# Contents

<i>Contents of the Handbook</i>		xi
<i>List of figures</i>	<i>figures</i>	xv
<i>List of tables</i>		xvi
<i>List of contributors</i>		xix
<i>Preface</i>		xxv
<i>Acknowledgements</i>		xxxvi
1. On the subadditivity of cost functions		1
<i>Russel J. Cooper, W. Erwin Diewert and Terence J. Wales</i>		
Introduction		1
Specification of divisional cost functions		2
Overall cost function and economies of scale		6
Economies of joint production, scope or shared overheads		10
Combined economies of scale and scope		15
Specification of technical progress and the estimating form		21
Calculation of subadditivity measures		24
Empirical results		26
Conclusion		30
Appendix A		31
Appendix B	B	37
Appendix C		40
Appendix D		52
Appendix E		62
2. Cost function issues and estimation		74
<i>Yale M. Braunstein and Grant Coble-Neal</i>		
Introduction		74
Functional forms		75
Data issues		78
Technical change		82
Estimation and testing		86
Estimation results		91
Conclusion		95

3.	Telecommunications productivity	100
	<i>Laurits R. Christensen, Philip E. Schoech and Mark E. Meitzen</i>	
	Introduction	100
	Methodological issues	100
	Measurement of output	101
	Measurement of capital input	102
	Aggregation of inputs and outputs	103
	Studies of telecommunications TFP	105
	United States industry studies	105
	Results of other studies	108
	The effect of output growth on TFP growth	110
	The role of TFP in price cap regulation	113
	Conceptual basis	113
	Empirical implementation	114
	Conclusion	115
4.	Competition in local and long-distance telecommunications markets	120
	<i>T. Randolph Beard and George S. Ford</i>	
	Introduction	120
	Competition, sunk costs and market structure	121
	Competition and cross-subsidies in pricing	125
	Flow through of cost changes	128
	Fragmented duopoly	133
	Merger simulations	136
	Conclusion	141
5.	Telecommunications demand	145
	<i>Lester D. Taylor</i>	
	Introduction	145
	Basic features of telecommunications demand	145
	Theoretical considerations	149
	A generic model of access demand	149
	Models of toll demand	151
	Point-to-point toll demand	152
	Empirical studies	153
	Choice of class of local service: Train, McFadden and Ben-Akiva (1987)	153
	Bypass via extended area service: Kridel (1988)	157
	Point-to-point toll demand: Larson, Lehman and Weisman (1990)	160
	Two-stage budgeting and the total bill effect in toll demand: Zona and Jacob (1990)	162

An overview of the empirical literature	164
Challenges for the future	168
6. Retail telecommunications pricing in the presence of external effects	180
<i>Benjamin E. Hermalin and Michael L. Katz</i>	
Introduction	180
Access externalities	183
A reduced-form model	184
A richer model: per-message charges	189
Identifiably different user groups	194
(i) Differential access costs	194
(ii) Differential externalities	196
Dynamic pricing models	196
Carrier competition	200
(i) Compatible networks	200
(ii) Incompatible networks	203
Call externalities	203
One-way calling decisions	205
(i) Menus	215
(ii) Simultaneous connection and acceptance externalities	215
Two-way calling decisions	216
Cost differences across users	221
Sources of distortion	222
Repeat play and ongoing caller relationships	225
Conclusion	226
7. Vertical integration in telecommunications	232
<i>Dennis L. Weisman</i>	
Introduction	232
Supply-side considerations	233
Demand-side considerations	234
Public policy issues	235
Incentives for exclusionary behavior	236
Overview of theoretical literature - Cournot competition	236
Overview of theoretical literature - Bertrand competition	237
Summary and assessment	238
Cournot analysis	238
Basic model	238
Primary findings	239
(i) General analysis	239
(ii) Linear analysis	242

Summary	245
Bertrand analysis	245
Basic model	246
Primary findings	247
Summary	250
Conclusions	250
8. Global competition in telecommunications	256
<i>Douglas A. Galbi</i>	
Introduction	256
Industry economics	257
Cost trends for long-distance communication and their implications	257
Particular economics of wire-line and wireless local links	258
Alternate paths to security and reliability	260
Search for a stable position in the value distribution	261
Business structure and strategy	262
Incentives to expand geographic scope	262
Organizational history	263
Economics of business structure	266
Strategies of competition	267
Key global policy challenges	268
Making meaningful policy decisions	269
Conclusions	270
9. US settlement reform: an historic review	273
<i>Michael A. Einhorn</i>	
Introduction	273
Accounting rules	278
International settlements policy	280
Reform and accounting rates	281
Domestic entry and reciprocal compensation	282
International settlements policy	285
The state of competition	285
Conclusion	288
10. Telecommunications infrastructure and economic development	293
<i>M. Ishaq Nadiri and Banani Nandi</i>	
Introduction	293
Services provided by the telecommunications infrastructure	294
Aggregate contribution of telecommunications capital	297

Direct and indirect effects of investment on telecommunications capital	299
Input-output approach	301
An econometric cost model	302
Conclusions and unresolved issues	309
11. Universal service	315
<i>James H. Alleman and Paul N. Rappoport</i>	
Introduction	315
Definition	316
Goals	316
Instruments	317
Funding mechanism	317
A moving target	318
History of the USO concept	318
Early years	318
Current environment	319
Goals	320
Increasing penetration and promoting subscription	320
Externalities	321
Critique of USO goals and instruments	322
Increase penetration	322
Income redistribution	324
Expenditure	325
Remaining issues	326
Evaluation of USO instruments	326
Evaluation of USO funding mechanisms	327
Pricing above costs	327
Other mechanisms	330
An alternative	330
Conclusions	331
<i>Index</i>	337

# Emerging Telecommunications Networks

The International Handbook of  
Telecommunications Economics, Volume II

*Edited by*

Gary Madden

*Professor of Economics, Curtin University of Technology and  
Director, Communications Economics and Electronic Markets  
Research Centre, Australia*

**Edward Elgar**

# Contents

<i>Contents of the Handbook</i>	xi
<i>List of figures</i>	xv
<i>List of tables</i>	xvi
<i>List of contributors</i>	xvii
<i>Preface</i>	xxiii
<i>Acknowledgements</i>	xxxiv
1. Innovation in advanced telecommunications networks	1
<i>Cristiano Antonelli</i>	
Introduction	1
Market construction of new technology	2
Dynamics of technological change in telecommunications	6
Conclusions	12
Appendix A: formal analysis	14
Appendix B: mapping the direction of technological change	20
2. Economics of the Internet	27
<i>Michael D. Pelcovits and Vinton G. Cerf</i>	
Introduction	27
What is the Internet?	27
History of the Internet	29
The history of the World Wide Web	32
The Internet at 2000	33
Usage of the Internet and the WWW	35
Size of the WWW	37
Who is online	37
Online commerce	38
Economics of the Internet	39
Regulation and antitrust intervention in the telephone industry	39
Analysis of competition in the Internet backbone market	41
Barriers to entry or expansion in the Internet transport market	41
Ability and willingness of transport customers to switch to different suppliers	42
Test of market power	43

Interconnection policies and network effects on the Internet	
backbone market	43
Interconnection of the Internet backbone: peering versus transit	44
Network externalities	45
Market power in industries exhibiting network externalities	46
Government intervention and concentration in the Internet	
backbone market	47
Pro-competitive effects of network externalities on the Internet	
backbone market	48
Future of the Internet	51
3. Residential demand for access to the Internet	55
<i>Paul N. Rappoport, Donald J. Kridel, Lester D. Taylor,</i>	
<i>James H. Alleman and Kevin T. Duffy-Deno</i>	
Introduction	55
Demographic profiles of access to the Internet	56
Internet access models	60
Data	63
Variables and delimiters	64
Empirical results	64
Area 1	64
Area 2	66
Area 3	67
Conclusions	70
4. Electronic commerce and industrial organization	73
<i>Steven Globerman</i>	
Introduction	73
Description of e-commerce	73
Definition of e-commerce	73
The magnitude and nature of e-commerce	74
Hypothesized impacts	76
Search costs	76
Other transaction costs	78
Competition and contestability	80
E-commerce and disintermediation	82
Evaluating the early experience	83
Expansion of geographic markets	83
Competition and contestability	86
Intermediaries	87
Conclusions	88

5. The economics of online retail markets	92
<i>Michael R. Ward</i>	
Introduction	92
Modeling market efficiency	93
The Internet and the efficiency of retail markets	95
Retailing costs	95
Transactions costs	96
Product information	97
Quality assurance	99
Price search effects	100
Effects on other channels	102
Conclusion	102
6. Regulation for Internet-mediated communication and commerce	107
<i>Robert M. Frieden</i>	
Introduction	107
A multi-faceted Internet	107
Alternative regulatory models	108
Possible market failure in cyberspace	110
Traditional regulatory constructs	111
The Clinton administration model	113
Problems of regulatory asymmetry	114
Regulatory opportunism	116
United States attempts to promote competition and convergence	116
Case studies in regulatory asymmetry	117
Internet telephony	117
Devising new legal and regulatory safeguards	119
The fallacy of an unregulated Internet	121
Jurisdictional issues	121
Conclusion	124
7. Product bundling and wholesale pricing	129
<i>Timothy J. Tardiff</i>	
Introduction	129
Cost structures and their implications for pricing	130
Cost structures	130
Pricing implications	131
Trends in telecommunications pricing	132
Requirements for profitable pricing	132
(i) Price structure matters	133
(ii) Brand identity	133

(iii) Quality attributes	134
(iv) One-stop shopping	134
(v) Retail or wholesale	135
Rationale for one-stop shopping	136
Recent examples of vertical integration and one-stop shopping	137
Pricing wholesale services	140
Properties of efficient wholesale prices	140
Establishing efficient wholesale prices	141
(i) Mandatory versus voluntary offerings	141
(ii) Pricing considerations	142
Implications for the pricing of ILEC retail services	143
8. Mobile telecommunications and regulatory frameworks	151
<i>Harald Gruber and Tommaso M. Valletti</i>	
Introduction	151
Technology	152
Analogue systems (first generation mobile)	153
Digital systems (second generation mobile)	155
Digital systems (third generation mobile)	155
Demand side	157
Supply side	159
Pricing	159
Coverage	161
Convergence and bundling	161
Regulation	164
Regulatory bodies	164
Standard setting	165
Licensing	166
Interconnection	167
Cost of regulation	170
Conclusion	171
9. Satellite communications services	180
<i>Joseph N. Pelton</i>	
Introduction	180
Changing market structures	183
Communications satellite technology	186
Satellite services in transition	188
Global shifts in the regulatory and institutional environment	190
Economic issues	191
Conclusions	197

10.	Regulated costs and prices in telecommunications	199
	<i>Jerry A. Hausman</i>	
	Introduction	199
	A simple model of cost-based regulation	203
	Conditions for prices independent of demand	203
	The role of fixed costs and economies of scale	204
	The role of common costs and economies of scope	204
	The role of sunk costs	205
	Cost-based regulation: economic analysis with cost but not demand	206
	Enter the Marxian theory of value	207
	Necessary assumptions and economic reality: the 'regulatory fallacy'	208
	Fixed and sunk costs in cost-based regulation	210
	Current FCC approach to regulation of unbundled elements	210
	Regulation set prices for unbundled elements	212
	The TSLRIC standard and harm to innovation	213
	The effect of sunk and irreversible investments	215
	What elements should be unbundled?	220
	Consumer welfare: competition rather than competitor protection	221
	The FCC's failure to advance consumer welfare	222
	A consumer welfare implementation of the necessary and impair standard	222
	(i) The essential facilities doctrine of antitrust law	222
	(ii) Deriving the necessary and impair standards from the essential facilities doctrine	224
	(iii) The relevant product market and critical share	225
	(iv) The Hausman-Sidak test for the impairment standard	226
11.	Universal service in the information age	234
	<i>Jorge Reina Schement and Scott C. Forbes</i>	
	Introduction	234
	Defining and measuring universal service	235
	The measurement of universal service	236
	Regional comparisons and case studies	238
	The case of the US	239
	The case of the Pacific Region	240
	Theories and findings	241
	Open competition and choice	241
	Bundled services	243
	• Setting the price of bundles	244
	Protection of existing universal service guarantees	244

The importance of local considerations	244
The informed choice model of universal service	246
Conclusion	- 247
<i>Index</i>	251

# World Telecommunications Markets

The International Handbook of  
Telecommunications Economics, Volume III

*Edited by*

Gary Madden

*Professor of Economics, Curtin University of Technology and  
Director, Communications Economics and Electronic Markets  
Research Centre, Australia*

**Edward Elgar** ( )  
Cheltenham, UK • Northampton, MA, USA

# Contents

<i>Contents of the Handbook</i>	• xvii
<i>List of figures</i>	xxi
<i>List of tables</i>	xxii
<i>List of contributors</i>	xxv
<i>Preface</i>	xxxiii
<i>Acknowledgements</i>	xliv

1. Corporate and regulatory strategy for the new network century	1
<i>Eli M. Noam</i>	
The challenge of change	1
Strategies for telecommunications companies	3
Future of regulation in the network of networks	7
Impacts of new global telecommunications on traditional regulation	9
Conclusion	11

## PART 1 FROM TELECOMMUNICATIONS REFORM TO INFORMATION SOCIAL POLICY

2. Evolution of the telecommunications industry	15
<i>Martin Fransman</i>	
Introduction	15
The telecommunications industry and the economics of industrial change	15
The telecommunications industry to the mid-1980s	16
The technological regime in the old telecommunications industry	18
Learning regime of the old telecommunications industry	19
The telecommunications industry in transition	20
Early entrants	20
Entrants and technology suppliers	20
The new telecommunications industry from the early 1990s	21
Late entrants	21
Technological regime in the new telecommunications industry	22
The changing location of R&D in the new telecommunications industry	22
Learning regime in the new telecommunications industry	24

## Contents

Learning by network operators	24
New operators as F4 firms	25
Differentiation dilemma	26
The role of financial markets	26
Inventing the value of telecommunications company shares	27
The Internet paradigm and the info-communications industry	28
Emergence of the Internet	28
Birth of the info-communications industry	31
Technological and learning regimes in the info-communications industry	33
Mobile communications	33
Forces of competition	35
Conclusion	36
Preparing the information infrastructure for the network economy	39
<i>William H. Melody</i>	
Introduction	39
Stages of institutional reform	40
Telecommunications network development	43
Network access and service growth	43
Competition in basic telecommunications markets	46
Competition in mobile telephone service markets	50
Information infrastructure development	52
Network investment and capacity	52
(i) National network investment trends	53
(ii) International network capacity	53
Internet development	55
Higher speed network access options	56
(i) ISDN	60
(ii) DSL	61
(iii) Cable modems	61
Summary	61
Conclusion	65
Telecommunications policy research in information society discourse	68
<i>Erik Bohlin</i>	
Introduction	68
An overview of telecommunications policy	69
General considerations	69
Telecommunications policy research in the triad	69

Convergence and its effects on telecommunications policy	71
Stability of telecommunications policy despite convergence	71
Wider policy goals and the relevance of telecommunications policy	72
Future research needs	73
International outlook	73
Competence goals	73
An example	74
Justification	74
Problem overview	74
Outlook for research	75
Conclusions	76

## PART 2 CORPORATE EXPERIENCE AND VISIONS

5. Formation and development of international alliances	81
<i>Peter Curwen</i>	
Introduction	81
Alliances in vogue	82
Protection of domestic markets and increased global market power	82
Access to overseas markets characterized by barriers to entry	82
Make available to domestic markets otherwise missing services	82
Shared infrastructure investment costs	83
First-mover advantage	83
Global alliances	84
Concert	84
Global One	86
AT&T-Unisource	88
Alliances must evolve or die	90
Conclusions	92
6. BT corporate experience and visions, 1990-2000	97
<i>Niall Levine, Douglas Pitt and David Lai</i>	
Introduction	97
BT in the 1990s: background and strategy	97
Path to the BT of 2000	98
Regulatory constraints on BT since the 1980s	99
BT's response to regulatory constraint	100
BT and the management of change	100
, 1984 to 1987	102
1988 to 1993	102

1994 to 1996	102
1997 to the present	103
Catalysts for change	103
1991 duopoly review	103
BT's changing organizational structure and culture	105
Organizational culture	107
Relationship with regulators	109
Impact of regulation on competition	110
Impact of regulation on consumers	111
Britain on-line	111
Conclusion	112
7. The evolution of US WEST and MediaOne	117
<i>Martin G. Taschdjian</i>	
Introduction	117
The late 1980s and the US WEST entry into international markets	117
Getting started	118
Domestic ramifications	122
Developments in Hong Kong	124
In the USSR	125
Speaking with 'one voice'	129
Australia and the Optus Vision experience	130
MediaOne in Georgia	132
Breaking up US WEST	134
Lessons learned	134
The future	135
8. Sprint - GTE's lost opportunity	137
<i>James H. Alleman and Lawrence Cole</i>	
Introduction	137
Telecommunications environment	138
Industry regulation and deregulation	138
GTE	138
SPC	138
United	139
Evaluation and critique of GTE's acquisition of SPC	140
Access charges	140
Anticipation of consent decree	143
Commoditization of long-distance service	145
Management ability	145
Valuation of SPC	145

Postscript	147
Conclusions	147

### PART 3 INTERNATIONAL COOPERATION AND COORDINATION

9. The European Union and world telecommunications markets	153
<i>Richard Cawley</i>	
Introduction	153
Telecommunications and the EU	154
Some history, politics and economics: 1987 - the beginning of the end	155
1994 - breakthrough at last	156
1998 - full competition and ongoing regulatory implementation	160
2000 - the end of the beginning, the new framework	165
Conclusions	168
10. The FCC and policy federalism: broadband Internet access regulation	173
<i>Timothy Brennan</i>	
Introduction	173
Broadband Internet services	175
Definition	175
Technologies	176
Penetration	177
Local governments versus the federal government	178
Local broadband cable controversies	178
Vigilant restraint: the FCC response	180
The DSL situation	181
Federalism controversies in competition policy	181
Antitrust	182
Electricity	182
Telecommunications	183
A note on the policy	185
Pro-open access	185
Does cable have a monopoly over broadband?	186
Vertical separation without regulation is unlikely to help	186
Lemley and Lessig	187
The consumer-locality analogy	188
Why trust individuals over central planners? The economic case	188
Implications for deference to local decision making	189
Non-economic policy goals	190

Analyzing local authority over cable access	191
Information and scale economies	191
Export of inefficiency	192
Universal service	192
Relative corruptibility	194
Concluding caveat	194
11. International telecommunication regulation: a trophy or atrophy	200
<i>Tim Kelly</i>	
International telecommunications: a trophy?	200
ITRs: atrophy?	200
Implications of WTO agreement on basic telecommunications	202
Economic context of ITRs	203
Competition policy and ITRs	204
Individual provisions of ITRs	205
Preamble	205
Article 1: Purpose and scope of the regulations	205
(i) Mutual agreement between administrations	205
(ii) Right of Member States to authorize the providing of an international telecommunications service to the public	206
Article 2: Definitions	206
Article 3: International network	207
(i) Cooperation to ensure quality of service	207
(ii) Provision of sufficient capacity	208
(iii) Mutually agreed routing	209
(iv) Right to use the network	211
Article 4: International telecommunications service	211
(i) Extending access	212
(ii) Cooperation in service provision	212
(iii) Minimum quality of service	213
Article 5: Safety of life and priority of telecommunications	214
Article 6: Charging and accounting	214
(i) Collection charges	215
(ii) Accounting rates	216
(iii) Monetary unit	217
(iv) Establishment of accounts and settlement of balances of account	217
Article 7: Suspension of services	217
Article 8: Dissemination of information	218
Article 9: Special arrangements	219

Article 10: Final provisions	222
What happens next?	223
12. The OECD and the internationalization of telecommunications	226
<i>Dimitri Ypsilanti</i>	
Introduction	226
Gradual liberalization	228
General Agreement on Trade in Services	229
International cooperation and coordination	230
The dangers of international multi-level governance	232
Policy convergence	234
Conclusions	238
13. International efforts to bridge the digital divide: a global imperative	241
<i>Bruno Lanvin</i>	
Introduction	241
Famous mistakes not to be repeated	242
Information, technology, development and the globalization backlash	242
How developing countries can benefit	244
How development agencies can use ICT	245
The globalization backlash	246
From words to action - a role for the G-8	246
What is the DOT Force?	247
Possible areas for action	247
Conclusion	249
14. World Bank telecommunication sector activity: the 1990s and beyond	250
<i>Charles Kenny</i>	
Introduction	250
Early history	251
The early 1990s	252
Need for a new strategy at the decade's end	256
Challenges and a new agenda	257
New policy focus	260
New investment focus	262
Conclusion	264

15. Telecommunications in the multi-lateral trading system	266
<i>Claude E. Bar fie Id and Steven Anderson</i>	
Introduction	266
Telecommunications and the WTO	271
Scope of commitments in the agreement	272
Market access	272
Foreign investment	273
Satellite service	273
Most favored nation	273
Reference paper	275
Shortcomings and future negotiation	276
<b>PART 4 REGIONAL DEVELOPMENTS</b>	
16. Regulation of Internet services in North Africa	281
<i>Andrea L. Kavanaugh</i>	
Introduction	281
An authoritarian model of the press for the Internet	282
Regulation of the Internet	283
Oversight by committee	285
Access to computer network services	286
Tunisia	287
Morocco	288
Algeria	290
Liberalization of the market for new media	292
Data and TV communications via satellite regionally	294
Conclusions	296
17. Organizational change in Australasian telecommunications companies	300
<i>Mark A. Shadur, Kellie Caught and Rene Kienzle</i>	
Introduction	300
Overview of Australasian telecommunications companies	301
Telstra	301
Cable & Wireless Optus	301
Telecom New Zealand	302
Clear Communications	302
Regulatory framework	303
Australian telecommunications regulation	303
New Zealand telecommunications regulation	304
Models of organizational transformation	305

Organizational transformation in Australasian telecommunications companies	308
Organizational design	308
Work organization	310
Employee involvement	311
Strategic human resource management	312
Conclusions	314
18. Brazilian telecommunications: experience and future perspectives	319
<i>Marcelo Resende</i>	
Introduction	319
Brazilian telecommunications prior to privatization	320
Telebras and the transition to a privatized system	329
An alternative scenario	331
Tariffs, competition and interconnection	338
Competition	338
Tariffs	340
Interconnection	341
Final comments	341
19. China leaps into the millennium	346
<i>Meheroo Jussawalla</i>	
Introduction	346
A global player in the information revolution	346
Conflict of priorities	348
Overview of the telecommunications sector	349
The Chinese wireless revolution	350
Internet explosion and e-commerce	351
China's digital divide	354
The Chinese space industry	356
Chinese entry into the WTO	357
Conclusion and prognosis	358
20. Regulation of French telecommunications and electricity markets	361
<i>Nicolas Curien and Dominique Bureau</i>	
Introduction	361
New market organization	361
Telecommunications	364
Electricity	370
Regulating utility markets	371

Legitimacy and powers of regulators	372
Public service obligations	375
The state as shareholder	380
Conclusion	381
21. Sector-specific regulation of German telecommunications	383
<i>Giint er Knieps</i>	
Introduction	383
From legal monopoly to global entry deregulation	384
Global legal entry barriers	384
Partial entry deregulation	385
Global entry deregulation	385
Entry deregulation and the European context	386
Open network provision in partially entry-deregulated markets	387
ONP in globally entry-deregulated markets	388
Sector-specific market power regulation and general competition law	388
Asymmetric market power regulation due to hysteresis	388
EU asymmetric market power regulation	390
Phasing out German sector-specific market power regulation	391
Review of the German Monopoly Commission	391
Regulatory approaches outside Germany	392
The 1999 EU review	392
The disaggregated regulatory approach	393
Competition in long-distance telecommunications markets	395
Local loop the remaining regulatory problem	396
Conclusions	396
22. Challenges for Indian telecommunications: the 1990s and beyond	400
<i>T.H. Chowdary</i>	
State monopoly over telecommunications	400
Social objectives	401
Beginning of the end of monopoly manufacture	402
Deregulation of the networks and service markets	406
Regulation	408
Further liberalization and restructuring	409
