Foreword.....	iv		
The Chapter Map	v		
Table of Contents	vi		
Editors' Introduction	1		
CHAPTER 1			
1. Building innovative 'knowledge societies'	6		
1.1 Introduction - Science and technology policy for ICTs and development.....	6		
1.2 Harnessing ICTs for development	8		
1.3 ICTs, learning, and innovation systems	10		
1.4 Mapping and measuring ICTs for 'knowledge societies'	12		
1.5 Conclusion - Maximising benefits and minimising risks	15		
CHAPTER 2			
2. Indicators of developing country participation in 'knowledge societies'	20		
2.1 Introduction - New market opportunities	20		
2.2 Catching-up, forging ahead or falling behind?	20		
2.3 The INEXSK (INfrastructure, EXperience, Skills, Knowledge) approach	21		
2.4 Analysis of telecommunication infrastructure and investment.....	23		
2.5 Overview of the global production and use of ICTs....	31		
2.6 The human dimension and inter-country comparisons	35		
2.7 Mapping ICT indicators - A footprint analysis	36		
2.8 Conclusion - Linking telecommunications and people's skills for development	40		
2.9 Appendix - Regional classification of countries and political units.....	44		
CHAPTER 3			
3. Innovation systems and the learning process.....	46		
3.1 Introduction - Social and technological components of learning	46		
3.2 Changes in the scientific and technological R&D process	46		
3.3 Building learning capabilities.....	49		
3.4 The 'learning economy', ICTs, and tacit knowledge ..	50		
3.5 Organisational learning and advanced manufacturing technologies	52		
3.6 Industrial organisation for the productive use of ICTs.....	54		
3.7 Skills for capability building	55		
3.8 Alliances, partnerships, and trust	56		
3.9 Managing technological innovations in China	59		
3.10 Conclusion -Technology choices, selection, and capability building	62		
		CHAPTER 4	
		4. Strengthening the science and technology base through education and lifelong learning.....	66
		4.1 Introduction - Applications for formal and informal education.....	66
		4.2 Education, lifelong learning, and institutional change.....	67
		4.3 ICTs for teaching and learning in the industrialised countries	68
		4.4 Distance education as an option for developing countries	69
		4.5 Implications of ICTs for higher education and training curricula.....	74
		4.6 Building broadly-based capabilities for participating in civil society	76
		4.7 Conclusion - ICTs contributing to social inclusion	78
		CHAPTER 5	
		5. The potential uses of ICTs for sustainable development	82
		5.1 Introduction -The social and economic impacts of ICTs.....	82
		5.2 Facilitating public and private sector activities	82
		5.3 Improving the quality of life for citizens	85
		5.4 Sharing knowledge and improving access to information	90
		5.5 Using ICTs in the business sector	91
		5.6 Conclusion - Knowledge sharing for effective ICT use	95
		CHAPTER 6	
		6. Implementing ICTs in the least developed countries	100
		6.1 Introduction - Models for sharing information resources	100
		6.2 The least developed countries and 'access'	101
		6.3 The least developed countries and information content	106
		6.4 Enhancing the skills base	110
		6.5 Cooperating regions	113
		6.6 Conclusion - Identifying priorities for ICT initiatives	115
		CHAPTER 7	
		7. Assembling the components of national information infrastructures.....	120
		7.1 Introduction - Producing and effectively using ICTs	120
		7.2 Science and technology policy in the Brazilian ICT industry.....	120
		7.3 The Republic of Korea's successful specialisation in memory chips	122
		7.4 Technological innovations and the global reach of satellite infrastructures.....	126

7.5	New media services and the broadcasting and cable television sectors	129
7.6	Software development challenges, export markets, and domestic capabilities	134
7.7	Information content and the national information infrastructure.....	141
7.8	Conclusion -The interaction of global and local markets	149
CHAPTER 8		
8.	National information infrastructure access -Building social and market value chains	152
8.1	Introduction - Promoting access to communication infrastructures	152
8.2	Increasing the returns from investment.....	153
8.3	The necessary and sufficient conditions for access ...	155
8.4	Communication market liberalisation, regulation, and investment.....	156
8.5	Emergent access 'dualisms'	161
8.6	Conclusion - Market liberalisation and institutional reform	164
8.7	Appendix - Communication infrastructure regulation	166
CHAPTER 9		
9.	Friend or foe? Developing countries and the international governance system.....	180
9.1	Introduction - Governance regimes for ICTs	180
9.2	Institutions governing ICTs.....	182
9.3	Global information infrastructure visions	189
9.4	A decade of talks on trade and governance.....	191
9.5	International governance for ICTs and the least developed countries	192
9.6	Opening up, but keeping control.....	195
9.7	Conclusion - Governance regimes for innovative 'networks'.....	197
9.8	Appendix - WTO group on basic telecommunication.....	199
CHAPTER 10		
10.	Institutional innovations for the governance of information services.....	204
10.1	Introduction - Balancing social and economic interests.....	204
10.2	Intellectual property rights in 'digital' information..	204
10.3	Electronic commerce - Introducing a governance system.....	214
10.4	Global information infrastructures, privacy, and social control	220
10.5	Conclusion - Social equity and efficiency considerations.....	223

CHAPTER 11		
11.	National ICT strategies for knowledge-based development	226
11.1	Introduction - Promoting national ICT strategies ...	226
11.2	Harnessing ICTs for development.....	226
11.3	Integrating national ICT strategies	230
11.4	Guidelines for national ICT strategies	232
11.5	Coalitions of resources for building capabilities.....	233
11.6	Taking action now.....	237
11.7	Conclusion - Sustainable development should be the goal	239
CHAPTER 12		
12.	Innovative 'knowledge societies' - Consequences of ICT strategies	242
12.1	Introduction - New opportunities and social and economic risk	242
12.2	ICT investment and economic growth	242
12.3	ICTs, a plus or minus factor in employment?.....	243
12.4	Teleworking, employment, and the social infrastructure	248
12.5	The gender implications of ICTs	249
12.6	Planning for the transformation of work.....	252
12.7	Conclusion -The social and economic interests of developing countries.....	252
CHAPTER 13		
13.	'Tools for building 'knowledge societies'	256
13.1	Introduction - Combining social and technological capabilities	256
13.2	Tools for knowledge-based development.....	256
13.3	Prospects for successful ICT strategies.....	257
13.4	Building on strengths through coordinated action ...	260
13.5	Conclusion	261
ANNEXES		
Annex 1	Acknowledgements	264
Annex 2	Contributions to the Report	265
Annex 3	Summary of UNCSTD Working Group Report.....	266
Annex 4	List of tables, figures, and boxes	272
Annex 5	Glossary	276
Annex 6	Acronyms.....	278
	Bibliography	284
	Index	310
