Rate.....	344
12.2.2. The Labor Market Closure.....	348
12.3. Construction of CGE Models.....	349
12.3.1. Flow Chart and Functional Specifications.....	349
12.3.2. Data Requirements.....	353
12.3.3. Alternative Closure Rules: Structuralist Models.....	354
12.3.4. Exogenous Variables: Definition of Shocks and Policies.....	355
12.4. Examples of CGE Analysis of Policy Scenarios.....	356
12.4.1. GATT and Increase in Food Import Price for Low-Income Countries.....	356
12.4.2. Stabilization Policies in Response to External Shocks: Efficiency, Welfare, and Political Feasibility.....	358
12.5. Extensions and Recent Developments.....	361
12.6. When to Use a CGE.....	362
Exercise 12. The Economics of Food Subsidies in a Computable General Equilibrium Model.....	363
References.....	371
Appendix. Some Mathematical Tools ..*	373
A.1. Elasticity.....	373
A.2. Taylor Expansion and Log-Linearization of a Function.....	375
A.3. Optimization Problems.....	377
A.4. Functional Forms of Production Functions.....	383
A.5. Functional Forms of Demand Systems: Derivation of Elasticities.....	386
Author Index.....	388
Subject Index.....	392

\* Sections marked with an asterisk contain more difficult material.
