INTRODUCTION

1. The low-tech issue	3
<i>Hartmut Hirsch-Kreinsen, Katrin Halm and David Jacobson</i>	

PART I: INNOVATION IN LMT: CONDITIONS AND REQUIREMENTS

2. How to grasp innovativeness of organizations: outline of a conceptual tool	25
<i>Gerd Bender</i>	
3. Standard-setting competition and open innovation in non-HT industries: mechanical engineering and machinery	43
<i>Alexander Gerybadze and Andre Slowak</i>	
4. The moral economy of technology indicators	64
<i>Benoit Godin</i>	
5. Critical comments on the 'moral economy of technology indicators'	85
<i>Hario If Grupp</i>	

PART II: TECHNOLOGICAL DIFFUSION AND INTERRELATIONSHIPS BETWEEN SECTORS

6. Distributed knowledge bases in low- and medium-technology industries	93
<i>Paul L. Robertson and Keith Smith</i>	
7. LMT innovations in a high-tech environment: human-factor 'tools' for the airline industry	118
<i>David Jacobson and Bernard. Musyck</i>	

8.	Technology fusion and organizational structures in low- and medium-tech companies <i>Daniela Freddi</i>	140
9.	Industrial innovations in relation to service sectors <i>Marja Toivonen</i>	160
10.	The relevance of services for high-, medium- and low-tech firms - an empirical analysis in German industry <i>Eva Kirmei; Gunter Lay and Steffen Kinkel</i>	175
PART III: LOCAL VERSUS GLOBAL PERSPECTIVES IN INNOVATION		
11.	Innovation activities versus competitiveness in low- and medium-technology-based economies: the case of Poland <i>Anna Wziqtek-Kubiak</i>	197
12.	Low-tech industries between traded and untraded interdependencies: a dynamic concept of industrial complementarities <i>Martin Heidenrekh</i>	221
13.	High-tech innovation in catching-up countries: conditions and perspectives <i>Slaffan Laestadius, Linda Gustavsson and Vicky Long</i>	245
14.	Worshipping at the shrine of the knowledge-based society? <i>James Wickham</i>	267
	<i>Index</i>	285
