Part 1

Evolution of Variable Quality in Economic Thought: Antecedents to a New Theory of Consumption

Chapter 1. Introduction	3
Chapter 2. Early Attempts to Introduce Variable Quality	7
1. Introduction	7
2. Classical Contributions	7
3. The Contribution of Agricultural Economists	11
4. Variable Quality and Product Differentiation: The Contribution of Edward Chamberlin	13
5. The Contribution of Hans Brems	14
6. The Contribution of Lawrence Abbott	18
7. The Dorfman and Steiner Response to Abbott	24
Chapter 3. Theory of the Consumer and Variable Quality: The Contributions of James Duesenberry and Henri Theil	28
1. Introduction	28
2. The Contribution of James Duesenberry	28
3. The Contribution of Henri Theil	32
4. The Theil Model	32
5. Theil's View of Income and Quality	35
6. The Grouping of "Qualities" to a Commodity, and Theil's Use of Quality Characteristics	36
7. The Concept of Quantity	38
8. Theil's Treatment of the Grouping Problem: Additional Comments	39
Chapter 4. Theory of the Consumer and Variable Quality: The Contribution of Hendrik Houthakker	42
1. Introduction	42
2. The Houthakker Model of Variable Quality in Consumption Space	42
3. A Definition of Quantity	46
4. The Role of a_i and the Range of Variable Quality	47
5. Relationship to the Hedonic Technique: Introductory Remarks	48
6. Introduction of Theil's e_{ih} into the Houthakker Model	49

7. The Relationship of v_i to p_i	50
8. Further Restrictions on a_i and b_i	51
9. Problems Between the Equilibrium Condition and the Constraint	54
10. Determination of b_i : Introductory Remarks	55
Chapter 5. Quantity-Quality Trade-Offs: The Contribution of Jack Hirshleifer	57
Chapter 6. Wants, Characteristics, Price Indices, and Variable Quality:	
Ironmonger, Lancaster, Fisher and Shell, Muellbauer, and Others	62
1. The Ironmonger Model	62
2. Preferences and Wants	65
3. Budget Constraints	68
4. Ironmonger on Taste, Quality, and New Commodities	69
5. Substitution and Complementarity	71
6. The Lancaster Model	72
7. Similarities and Differences Between Lancaster and Ironmonger	75
8. The Characteristics Approach and Variable Quality	77
9. Variable Quality and the Hedonic Technique	79
10. Fisher and Shell on Price Indices and Quality	81
11. John Muellbauer on Characteristics and the Hedonic Technique	84
12. Conclusions	88
Part 2	
A New Economic Theory of the Consumer:	
Variations on a Theme by Houthakker	
Chapter 7. Interpretations of the Houthakker Constraint	91
1. Attempts to Resolve Indeterminacy	91
2. Preferences and the Constraint	92
3. Repackaging and the Constraint	93
4. Producer Determination of a_i and b_i	94
5. Consumer Determination of a_i and b_i	99
6. Quality and Consumption Experience	99
7. First-Time Assessment of Quality: The Case of No Previous Consumption Experience	101
8. The Value of a_i and a Basic Package	101
9. When the Consumer Holds Quality Constant	102
10. When the Consumer Changes the Level of Quality	102
11. The Value of b_i and Configuration of the Constraint	103
12. The Meaning of Change in b_i : Introductory Remarks	103
Chapter 8. Consumer Surplus, Willingness-to-Pay, Perception, and b_i	105
1. Consumer Surplus and Variable Quality	105
2. Variable Quality Under a Willing Assessment of Consumer Surplus	106
3. Further Comments on the Meaning of Consumer-Induced Change in b_i	110

4. Targeting, Guessing, Neighborhoods, and Budgets	112
5. Expectation and Experience	114
6. Utility Maximization and Perception of the Constraint	114
7. Additional Concepts of Willingness-to-Pay	116
Chapter 9. Stability of b_i, Attractors, and Self-Perception:	
A Feigenbaum Model of Consumer Decision Making	118
1. Stability of Consumer-Determined b_i	118
2. Attractors and WTP(To Keep)	122
3. Quality and the Self	124
Chapter 10. Willingness-to-Pay, Targeting, Learning, and Demand Prices	126
1. The General Case: Additional Concepts of WTP	126
2. Willingness-to-Pay-to-Acquire	126
3. Utility Maximization and Targeting	128
4. Jumping, Guessing, and Stability of the Constraint	129
5. Learning Patterns and Creating Patterns	131
6. The Relationship of WTP(TA) to WTP(TK)	131
7. Effects of Targeting on the Constraint and Preference Map	132
8. WTP, x_i , and p_i	133
9. Targeting, Separability, and Decentralization	133
10. Other Paths to Higher Quality	134
11. The Special Case of Fixed Quantity and Variable Quality	134
12. Further Comments on the Basic Package	135
13. Payments Under WTP and Higher Quality	137
14. Demand Reservation Price and Demand Maintenance Price	138
15. Willingness-to-Accept-Payment-to-Relinquish	139
Chapter 11. Consumer-Producer Interaction and the Market	142
1. Summary of Consumer Perception and the Constraint	142
2. Producer Determination of b_i	143
3. Refinements on Utility Maximization and the Selection of Quality	145
4. Consumer and Producer Interaction	147
Chapter 12. Transaction Regions, Neighborhoods, and Targeting	149
1. Transaction Regions and $v_i p_i$ Price Space	149
2. Alternative Interpretations of a_i in Price Space	150
3. Transactions and v_i Neighborhoods	151
4. Targeting and $v_i p_i$ Space	153
5. Targeting on Quantity: The Case of $\hat{x}_i = 1$	155
6. Double-Targeting	156
7. Clustering Patterns of e_{ih} to v_i	157
Chapter 13. Individual Consumer Demand from Quality-Quantity Space	159
1. Individual Consumer Demand Under Variable Quality: Introductory Remarks	159
2. Consumer and Producer Surpluses	161

3. Effects of Increased Convexity of the Houthakker Constraint	164
4. Shifts of Isoquality Demand Curves	166
5. Individual Consumer Demand Under an Increase in Quality	168
6. Individual Consumer Demand Under a Decrease in Quality	173
7. Necessary Conditions for an Increase in Individual Consumer Demand	175
8. The Consumer Budget and Willingness-to-Pay	176
9. Neighborhoods and Individual Consumer Demand	177
10. The Consumer Window in Quality-Quantity Space	179
11. Consumer Windows and Isoquality Demand	181
12. An Increase in v_i Within the Consumer Window	182
13. Producer Behavior in the Window	184
14. Consumer and Producer Behavior Outside the Window	185
15. The Introduction of v_i Outside the Window	186
16. Varieties Beyond $v_i(\max.)$ and Individual Consumer Demand	189
17. A Decrease in Quality, the Consumer Window, and Individual Consumer Demand	191

Chapter 14. Individual Consumer Demand from x_i, x_j Space:

Interaction with the i th Commodity Producer

1. Variable Quality in x_i, x_j Space	196
2. Change in the Level of Quality in x_i, x_j Space	198
3. Price of the i th Commodity: The Influence of Δv_i , Δb_i , and Δa_i	199
4. Substitution and Income Effects Under Variable Quality	204
5. Is Change in Quality Analogous to a Change in Real Income?	205
6. Is the Income Effect of a Change in Quality Normal or Inferior?	207
7. Double-Targeting and the Income Effect	207
8. Additional Difficulties in Adjusting Price Indices for Variation in Quality	209
9. Change in Quality and Shifts in Individual Consumer Demand	210
10. Δv_i^c and Individual Consumer Demand	212
11. Δv_i^c and Self-Image	213
12. Δv_i^c and Change in Quality Versus Change in Tastes	216
13. Δb_i^c and Individual Consumer Demand: The Case of an Increase in Quality	216
14. Δb_i^c and Individual Consumer Demand: The Case of a Decrease in Quality	222
15. Δa_i^c and Individual Consumer Demand	225
16. Variety Prices	227
17. Δa_i^c and the Constraint	228
18. $\Delta a_{i(\text{market})}$ and Individual Consumer Demand	229
19. Truncated Demand and Windows in x_i, x_j Space	231
20. The Consumer Window and Individual Consumer Demand	233

Chapter 15. Individual Consumer Demand from x_i, x_j Space:

Consumer Interaction with the i th and j th Commodity Producers

1. Interaction Between Consumers and Producers	241
2. Two Definitions of Individual Consumer Demand and the Measurement of Consumer Surplus	253
3. Consumer-Producer Interaction, Neighborhoods, and Truncated Individual Consumer Demand	256

4. Demand Windows and Consumer-Producer Interaction	260
5. The Rank-Ordering of Commodities	262
6. Vibrating Constraints and Individual Consumer Demand	265
7. Indeterminacy Revisited and Conclusions	266
Appendices	
A. The a_i/b_i Ratio and the Constraint	269
B. Empirical Issues	278
1. Difficulties of Aggregation When Quality Is Variable	279
2. Aggregate Market Demand	279
3. Variety Ordering Under Market Demand	281
