Increasing Returns and Firm Performance:

Toenemende Meeropbrengsten en Bedrijfsprestatie:
Een Em'pirisch Onderzoek

Proefschrift

ter verkrijging van de graad van doctor aan de
Erasmus Universiteit Rotterdam
op gezag van de
rector magnificus
Prof.dr. S.W.J. Lamberts
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvindeii op
donderdag 20 oktober 2005 om 16.00 uur
door

Erik den Hartigh

geboren te Temeuzen

TABLE OF CONTENTS

1. INTRODUCTION 1
1.1 Why study increasing returns? 1
1.2 Increasing returns, market structure, firm behavior and firm performance ... 3
1.3 Central problem and research approach of the thesis 5
1.3.1 Central problem 5
1.3.2 Industrial organization approach 6
1.3.3 Analytical framework 7
1.4 Contribution of the thesis 8
1.4.1 Existing literature streams on increasing returns 8
1.4.2 Perspective and aims of this thesis 9
1.5 A managerial definition of increasing returns 10
1.5.1 Existing definitions of increasing returns 10
1.5.2 Definitions of the separate mechanisms 11
1.5.3 Towards an integrative definition of increasing returns 12
1.6 Research design of the thesis 14
1.7 Structure of the thesis 15
1.8 Glossary 17

2. INTRODUCTION TO INCREASING RETURNS LITERATURE 21
2.1 Increasing returns and the history of economic thought 21
2.2 The classical economic perspective 23
2.2.1 Before Smith 24
2.2.2 Smith 25
2.2.3 After Smith: Malthus and Ricardo 26
2.2.4 The difference between Smith and Ricardo 27
2.2.5 Mill 27
2.3 The neoclassical economic perspective 28
2.3.1 Walras and general equilibrium theory 28
2.3.2 Marshall 29
2.3.3 Bullock, Clapham and the classification of industries 30
2.3.4 Sraffa and the Economic Journal discussion 31
2.3.5 Hicks 33
2.4 Alternatives and new directions in economics 33
2.4.1 Young and the foundations of endogenous growth theory 34
2.4.2 Verdoorn 37
2.4.3 The Austrian School 37

2.4.4 Kaldor 38
2.4.5 Arrow '40
2.4.6 Romer and endogenous growth theory 41
2.4.7 New division of labor theoiy 43
2.5 Complexity science, sociology and social economics 44
2.5.1 Arthur 47
2.5.2 Sociology 48
2.5.3 Social economics 48
2.6 The management sciences 50
2.6.1 Inside-out approaches 50
2.6.2 Outside-in approaches 52
2.6.3 Increasing returns mechanisms in management literature 53
2.6.4 Product adoption and diffusion 54
2.6.5 Technology battles 55
2.6.6 Double jeopardy 58
2.6.7 Positive feedbacks in marketing 58
2.7 Conclusions 59

3. LITERATURE REVIEW 61
3.1 Systematic literature overview 61
3.2 Classification of the literature according to the structure-conduct-performance paradigm 110
3.3 Perspectives on increasing returns in literature 111
3.4 Mechanisms addressed and definitions provided in literature 112
3.5 Research designs used in literature 113
3.6 Results obtained in literature 114
3.7 Conclusions 114

4. MARKET-BASED INCREASING RETURNS 117
4.1 Network effects 117
4.1.1 Defining network effects 117
4.1.2 Direct network effects 118
4.1.3 Indirect network effects 120
4.1.4 The double network effect 121
4.2 Social interaction effects 122
4.2.1 Defining social interaction effects 122
- 4.2.2 Information exchange 122
4.2.3 Self-reinforcing expectations 123

4.2.4 The double social interaction effect ... 124
4.3 Extent of network and social interaction effects ... 125
4.3.1 Marginal gains of network size ... 125
4.3.2 Conformity and individuality ... 126
4.3.3 Degree and structure of economic and social" interdependence ... 126
4.3.4 Nature of product ... 128
4.3.5 Complementarity ... 129
4.3.6 Substitutability ... 130
4.3.7 Compatibility ... 130
4.4 Influence of network effects and social interaction effects on market outcomes ... 131
4.4.1 Technology battles ... 131
4.4.2 Competition at network level ... 133
4.4.3 Multiple possible equilibria ... 134
4.4.4 Lock-in ... 135
4.4.5 Excess inertia and excess momentum ... 137
4.4.6 Path dependence ... 138
4.4.7 Market imperfections and inefficiency? ... 138
4.5 The market potential for scale and learning effects ... 140
4.6 Conclusions ... 142

5. FIRM-BASED INCREASING RETURNS ... 143
5.1 Increasing returns and increasing returns to scale ... 144.
5.1.1 Increasing returns to scale ... 145
5.1.2 Increasing returns ... 147
5.2 Scale effects ... 148
5.2.1 Defining scale effects ... 148
5.2.2 Economies of scale, scope and sequence ... 149
5.3 Learning effects ... 150
5.3.1 Defining learning effects ... 150
5.3.2 Induced learning effects ... 152
5.3.3 Exogenous learning effects ... 153
5.3.4 Autonomous learning effects ... 153
5.3.5 The relation between scale effects and learning effects ... 155
5.4 Extent of scale and learning effects ... 155
5.4.1 Extent of scale effects ... 155
5.4.2 Extent of learning effects ... 159
5.4.3 Information and knowledge intensity ... 161

5.5 Firm strategies for internalizing the potential for scale and learning effects 166
5.5.1 Making the right strategic choices: shaper, follower or reserving the right to play 167
5.5.2 Fighting the battle for the technological standard 168
5.5.3 Influencing expectations 169
5.5.4 Avoiding lock-out situations 170
5.5.5 Competition on the network level 171
5.5.6 Exploiting the installed base 171
5.6 Realizing and'exploiting the potential for scale and learning effects 172
5.6.1 Closing the positive feedback loop 172
5.6.2 Generic strategies for value creation 174
5 6.3 Relationship of the exploitation of the potential with firm performance 176
5.7 Conclusions 177

6. FRAMEWORK & HYPOTHESES 179
6.1.1 Conceptual framework 179
6.2 Research hypotheses 180
6.2.1 The effect of social interaction effects on network effects 180
6.2.2 The effect of network effects and social interaction effects on the potential for scale and learning effects 181
6.2.3 The effect of the potential for scale and learning effects on- the realization of scale and learning effects 182
6.2.4 The effect of the realization of scale and learning effects on product and organizational performance 183
6.3 Research design 185
6.3.1 First empirical study 185
6.3.2 Second empirical study 186
6.3.3 Third empirical study 187
6.3.4 Relations between the studies 188
6.3.5 Summary research design and hypotheses addressed 189
6.4 Measurement 191
6.4.1 Measurement of network and social interaction effects 191
6.4.2 Measurement of scale and learning effects 192
6.4.3 Measurement of firm performance 194
6.5 Conclusions 196

1. REPORT FIRST EMPIRICAL STUDY 197
7.1 Development of the measures 197
7.1.1 Specifying the domain of the constructs 197
7.1.2 Generating a sample of items 198
7.1.3 Collecting data and purifying the measures 199
7.2 Sample and data description 201
7.3 Validation of the measures 204
7.3.1 Unidimensionality 205
7.3.2 Reliability 212
7.3.3 Within-rriethod convergent validity 213
7.3.4 Discriminant validity 214
7.3.5 Conclusions on construct validity 215
7.4 Results of testing the research hypotheses 218
7.4.1 Research model and hypotheses 218
7.4.2 The relationship between social interaction effects and network effects 219
7.4.3 The relationship between social interaction effects and network effects and the potential for scale and learning effects 219
7.4.4 The relationship between the potential for scale and learning effects and the realization of scale and learning effects 220
7.4.5 The relationship between the realization of scale and learning effects and product performance 221
7.4.6 The relationship between the realization of scale and learning effects and organizational performance 221
7.4.7 The relationship.between product performance and organizational performance 221
7.5 Additional tests of the model 221
7.5.1 Testing an alternative research model 222
7.5.2 Testing model stability 224
7.5.3 Model stability for technology characteristics 226
7.5.4 Model stability for product characteristics 227
7.5.5 Model stability for market characteristics 230
7.6 Conclusions 231

8. REPORT SECOND EMPIRICAL STUDY 235
8.1 Development of the measures 235
8.1.1 Measuring social interaction effects, network effects and market dominance 235

8.1.2 Measuring scale effects and learning effects 237
8.1.3 Measurement in physical or monetary units 237
8.1.4 Correlators for measuring output and input 239
8.1.5 Measuring-firm performance 240
8.2 Sample and data description 240
8.3 Validation of the subjective measures 244
8.3.1 Unidiinensionality 245
8.3.2 Reliability 247
8.3.3 Within-method convergent validity 248
8.3.4 Discriminant validity 248
8.3.5 Conclusions on construct validity 249
8.4 Validation of the objective measures 249
8.4.1 Consistency of the data definitions 250
8.4.2 Correction for inflation 250
8.4.3- Correction for outliers 251
8.4.4 Correction for negative growth rates 251
8.4.5 Conclusions on construct validity 252
8.5 Results 253
8.5.1 Research model and hypotheses 253
8.5.2 Results for the main effects 253
8.5.3 Tests for mediation effects 256
8.6 Conclusions 261

9. REPORT THIRD EMPIRICAL,STUDY 265
9.1 Why the Verdoorn law? 265
9.1.1 Neoclassical analysis and the Solow residual 266
9.1.2 Zegveld's firm-level analysis 267
9.1.3 Endogenous growth 268
9.1.4 The Verdoom law 270
9.2 The Verdoom model and its interpretation 273
9.2.1 The original Verdoom model 274
9.2.2 Choosing a model specification 274
9.2.3 Including capital in the Verdoorn equation 276
9.2.4 Single relationship or^system of equations 279
9.2.5 The static-dynamic paradox 280
9.2.6 The firm-level Verdoom model and its interpretation 281
9.2.7 The productivity-performance model and its interpretation 283

9.3 Operational measurements of growth of output, productivity and firm performance 284
9.4 Sample and data description 288
9.5 Validation of the measures 290
9.5.1 Consistency of the data definitions 290
9.5.2 Correction for inflation 291
9.5.3 Correction for outliers 292
9.5.4 Correction for negative growth rates 293
9.5.5 Small number of data points 293
9.5.6 The danger of spurious regression 294
9.5.7 Check for changes in the capital-labor and capital-output ratio 297
9.5.8 Test for autocorrelation 308
9.6 Results 310
9.6.1 Research model and hypotheses 310
9.6.2 Estimation method 310
9.6.3 Estimation of the firm-level Verdoorn model for individual firms 313
9.6.4 Estimation of the productivity-performance model for individual firms 327
9.6.5 Estimation of the Verdoorn model for industries 340
9.6.6 Estimation of the productivity-performance model for industries 345
9.6.7 Estimation of the Verdoom model for the entire population 348
9.6.8 Estimation of the productivity-performance model for the entire population 351
9.6.9 Results of the estimations of the Verdoom model 352
9.6.10 Results of the estimations of the productivity-performance model 353
9.7 Conclusions 354

10. CONCLUSIONS, MANAGEMENT IMPLICATIONS AND SUGGESTIONS FOR FURTHER RESEARCFI 357
10.1 Conclusions from the research ..... 358'
10.1.1 How can market-based and firm-based mechanisms of increasing returns be theoretically specified and defined? 358
10.1.2 How can market-based and firm-based mechanisms of increasing returns be measured? 360
10.1.3 What is the effect of market-based mechanisms of increasing returns on firm-based mechanisms of increasing returns? 362
10.1.4 What is the joint effect of market-based and firm-based mechanisms of increasing returns on firm performance? 363

10.1.5 Summarizing the conclusions on the hypotheses 364
10.2 Limitations and suggestions for further research 364
10.2.1 Limitations and further research with regard to the choice of the research paradigm- theory of the firm 365
10.2.2 Limitations and further research with regard to the measurement tools and the methods of analysis 366
10.2.3 Limitations and further research with regard to the research results 368
10.3 Management implications 370
10.3.1 Management framework 370
10.3.2 Management implications and further research 372
10.3.3 Concluding 374

REFERENCES 377

APPENDIX I: ITEMS FROM THE QUESTIONNAIRE USED IN THE FIRST EMPIRICAL STUDY 405
Market-based mechanisms of increasing returns 405
Product-related social interaction effects 405
Technology-related social interaction effects 405
Product-related network effects 406
Technology-related network effects 406
Firm-based mechanisms of increasing returns 406
Potential for scale and learning effects 406
Realization of scale and learning effects 407
Firm performance 407
Product performance 407
Organizational performance 408
Moderators 408
Product complementarity and compatibility 408
Technology complementarity and compatibility 408
Path dependence 409
Lock-in effects 409
Product substitution effects 410
Technology substitution effects 410
Market predictability 410
Labor-capital-knowledge intensity 411

APPENDIX 11: ITEMS FROM THE QUESTIONNAIRE USED IN THE SECOND EMPIRICAL STUDY 413
Market-based mechanisms of increasing returns 413
Product-related social interaction effects 413
Technology-related social interaction effects 413
Product-related network effects 414
Technology-related network effects 414
Dependent variables: market dominance 415

APPENDIX III: LIST OF FIRMS FROM THE SECOND AND THIRD EMPIRICAL STUDIES 417

APPENDIX IV: DETAILED REPORT ON THE ESTIMATION OF THE VERDOORN LAW AND THE PRODUCTIVITY-PERFORMANCE RELATIONSHIP 421
Analyses of the firms 422
Analyses of the industries 467
Analysis of the entire population 477

APPENDIX V: SUPPORTING ESTIMATIONS FOR THE CORRECTIONS ON THE VERDOORN LAW ESTIMATION 479

EXECUTIVE SUMMARY 499

SAV1ENVATTTNG (SUMMARY IN DUTCH) 507
