

THEORY, METHODS, ANALYSSES

Ricardo A. Godoy

Columbia University Press
New York

Introduction xi

Acknowledgments xv

| | | |
|-----------|---|----|
| Part I | The Question, the Research Design, and the People | 1 |
| Chapter 1 | The Question and Its Significance | 3 |
| | Clearing the Underbrush | 9 |
| Chapter 2 | Comparing Approaches | 15 |
| | The Approach of Development Economists | 16 |
| | The Approach of Political Economists | 20 |
| | The Anthropological Approach | 23 |
| | The Model of Gross and Colleagues | 24 |
| | A Ricardian Model of Trade | 29 |
| | Conclusion | 32 |
| Chapter 3 | Research Design | 33 |
| | Definitions, Causality, and Functional Form | 33 |
| | Rationale for the Choice of Cultures | 36 |
| | Methods Used to Collect Information | 37 |
| | Sumu-Mayagna (Nicaragua) and Tawahka (Honduras) | 38 |
| | Mojeno and Yuracare (Bolivia) | 42 |
| | Tsimane' (Bolivia) | 43 |
| | Chiquitano (Bolivia) | 43 |
| | Quality of Information | 44 |
| | Sampling | 45 |
| | Conclusion | 46 |
| Chapter 4 | Ethnographic Sketches | 49 |
| | Tawahka | 52 |
| | Tsimane' | 57 |
| | Mojeno and Yuracare | 58 |
| | Chiquitano | 60 |
| | Similarities and Differences | 62 |
| | Conclusion | 65 |

| | | |
|----------------|---|------------|
| Part II | The Findings | 67 |
| Chapter 5 | Forest Clearance: Income, Technology, and Private Time Preference | 69 |
| | Rationale for the Choice of Indigenous People and of Old-Growth Forest to Study Deforestation | 70 |
| | The Model | 71 |
| | Hypotheses | 74 |
| | Previous Studies | 74 |
| | Variables | 76 |
| | Results | 80 |
| | Hypotheses 1-3: Forest Clearance and Income | 80 |
| | Hypothesis ,4: Forest Clearance and Crop Yields | 83 |
| | Hypothesis. 5: Forest Clearance and Private Time Preference | 84 |
| | Sensitivity Analysis and Controlling for Reverse Causality | 85 |
| | Conclusion | 85 |
| Chapter 6 | Game Consumption, Income, and Prices: Empirical Estimates and Implications for Conservation | 87 |
| | The Role of Income and Prices in Game Consumption: Implications for Conservation | 89 |
| | Goals, Variables, and Econometric Models | 91 |
| | Results | 92 |
| | Comparing Availability of Game in Rich and Poor Communities | 95 |
| | Conclusion | 96 |
| Chapter 7 | Chayanov and Netting: When Does Demography Matter? | 99 |
| | When Does Demography Matter? | 101 |
| | Goals and Econometric Approach | 102 |
| | Results | 105 |
| | Does Demography Matter After Controlling for Distance from Village to Town? | 105 |
| | Comparison of Autarkic and Non-Autarkic Households: Pooled Sample | 108 |

| | | |
|------------|--|-----|
| | Comparison of Autarkic and Non-Autarkic Households: Results by Ethnic Group | 110 |
| | Conclusion | 112 |
| Chapter 8 | Chayanov and Sahlins on Work and Leisure | 115 |
| | Cross-Cultural Evidence and Theory | 117 |
| | Goals | 118 |
| | Econometric Approach | 119 |
| | Potential Endogeneity and Fixed Effects | 121 |
| | Results | 122 |
| | Conclusion | 125 |
| Chapter 9 | Human Health: Does It Worsen with Markets? | 127 |
| | The Three Positions in the Debate | 128 |
| | Reasons for Divergent Views | 130 |
| | Hypotheses | 133 |
| | Definition and Measurement of Variables | 135 |
| | Econometric Models, Endogeneity, and Comparing Different Metrics | 140 |
| | The Limits of Bivariate Analysis: A Detour and Example | 142 |
| | Results of Multivariate Analysis | 144 |
| | Conclusion | 148 |
| | The Debate | 149 |
| Chapter 10 | Mishaps, Savings, and Reciprocity | 151 |
| | Definition, Measurement, and Estimation | 153 |
| | The Approach of Evolutionary Ecologists | 155 |
| | A New Approach to Reciprocity | 156 |
| | A Reduced-Form, Unrestricted Model of Savings | 158 |
| | Ethnographic Context of Misfortunes and Coping Mechanisms | 159 |
| | Savings in Domesticated Animals and Misfortunes | 163 |
| | Definition and Measurement of Variables | 164 |
| | Results | 166 |
| | Markets and Reciprocity | 166 |
| | Saving Out of Transitory or Permanent Income | 169 |
| | Conclusion | 169 |

CONTENTS

| | | |
|------------|---|------------|
| Chapter 11 | Trade and Cognition: On the Growth and Loss of Knowledge <i>(written with Nicholas Brokaw, David Wilkie, Daniel Colon, Adam Palermo, Suzanne Lye, and Stanley Wei)</i> | 173 |
| | A Ricardian Trade Model and the Loss of Knowledge | 174 |
| | Econometric Model | 175 |
| | Methods | 176 |
| | Test of Knowledge | 176 |
| | Household Socioeconomic and Demographic Surveys | 178 |
| | The Variables: Definition and Measurement | 178 |
| | Specialization | 183 |
| | Conclusion | 184 |
| Chapter 12 | Time Preference, Markets, and the Evolution of Social Inequality | 185 |
| | Delay of Gratification Among the Tsimane' | 186 |
| | The Determinants of Time Preferences: Tsimane' and Western Views | 188 |
| | Methods and Variables | 190 |
| | The Measurement of Time Preference and The Rationale for Using Food | 191 |
| | Information and Econometric Model | 192 |
| | Results | 193 |
| | A Hypothesis About Time Preference and Occupational Choice | 194 |
| | Conclusion | 196 |
| Part III | What We Have Learned | 199 |
| Chapter 13 | Conclusions | 203 |
| | Contribution to Anthropological Theory | 203 |
| | Contribution to Anthropological Methods | 205 |
| | Knowledge and Public Policy | 206 |
| | <i>Appendix</i> | 209 |
| | <i>References</i> | 213 |
| | <i>Index</i> | 241 |
