Contents

| | |
|---|-----------|
| Foreword | 9 |
| Management summary | 11 |
| 1. Introduction | 17 |
| 1.1. Drivers of resource use | 18 |
| 1.2. Decoupling | 19 |
| 1.3. Global dimensions | 20 |
| 1.4. Key issues and best practices | 21 |
| 2. Resource constraints | 23 |
| 2.1. A classification of challenges | 23 |
| 2.2. Energy resources: security of supply and climate impacts | 25 |
| 2.3. Water and land: ecological footprint | 27 |
| 2.4. Abiotic resources: metal ores and industrial minerals | 29 |
| 2.5. Abiotic resources: construction minerals | 30 |
| 2.6. Biotic resources: HANPP and biodiversity problems | 32 |
| 2.7. Linkages and trade-offs | 34 |
| 2.8. Conclusions | 36 |
| 3. The geopolitics of resources | 39 |
| 3.1. International trade flows of natural resources | 40 |
| 3.2. Price developments | 46 |
| 3.3. The emerging international system | 50 |
| 3.4. Policy trends | 52 |
| 3.5. The EU: challenges and policy responses | 59 |
| 3.6. The Netherlands | 64 |
| 3.7. Conclusions | 66 |

| | | |
|-----------|---|------------|
| 4. | Resource strategies | 69 |
| 4.1. | Mining primary resources | 70 |
| 4.2. | Process optimization | 71 |
| 4.3. | Materials recycling | 74 |
| 4.4. | Radical redesign of products | 78 |
| 4.5. | Substitution: easier said than done | 78 |
| 4.6. | Intensifying the use of products and services | 80 |
| 4.7. | Shifting expenditures to low-impact products and services | 81 |
| 4.8. | Improving quality of life without spending money | 82 |
| 4.9. | Conclusions | 84 |
| 5. | Resource efficiency in the built environment | 87 |
| 5.1. | Bricks outlive their buildings | 88 |
| 5.2. | Reducing carbon dioxide by reusing secondary materials | 91 |
| 5.3. | No need to barbecue secondary asphalt | 94 |
| 5.4. | Building a business model on borrowed materials | 98 |
| 6. | Resource efficiency in the food sector | 101 |
| 6.1. | Brewing a better future | 102 |
| 6.2. | Making a business case of sustainability | 106 |
| 6.3. | 'Green Deal' turns Holland into net exporter of phosphate | no |
| 6.4. | Insects as new raw material and protein source | 114 |
| 7. | Biotic resources in the process industry | 119 |
| 7.1. | Clutching at straws to make paper | 120 |
| 7.2. | Beet thick juice is naphtha to bio-based economy | 123 |
| 7.3. | YXY platform molecule –the green 'Intel Inside' | 126 |
| 7.4. | Sowing the seeds of the third industrial revolution | 129 |
| 7.5. | Waste is culturally defined | 132 |
| 8. | Resource efficiency in the metal and consumer electronics industries | 137 |
| 8.1. | Improving raw material efficiency in the steel industry | 138 |
| 8.2. | Making recycled materials mainstream | 141 |
| 8.3. | Waste management and the circular economy | 144 |
| 8.4. | Sustainability as a driver of innovation | 148 |
| 9. | Resource efficiency in fashion and furnishings | 151 |
| 9.1. | Adding volume to the circular economy | 152 |
| 9.2. | Designed for reincarnation | 154 |
| 9.3. | Sustainability with substance | 158 |
| 9.4. | Dyeing textiles without water | 161 |

| | |
|---|-----|
| 10. The challenges ahead | 165 |
| 10.1. Understanding the challenges | 166 |
| 10.2. Business opportunities | 167 |
| 10.3. Creating the necessary conditions | 170 |
