

National Environmental Accounting

*Bridging the Gap between
Ecology and Economy*

Joy E. Hecht

Resources for the Future

Washington, DC, USA

Contents

<i>Preface</i>	xi
1. National Environmental Accounts	1
Origin of the National Income Accounts / 2	
Why Change the SNA? / 3	
Sustainable Income and the Environmental Accounts / 5	
Brief History of Applied Work on Environmental Accounting / 9	
2. Concepts of Conventional National Income Accounting	16
The Economy and the Accounts / 16	
From Concepts to Structured Accounts: What the Accounts Track / 25	
3. Structure of the Conventional Income Accounts	33
The Integrated Economic Accounts / 33	
Accounting Aggregates / 41	
Supply and Use Tables / 42	
Input–Output Tables / 43	
Input–Output Analysis / 47	
4. Overview of the Revised SEEA	53
Physical Flow Accounts / 53	
Hybrid Accounts / 61	
Environmental Protection and Resource Management Accounts / 70	
Natural Resource Asset Accounts / 71	
Environmentally Adjusted Macroeconomic Indicators / 74	

5. Pollution Accounting: The Physical Side.....	76
How Much Do We Pollute? / 76	
Who Does the Polluting? / 77	
Calculating the Residuals / 78	
What Exactly Is a Residual? / 80	
International Flows / 82	
Recycling and Waste Management / 84	
Pollution Indicators / 86	
6. Pollution Accounting: What Are We Spending Now?	90
Cost of Preventing Pollution versus Harm Resulting from Pollution / 91	
Classification of Environmental Protection Activities / 92	
Products Used for Environmental Protection / 94	
The Environment Industry / 94	
Environmental Taxes and Subsidies / 96	
Supply and Use Tables for Environmental Protection Expenditures / 97	
National Expenditure on Environmental Protection / 100	
7. Pollution Accounting: Policy Questions	102
What Would It Cost To Reduce Pollution Further? / 102	
What Costs Does Pollution Impose? / 108	
Valuing the Costs Imposed by Pollution / 110	
Economic Approach to Pollution Damages / 113	
Valuation, Cost-Benefit Analysis, and Accounting / 114	
Environmental Policy in the Accounts / 115	
8. Resource Accounting	120
Definition of Resource Assets in the Accounting Frameworks / 121	
General Framework for Asset Accounts / 121	
Physical versus Monetary Accounts / 124	
Link between Asset Accounts and Current Accounts / 125	
Methods for Valuing Assets and Depletion / 125	
Flows of Resource Products / 131	
9. Forest Accounts	136
Classifying Forest Goods and Services in Theory / 136	
Challenges in Designing Forest Classification Systems / 137	
Accounting Structure for Forest Assets / 139	
Accounting Structure for Flows of Forest Products / 139	
Definition of Forest / 141	
Classifying Forest Goods and Services in Practice / 142	
Managed versus Natural Forests / 142	
Valuing Timber Assets / 144	
Examples / 145	

10. Subsoil Asset Accounts	153
Mineral Sustainability: A Contradiction in Terms? / 154	
Running Out of Resources / 154	
General Framework for Subsoil Assets in the Accounts / 156	
Classifying Subsoil Assets / 157	
Valuing Stocks and Rents / 158	
Examples / 161	
11. Fisheries, Land, and Water Accounts	169
Fisheries / 169	
Land / 175	
Water / 183	
12. Macroeconomic Indicators in the SEEA	196
Adjustments for Depletion and Degradation: The Problems / 196	
How the Problems Are Handled in the Accounts / 199	
Adjustments for Nonmarketed Products and Their Loss as a Result of Degradation / 202	
Defensive Expenditures / 204	
Model-Based Approaches to Measuring Income / 206	
13. Macroeconomic Measures outside the SEEA	209
Genuine Savings / 209	
Approaches Based Solely in Economics / 211	
Measuring Welfare / 214	
Measuring Aggregate Environmental Impact of the Economy / 221
