ESSAYS IN SEARCH ACTIVITY

HELSINKI SCHOOL OF ECONOMICS

ACTA UNIVERSITATIS OECONOMICAE HELSINGIENSIS

A-240

Contents

1	**INTRODUCTION**	1
1.1	Matching Functions	2
1.2	The Questions Answered to in the Present Thesis	5
	1.2.1 Multiple Unemployment Equilibria?	6
	1.2.2 Who Searches Whom?	11
	1.2.3 Price Distribution	13
	1.2.4 Supply of Pollution Permits	14
References		16
I	**Search Intensities, Returns to Scale, and Uniqueness of Unemployment Equilibrium**	
1	Introduction	1
2	A Model with a Multiplicative Matching Function	4
	2.1 Strategic Complementarity	8
	2.2 Common Pool Externality	11
	2.3 Condition for Unique Equilibrium with Multiplicative Matching Function	13
3	Additive Matching Function	14
	3.1 Reaction Functions	15
	3.2 Common Pool Externality	17
	3.3 Condition for Unique Equilibrium with Additive Matching Function	17
4	A Modified Howitt-McAfee Model	18
	4.1 Howitt and McAfee's Method of Analysis	20
	4.2 Strategic Complementarity in the Modified Model	22
	4.3 Common Pool Externality in the Modified Model	23
	4.4 Condition for Unique Equilibrium in the Modified Howitt-McAfee Model	25
5	Conclusion	26
6	Appendix	27
References		29
II	**Search, Entry, and Unique Equilibrium**	1
1	Introduction	1
2	The Model	3
3	Equilibrium	4
4	Uniqueness of Equilibrium	7
	4.1 Unique Number of Vacancies	7
	4.2 Strategic Complementarity	8
	4.3 Common Pool Externality	14
5	Conclusion	20
6	Appendix	22
References		27
III	**Physical Search**	
1	Introduction	2
2	The Model	4
3	Auction	6

4 Bargaining 9
5 Efficiency 11
5.1 Relative Efficiency of Auction and Bargaining in Two-Sided Search 11
5.2 Relative Utility of a Buyer and a Seller in Two-sided Search 12
5.3 Efficiency of Two-sided versus One-Sided Search 13
5.4 Efficiency in One-Sided Search 14
6 Stability of Two-Sided Search 15
6.1 Stability of Two-Sided Search in Case of Auction 15
6.2 Stability of Two-Sided Search in Case of Bargaining 18
7 Conclusion 20
8 Appendix 22
References 33

IV Price Distribution in a Symmetric Economy
1 Introduction 1
2 The Model 3
3 No Pure-Strategy Equilibrium Exists 4
4 Existence of Equilibrium 8
4.1 Existence of a Symmetric Mixed-Strategy Equilibrium when the Number of Buyers and Sellers is Finite 8
4.2 Properties of a Symmetric Mixed-Strategy Equilibrium when the Number of Buyers and Sellers is Infinite 10
5 Conclusion 11
6 Colophon 12
7 Appendix 12
7.1 Proofs related to Subsection 4.1 12
7.2 Proof of Proposition 4 15
References 18

V Frictions in Project-Based Supply of Permits 347
1 Introduction 347
2 The Model 349
2.1 Matching: Market for Projects 349
2.2 Technologies and Allocations 351
2.3 Permit Market 351
2.4 Projects 352
3 Decomposition of Losses from Frictions 354
3.1 Decomposition of Losses for Project Hosts 354
3.2 Decomposition of Losses for Permit Buyers 355
3.3 Market-Level Losses 357
4 Application 357
5 Conclusion 359
Acknowledgements 360
Notes 360
References 363
Appendix: Proofs 364
