OPTIMAL GROWTH ECONOMICS
An Investigation of the Contemporary Issues and the Prospect for Sustainable Growth

Sardar M.N. Islam
Director
Sustainable Economic Growth Program
Centre for Strategic Economic Studies, Victoria University,
City Campus, P.O. Box 14428, Melbourne City MC
Victoria, Australia 8001

ELSEVIER
Amsterdam - London - New York - Oxford - Paris - Shannon - Tokyo
Chapter 1 Introduction

1.1 Introduction ,
1.2 Optimal Growth Economics
1.3 Contemporary Issues in Growth Economics and Optimal Sustainable Growth Economics
1.4 Areas of Development in Optimal Growth Economics
1.5 Objectives of this Book
1.6 Models of Optimal Growth: Roles and Varieties
1.7 Structure of this Book

PART A
THE FRAMEWORK: THEORY, CONCEPTS AND METHODOLOGY

Chapter 2 Optimal Growth Economics: The Framework for Modelling and Analysis in this Study

2.1 Introduction
2.2 Formulation of an Optimal Growth Program
2.3 Formulation of a Numerical Optimal Growth Program: From Theory to Empiricism
2.4 Turnpike Properties and Optimal Growth Norms in Economic Growth Models
2.5 Specification of the Elements of an Operational Program for Optimal Economic Growth
2.6 Mathematical and Computational Optimal Growth Economics
2.7 Optimal Growth Models and Welfare Economics
2.8 Environment and the Economy: Sustainability of Optimal Growth
2.9 Optimal Growth Under Uncertainty and Complex Dynamics
2.10 Conclusions

Chapter 3 Computational Optimal Growth Economics: The Dynamic Optimisation Methods

3.1 Introduction
3.2 Applied Optimal Growth Modelling: A Summ'ary of Steps and Methods
3.3 Different Optimal Growth Models Classified on the Basis of Their Economic Structures
3.4 Aggregative Optimal Growth Models
3.5 Sectorally Disaggregated Models
3.6 Activity Analysis Models
3.7 General Equilibrium Growth Models
3.8 Macroeconometric Growth Models
3.9 Stochastic Optimal Growth Models
3.10 Complex Dynamics Models
3.11 Computational Methods for Optimal Sustainable Growth Models
3.12 Choice of a Suitable Model for Optimal and (Optimal) Sustainable Economic Growth Planning
3.13 Conclusions

Chapter 4 The Social Discount Rate and Optimal Growth Economics: The Interrelationships and Social Choices

4.1 Introduction
Section A The Effects of Discounting
4.2 Intertemporal Time Preference - SDR
4.3 The Effects of Discounting: Is Discounting Pareto Optimal?
Section B Derivation and Estimation of Optimal SDR
4.4 Optimal Growth Theory and Theoretical Derivation, and Numerical Estimation Methodology for SDR

4.5 The Enumerative Method: Illustrations

4.6 The Estimated Values of SDR: The Choice of SDR in an Unsustainable Economic Condition

Section C A Pragmatic Approach to the Choice of SDR

4.7 A New Social Choice Paradigm

4.8 Conclusions

Chapter 5 Optimal Intertemporal Environmental Economics: Formulation of Optimal Sustainable Growth Programs

5.1 Introduction;
Section A Theory, Concepts and Issues
5.2 The SEE System
5.3 Optimal Sustainable Growth
5.4 Conditions for Optimal Sustainable Growth: A Theoretical Analysis

Section B The Numerical/Applied Modelling Framework
5.5 Modelling Sustainability
5.6 The Formulation of a Program for Optimal Sustainable Growth
5.7 A Framework for Aggregate Optimal Sustainable Growth Modelling

Section C Applications: Numerical Models of Optimal Sustainable Growth
5.8 An Optimal Sustainable Model of Global Economic Growth and the Environment
5.9 The Constant-Return Endogenous Growth Model with Pollution Control
5.10 Conclusions

Appendix 5.A Alternative Specifications of Some Critical Functions in an Optimal Sustainable Growth Model
PART B
APPLICATIONS: MODELS OF THE NATIONAL AND WORLD ECONOMY WITH THE ENVIRONMENT, ECOLOGY AND UNCERTAINTY

Chapter 6 Optimal National Economic Growth

6.1 Introduction

Section A > Australian Model

6.2 A Numerical Optimal Growth Model of the Australian Economy

6.3 Methodology, Data, Boundary Conditions and Results

6.4 Optimal Growth Patterns and Trends and their Implications for Growth Determinants and Propositions

6.5 Mathematical Properties of the Solution and the Characteristics of Growth Dynamics: The Possibility for a Steady, Stable and Unique Growth Path

Section B Indian Models

6.6 An Indian Development Planning Model

6.7 Conclusions

Appendix 6.A Figures of the Australian Model

Chapter 7 Optimal Intertemporal Global Economic Growth: Growth Prospects, Globalisation, and Convergence

7.1 Introduction

7.2 Growth of the Global Economy: Issues and Modelling Perspective

7.3 Global Optimal Growth: Theory and Various Model Elements

7.4 A Global Aggregate Economic Growth Model: Exogenous Technical Progress

7.5 An Endogenous Growth Model of the Global Knowledge Economy

7.6 Multi-Regional Growth Model

7.7 Optimal Growth and Convergence
Chapter 8 Optimal Intertemporal Climate Change Economics:
A Country Perspective

8.1 Introduction
8.2 Technical Progress and Climate Change in Growth Models
8.3 Modelling of Climate Change and Economic Growth in Australia
Section A Climate Change, Exogenous Technical Progress and Optimal Growth in Australia
8.4 Outline of the ADICE Model
8.5 Equations of the ADICE Model
8.6 Exogenous Technical Progress in ADICE
8.7 Methodology
8.8 ADICE Results
8.9 Climate and GHG Variables
8.10 Economic Effects
8.11 Analysis of Results of Different Model Runs
8.12 Global Warming Policies for Australia
8.13 Comparison with Policies Suggested by Other Models
8.14 Australian and Global Perspectives
8.15 Economic Growth Prospects: A Long Run Vision
Section B Endogenous Technical Progress, Economic Growth and Global Warming
8.16 ADICE with Endogenous Technical Progress: Modelling Climate Change in the Knowledge Economy

10.5 An Optimal Stochastic Growth Model of the Global Economy
10.6 Optimal Sustainable Growth Models with Stochastic Processes
Section B Optimal Growth Models Under Complex Dynamics
10.7 Optimal Growth Under Chaotic Dynamics
10.8 Optimal Sustainable Economic Growth Under Other Forms of Complex Dynamics
10.9 Stochastic and Non-Linear Complex-Growth Dynamics: The Possibility for Steady, Stable and Unique Growth of the Economy
10.10 Conclusions
Appendix 10.A Results of the Stochastic Model
Appendix 10.B Bayesian Method

Chapter 11 A Smorgasbord of Topics

11.1 Activity Analysis Growth Models
11.2 Optimal Growth Policy Formulation: An Application of Social Choice Theory
11.3 Optimal Growth Planning and the Cost Benefit Analysis
Section A Optimal Growth by the Cost-benefit Method
Section B Cost-Benefit Analysis: Concepts and Methods
11.4 Endogenous Growth Theory
11.5 The Negishi Algorithm

Chapter 12 Contemporary World and Optimal Growth Economics: Summary, Major Findings and Conclusions

12.1 Introduction
12.2 Optimal Growth Models Developed and their Validation
12.3 Findings in Optimal Growth Economics
12.4 Findings in Specific Areas of Optimal Growth Economics: Characteristics and Forecasts in Different Economic Systems
12.5 Prospects for Sustainable Growth
12.6 An Ideal Model of Optimal and Sustainable Economic Growth
12.7 Contributions of the Study
12.8 Limitations of the Study and the Areas for Further Research
12.9 Conclusions

BIBLIOGRAPHY
