AKADEMIAIKIADÓ, BUDAPEST

FOREWORD.....	11
I. INTRODUCTORY REMARKS ON THEORIES IN GENERAL AND THEIR HISTORICAL BACKGROUND.....	15
1. The nature and limitations of social science theories.....	15
2. Historical turning points and changes of paradigms.....	16
II. DIFFERENT APPROACHES TO THE ECONOMICS OF THE WORLD ECONOMY, NATIONAL DEVELOPMENT AND COMPARATIVE SYSTEMS.....	20
1. International economics or economics of the world economy? (Perception of the global economy in theories and standard textbooks) ...	20
1.1. "Global economy" or "international economy".....	20
1.2. The world economy as appearing in the major streams of economic theory: a short summary.....	22
2. "Development economics" as defined earlier, with a conventional approach.....	31
3. The meaning of "development", its various, changing interpretation, and the ways, methods of measuring it.....	36
3.1. The per capita national income index.....	39
3.2. Other comparative indicators of development level.....	42
3.3. Further refinement of the concept of "development".....	42
3.4. New indicators of development.....	46
3.5. Concluding remarks.....	48
4. Comparative economic systems or development through stages of economic growth? (The economics of comparative systems and its link with development economics).....	50

*Table of content*

III. THE WORLD ECONOMY, NATIONAL DEVELOPMENT AND ECONOMIC SYSTEMS AS VIEWED IN VARIOUS, SCHOOLS OF THEORETICAL ECONOMICS BEFORE THE SECOND WORLD WAR.....	53
1. Mercantilism and Physiocracy.....	54
1.1. Mercantilism.....	54
1.2. Physiocracy.....	58
1.3. The major development issues in the controversy of the two schools. ...	59
2. The Classical School of Economics.....	61
2.1. General features and common concepts of the Classical school. ....	61
2.2. On the nature of development and economic system.....	67
2.3. On the sources and forces of development.....	69
2.4. On the effects and prospects of development.....	75
2.5. On the equilibrium mechanism within and between national economies.....	76
2.6. On international trade and specialization.....	82
2.6.1. Empirical tests of the Classical trade theory.....	85
2.6.2. Implications and weaknesses of the Classical trade theory. ....	87
2.7. On possible disequilibria and social inequalities.....	90
2.8. On the relations between rich, developed and poor, underdeveloped countries.....	92
2.9. On the terms of trade.....	93
2.10. On the role of the State in a liberal system.....	95
2.11. On the stages of development and economic systems.....	96
2.12. Concluding remarks.....	99
3. The Marxian political economy.....	100
3.1. The Marxian approach to the economy and social development ...	101
3.2. On the nature of commodity and money.....	103
3.3. The labour theory of value and the concept of exploitation. ....	105
3.4. On the source of "new value" in a "social process of reproduction" ....	107
3.5. The Marxian price theory and its international implications.....	110
3.6. On international trade, division of labour and capital export.....	118
3.7. On disequilibria and crises.....	121
3.8. On the anomalies and prospects of capitalism.....	125
3.9. On social systems as stages of historical development.....	128
3.10. Concluding remarks.....	129
4. Neo-Classical economics.....	130
4.1. Neo-Classical views on the sources and determinants of economic growth.....	136
4.2. On equilibrium and allocative efficiency in a market economy.....	139

4.3. On international equilibrium, terms of trade and "balance-of-payments adjustment".....	141
4.4. On international trade and specialization.....	145
4.4.1. The Leontief paradox.....	148
4.4.2. Other concepts on the "basis" for international trade.....	148
4.5. On international factor mobility.....	150
4.6. On stages and systems of the economy.....	154
4.7. Concluding remarks.....	155
5. Other streams: the "historical school" and institutionalism.....	155
5.1. The "historical school".....	156
5.2. Institutionalism.....	158
6. The Keynesian Economics.....	159
6.1. The Keynesian views on economic growth and equilibrium.....	160
6.2. On the economic role of the State.....	170
6.3. On international economic equilibrium.....	173
6.4. On interdependencies in the world economy.....	176
6.5. Implications of the Keynesian theory with regard to international specialization and factor flows.....	177
6.6. An anti-cyclical policy on the world level?.....	179
6.7. Neoliberal critiques.....	179
6.8. Concluding remarks.....	180
 IV ECONOMICS OF WORLD ECONOMY, NATIONAL DEVELOPMENT AND ECONOMIC SYSTEMS AFTER THE SECOND WORLD WAR.....	 184
1. Development economics as a special field of study: its rise, evolution and decline or rebirth.....	184
2. Conventional theories of national development, economic "backwardness" and systems as stages of growth.....	189
2.1. Underdevelopment as the aggregate of certain internal factors and circumstances which have been limiting or hindering development.....	189
2.1.1. Unfavourable natural conditions, scarcity or underutilization of natural resources.....	194
2.1.2. "Demographic explosion" and "overpopulation".....	199
2.1.3. Poor quality of labour.....	203
2.1.4. Capital shortage, insufficient savings and capital formation... ..	205
2.1.5. Narrow domestic market and market imperfections.....	209
2.1.6. State imperfections, irresponsible governments, "soft states".....	210

## Table of content

2.2. Underdevelopment as a specific form of motion: a "vicious circle" or a "quasi-stable equilibrium".....	211
2.2.1. The "vicious circle of underdevelopment".....	212
2.2.2. The "quasi-stable equilibrium system".....	216
2.3. A sociological explanation of underdevelopment: the idea of a stagnant traditional society.....	221
2.4. The concept of "dualism".....	233
2.4.1. The idea of "sociological dualism".....	234
2.4.2. The idea of "technological dualism".....	236
2.5. The theory of the "stages of growth": Rostow's historical explanation.....	244
3. Critical theories, with reformist ideas, of international and development economics: the post-Keynesian reformist school.....	258
3.1. The critical views and theses of Raul Prebisch.....	259
3.2. Singer's critique of international specialization and technology transfer.....	264
3.3. The "backwash effect" of trade and cumulative disequalization in Myrdal's theory.....	267
3.4. The Lewis-thesis and the model of an economic system with unlimited supply of labour.....	271
3.5. Balogh's thesis of unequal partners in their international economy ....	274
3.6. Furtado's concept of a dependent subsystem with "cultural dualism".....	276
3.7. Perroux on dominance and dependence.....	278
3.8. Hirschman's critique of foreign direct investments.....	279
3.9. Concluding remarks.....	280
4. Radical (new-left and neo-Marxist) views on the world economy, uneven development and economic systems.....	282
4.1. Gunder Frank's radical views on the world system.....	283
4.2. Emmanuel's theory of "trade imperialism".....	289
4.3. An alternative variant: Braun's concept of unequal exchange.....	302
4.4. Wallerstein's "world-system approach".....	306
4.5. A neo-Marxist theory: Samir Amin's views on trade and imperialism.....	320
5. "Counter-revolutions" versus reformist and radical views.....	336
5.1. The "monetarist counter-revolution" against the "Keynesian revolution" in economics.....	336
5.2. "Orthodox counter-revolutions" in development economics: a neo-classical and a Marxist one.....	340
5.2.1. Lai's attempt to denounce development economics.....	342
5.2.2. An orthodox Marxist attack against dependence theories.....	350

6. Economics of comparative systems: precedents, development stages, changing approaches and topics.....	361
6.1. Concepts of economic system and conventional approaches.....	361
6.2. The system controversy in the precedents and in the short history of the "economics of comparative systems".....	363
6.3. Development stages of the "economics of comparative systems": changes in concept, definition, approach and topics.....	366
6.4. The major characteristics of comparative economic systems - as outlined by some representative studies.....	372
6.4.1. Eckstein's review.....	372
6.4.2. Views of Koopmans and Montias.....	373
6.4.3. The concept of Gregory and Stuart.....	374
6.4.4. Kornai's analysis of the "socialist system".....	375
6.4.5. Schnitzer's concept of comparative systems.....	380
7. Is a constructive eclecticism possible?.....	383
7.1. Signs of convergence in some general concepts of development issues.....	383
7.2. Dunning's eclectic theory of transnational investments.....	391
7.3. Porter's eclectic concept of the "national competitiveness".....	393
8. Some final conclusions.....	396
GLOSSARY OF MOST FREQUENTLY USED ECONOMIC TERMS.....	398
REFERENCES.....	446
