Contents

NUMBERING SYSTEM	xviii
MATHEMATICAL NOTATIONS AND GREEK ALPHABET	xix
1. NAIVE SET THEORY	1
1.1 Basic Definitions	1
1.2 Additional Definitions	4
1.3 Simple Laws and Some Extensions	6
1.4 Sets in Probability and Statistics	8
Problems	12
Honors Problems	13
2. PROBABILITY	14
2.1 Axioms of Probability; Elementary Properties	14
2.2 Finite Discrete Sample Space and Combinatorics	22
2.3 Conditional Probability; Bayes' Rule; Additional Properties	38
2.4 Independent Events	50
Problems	59
Honors Problems	64
3. RANDOM VARIABLES: DISCRETE CASE	69
3.1 Discrete Probability Functions and Distribution Functions	69
3.2 Special Discrete Distributions	80
3.3 Relations Among Certain Discrete Distributions	94
3.4 Multivariate Distributions; Independence	98
3.5 Special Multivariate Discrete Distributions	112

3.6 Distributions of Functions of Discrete Random Variables	114
Problems	118
Honors Problems	122
4. RANDOM VARIABLES: CONTINUOUS AND MIXED CASES	126
4.1 Classification of Distribution Functions	127
4.2 Special Continuous Distributions	137
4.3 Relations Among Continuous Distributions	155
4.4 Multivariate Continuous Distributions; Independence	155
4.5 Special Multivariate Continuous Distributions	163
4.6 Distributions of Functions of Continuous Random Variables	171
4.7 Computer Generation of Random Variables	188
4.8 Estimation of d.f.'s and p.d.f.'s	196
Problems	203
Honors Problems	208
5. MOMENTS	210
5.1 Expectation and Other Moments; Median	210
5.2 Mean and Variance of Special Random Variables	220
5.3 Multivariate Moments	231
5.4 Means and Variances of Sums of Independent Random Variables	251
5.5 Moment-Generating Functions and Characteristic Functions	255
5.6 Order Statistics	280
Problems	287
Honors Problems	292
6. SUMS OF RANDOM VARIABLES, PROBABILITY INEQUALITIES, AND LIMIT LAWS	294
6.1 Chebyshev, Markov, and Other Probability Inequalities	295
6.2 Convergence Concepts; Laws of Large Numbers	300
6.3 Central Limit Theorem, Other Limit Laws, and Their Applications	315
Problems	331
Honors Problems	334
7. POINT ESTIMATION	336
7.1 Statistical Point Estimation: Concepts	336
7.2 Maximum-Likelihood Estimation	347

7.3	Method of Moments Estimation (MME)	362
7.4	"Goodness" Properties of Estimators	367
7.5	Cramer-Rao (Information) Inequality and Efficiency of Estimation	376
	Problems	385
	Honors Problems	389
8.	DATA REDUCTION AND BEST ESTIMATION (SUFFICIENCY, COMPLETENESS, AND UMVUE'S)	392
8.1	Sufficiency	392
8.2	Completeness	410
8.3	Best Unbiased Estimation (UMVUE's)	418
	Problems	427
	Honors Problems	429
9.	TESTS OF HYPOTHESES	432
9.1	Simple and Composite Null and Alternative Hypotheses	432
9.2	Tests; Errors of Type I and Type II; Power	435
9.3	The Neyman-Pearson Lemma; Its Generalizations and Uses	444
9.4	A Decision-Theoretic View of the Hypothesis-Testing Problem	471
9.5	Testing Normal Means (One Population)	478
9.6	Testing Normal Variances (One Population)	487
9.7	Testing Normal Variances (Two Populations)	490
9.8	Testing Normal Means (Two Populations with Equal Variances)	494
9.9	Testing Normal Means (Two Populations with Unequal Variances: The Behrens-Fisher Problem)	499
9.10	Testing Normal Means: Exact Solution of the Behrens-Fisher Problem	503
9.11	The Likelihood-Ratio Test and Sequential LR Test (SPRT)	514
9.12	The Chi-Square Test of Goodness-of-Fit	527
9.13	$r \times c$ Contingency Tables	533
	Problems	538
	Honors Problems	544
10.	INTERVAL ESTIMATION	549
10.1	Confidence Sets and Tests of Hypotheses	549
10.2	Confidence Intervals for One Normal Mean	553
10.3	Confidence Intervals for One Normal Variance	558
10.4	Confidence Intervals for a Success Probability	561

10.5	Confidence Intervals for the Difference of Two Normal Means	566
10.6	Confidence Intervals for the Ratio of Two Normal Variances	569
10.7	Large Sample Confidence Interval for Difference of Two Probabilities of Success	570
10.8	Confidence Intervals vs. Hypothesis Testing: A Duality Problems	572 575
	Honors Problems	577
11.	RANKING AND SELECTION PROCEDURES	579
11.1	The General Ranking Problem	579
11.2	Selection of the Best (Largest Mean) Normal Population	581
11.3	Selection of the Best (Smallest Variance) Normal Population	595
11.4	Extensions and Generalizations; Subset Selection Problems	598 602
	Honors Problems	605
12.	DECISION THEORY	609
12.1	The General Problem of Statistics	609
12.2	Hypothesis Testing	630
12.3	Interval Estimation	634
12.4	Ranking and Selection	635
12.5	General Decision Theory	636
12.6	An Overview	641
	Problems	643
	Honors Problems	652
13.	NONPARAMETRIC STATISTICAL INFERENCE	655
13.1	Nonparametric Confidence Intervals	656
13.2	Nonparametric Testing of Quantiles ξ_p	663
13.3	Nonparametric Tests for Ordinal Data	664
13.4	Tests for Distribution Functions; Tests of Normality Problems	669 674
	Honors Problems	675
14.	REGRESSION AND LINEAR STATISTICAL INFERENCE; ANALYSIS OF VARIANCE	677
14.1	Estimation of Regression Parameters; Linear Models	678
14.2	Testing Hypotheses about Regression Parameters	685
14.3	Prediction and Confidence Intervals in Regression; Computer Packages for Regression	687

14.4	Selection of the Best Regression	693
14.5	Multiple Regression	694
14.6	One-Way Analysis of Variance	702
14.7	Two-Way Analysis of Variance	716
	Problems	724
	Honors Problems	728
15.	ROBUST STATISTICAL PROCEDURES	730
15.1	The Influence Curve	730
15.2	The Influence Curve in Two Dimensions	731
15.3	The Empiric Influence Curve in Two Dimensions	733
15.4	M-Estimation	738
15.5	The Jackknife Estimator	743
15.6	The General Statistical Simulation Procedure (SSP) and Bootstrap Methods	749
	Problems	752
	STATISTICAL TABLES	753
Table 1	Auxiliary Function \sqrt{x}	753
Table 2	Auxiliary Function $n\backslash$	754
Table 3	Auxiliary Function $(\ " j$	755
Table 4	Auxiliary Function $e^{\sim x}$	756
Table 5	The Binomial Distribution	758
Table 6	The Hypergeometric Distribution	763
Table 7	The Poisson Distribution	766
Table 8	The Beta Distribution	771
Table 9	The Gamma Distribution	776
Table 10	The Chi-Square Distribution	778
Table 11	The Normal Distribution	781
Table 12	The F-Distribution	784
Table 13	The \wedge -Distribution	788
