CONTENTS

PART I BASIC PROBABILITY AND STATISTICS 1

1 The Nature of Statistics 3

1-1 Random Sampling: A Political Poll 4
1-2 Randomized Experiments: Testing a Hospital Routine 10
1-3 Observational Studies vs. Randomized Experiments 14
1-4 Brief Outline of the Book 20
Chapter 1 Summary 20

2 Descriptive Statistics 25

2-1 Frequency Tables and Graphs 26
2-2 Center of a Distribution 32
2-3 Spread of a Distribution 39
2-4 Statistics by Computer 46
2-5 Linear Transformations 47
2-6 Calculations Using Relative Frequencies 52
2-7 The Use and Misuse of Graphs 53
Chapter 2 Summary 64

3 Probability 69

3-1 Introduction 70
3-2 Probability Models 73
3-3 Compound Events 79
3-4 Conditional Probability 85
3-5 Independence 89
3-6 Bayes Theorem: Tree Reversal 93
3-7 Other Views of Probability 99
Chapter 3 Summary 103

4 Probability Distributions 109

4-1 Discrete Random Variables 110
4-2 Mean and Variance 113
4-3 The Binomial Distribution 116
4-4 Continuous Distributions 124
4-5 The Normal Distribution 127
4-6 A Function of a Random Variable 134
*4-7 Expected Value in Bidding 141
Chapter 4 Summary 146

5 Two Random Variables 153

5-1 Distributions 154
5-2 A Function of Two Random Variables 161
5-3 Covariance 164
5-4 Linear Combination of Two Random Variables 170
Chapter 5 Summary 176
Review Problems (Chapters 1-5) 182

PART II INFERENCE FOR MEANS AND PROPORTIONS 187

6 Sampling 189

6-1 Random Sampling 190
6-2 Moments of the Sample Mean 196
6-3 The Shape of the Sampling Distribution 199
6-4 Proportions (Percentages) 207
*6-5 Small-Population Sampling 215
*6-6 Monte Carlo 218
Chapter 6 Summary 225

7 Point Estimation 231

7-1 Populations and Samples 232
7-2 Efficiency of Unbiased Estimators 232
7-3 Efficiency of Biased and Unbiased Estimators 239
*7-4 Consistent Estimators 244
Chapter 7 Summary 248

8 Confidence Intervals 253

8-1 A Single Mean 254
8-2 Small-Sample *t* 261
8-3 Difference in Two Means, Independent Samples 265
8-4 Difference in Two Means, Matched Samples 268
8-5 Proportions 273
*8-6 The Bootstrap 277
Chapter 8 Summary 281

9 Hypothesis Testing 287

9-1 Hypothesis Testing Using Confidence Intervals 288
9-2 p-Value (One-Sided) 293
9-3 Classical Hypothesis Tests 300
*9-4 Classical Tests Reconsidered 306
*9-5 Operating Characteristics Curve (OCC) 310
*9-6 Two-Sided Tests 314
Chapter 9 Summary 320

10 Analysis of Variance (ANOVA) 324

10-1 One-Way ANOVA 325
10-2 Two-Way ANOVA 336
10-3 Confidence Intervals 343
Chapter 10 Summary 346
Review Problems (Chapters 6-10) 350

PART III REGRESSION: RELATING TWO OR MORE VARIABLES 355

11 Fitting a Line 357

11-1 Introduction 358
11-2 Ordinary Least Squares (OLS) 360
11-3 Advantages of OLS and WLS 366
Chapter 11 Summary 368

12 Simple Regression 371

12-1 The Regression Model 372
12-2 Sampling Variability "375
12-3 Confidence Intervals and Tests for β 379
12-4 Predicting *Y* at a Given Level of X 383
12-5 Extending the Model 389
Chapter 12 Summary 390

13 Multiple Regression 396

13-1 Why Multiple Regression? 397
13-2 The Regression Model and Its OLS Fit 400
13-3 Confidence Intervals and Statistical Tests 406
13-4 Regression Coefficients as Multiplication Factors 410
*13-5 Simple and Multiple Regression Compared 417
*13-6 Path Analysis 424
Chapter 13 Summary 428

14 Regression Extensions 434

14-1 Dummy (0-1) Variables 435
14-2 Analysis of Variance (ANOVA) by Regression 445
14-3 Simplest Nonlinear Regression 449
*14-4 Nonlinearity Removed by Logs 452
*14-5 Diagnosis by Residual Plots 461
Chapter 14 Summary 466

15 Correlation 474

15-1 Simple Correlation 475
15-2 Correlation and Regression 482
15-3 The Two Regression Lines 489
15-4 Correlation in Multiple Regression 496
15-5 Multicollinearity 501
Chapter 15 Summary 506
Review Problems (Chapters 11-15) 512

PART IV TOPICS IN CLASSICAL AND BAYESIAN INFERENCE **515**

16 Nonparametric and Robust Statistics *(Requires Chapter 9)* **517**

16-1 Introduction: Mean or Median? 518
16-2 Sign Test for the Median 518
16-3 Confidence Interval for the Median 522
16-4 Wilcoxon Rank Test 525
16-5 Rank Tests in General 528
16-6 Runs Test for Independence 533
16-7 Robust Statistics: Trimming and Weighting 536
Chapter 16 Summary 545

17 Chi-Square Tests *(Requires Chapter 9)* **549**

17-1 x^2 Tests for Multinomials: Goodness of Fit 550
17-2 x^2 Tests for Independence: Contingency Tables 555
Chapter 17 Summary 561

***18 Maximum Likelihood Estimation** *(Requires Chapter 7)* **564**

18-1 Introduction 565
18-2 MLE for Some Familiar Cases 566
18-3 MLE for the Uniform Distribution 573
18-4 MLE in General 576
Chapter 18 Summary 579

***19 Bayesian Inference** *(Requires Chapter 8)* **582**

19-1 Posterior Distributions 583
19-2 The Population Proportion 588
19-3 The Mean ju. in a Normal Model 598
19-4 The Slope /3 in Normal Regression 605
19-5 Bayesian Shrinkage Estimates 608
19-6 Classical and Bayesian Estimates Compared 615
Chapter 19 Summary 615

***20 Bayesian Decision Theory** *(Requires Chapter 19)* **620**

20-1 Maximizing Gain (or Minimizing Loss) 621
20-2 Point Estimation as a Decision 627
20-3 Classical and Bayesian Statistics Compared 633
Chapter 20 Summary 635

PART V SPECIAL TOPICS FOR BUSINESS AND ECONOMICS 637

21 Decision Trees *(Requires Chapter 3)* **639**

21-1 The Basic Tree 640
21-2 Testing to Revise Probabilities: Bayes Theorem 648
21-3 Utility Theory to Handle Risk Aversion 653
Chapter 21 Summary 657

22 Index Numbers *(Requires Nothing Previous)* **664**

22-1 Price Indexes 665
22-2 Further Indexes 668
22-3 Indexes in Practice 672
Chapter 22 Summary 675

23 Sampling Designs *(Requires Chapter 8)* **678**

23-1 Stratified Sampling 679
23-2 Other Sampling Designs 687
Chapter 23 Summary 690

24 Time Series *(Requires Chapter 15)* **692**

24-1 Two Special Characteristics of a Time Series 693
24-2 Decomposition and Forecasting Using Regression 695

24-3 Traditional Ratio to Moving Average 705
24-4 Forecasting Using Exponential Smoothing 710
24-5 Forecasting Using Box-Jenkins Models 712
*24-6 Generalized Least Squares (GLS) 714
Chapter 24 Summary 719

***25 Simultaneous Equations *(Requires Chapter 13)* 722**

25-1 Introduction: The Bias in OLS 723
25-2 The Remedy: Instrumental Variables (IV) 727
25-3 Two-Stage Least Squares (2SLS) 731
Chapter 25 Summary 735

***Appendixes 737**

2-2 Careful Approximation of the Median 738
2-5 Effects of a Linear Transformation: Proofs 738
3-7 Probability as Axiomatic Mathematics 738
4-2 Easier Formula for cr^2: Proof 739
4-3 Binomial Formula: Proof 739
4-4 Calculus for Continuous Distributions 741
5-3 Independent Implies Uncorrelated: Proof 742
5-4 Linear Combinations: Proofs 742
6-3 Central Limit Theorem 743
6-4 Continuity Correction: Graphical Explanation 743
7-2 Standard Error of X 743
7-4 Consistency: Careful Definition 744
8-3 Standard Error of $(\bar{X}_1 - \bar{X}_2)$: Proof 745
8-5 Confidence Interval for v. Derivation of Graph 745
9-2 A More Exact p-Value for Proportions 746
10-1 Breakdown of Total SS: Proof 747
10-2 Two-Way ANOVA, Breakdown of Total SS: Proof 747
10-3 ANOVA Is Much More Than Just Testing H_0 748
11-1 Lines and Planes 748
11-2 Least-Squares Formulas: Proofs 750
12-2 The Moments of *b:* Proofs and Discussion 751
12-3 A One-sided or Two-sided Test? 753
12-4 Confidence Intervals above X_0: Proofs 754
13-2 Solution of a Set of Simultaneous Equations 755
13-5 Direct Plus Indirect Relation: Proof 756
14-4 Log Regression Handles a Multiplicative Error Term 756
15-1 Correlation in Chapter 15 Agrees with Chapter 5 757
15-2 ANOVA and r^2: Proofs 757
18-2 MLE for Some Familiar Cases: Proofs 758
19-2 Bayesian Confidence Interval for 7*t*. Proof 760
19-3 Posterior Distribution of /x in a Normal Model: Proof 761
19-4 Posterior Distribution of (3 in Normal Regression: Proof 761
19-5 Bayesian Shrinkage Confidence Intervals 762
24-2 Serial Correlation and the Durbin-Watson Test 762
24-3 Moving Averages in General 763
24-4 Exponential Smoothing: Proof 764
24-5 Forecasting Using Box-Jenkins Models 764
