

Water Sensitive Cities

Carol Howe and Cynthia Mitchell
Editors

Publishing
London • New York

Contents

Foreword.	xv
Acknowledgements.	xxiii
Chapter 1	
<i>Introduction.</i>	1
<i>Cynthia Mitchell and Carol Howe</i>	
PART I	
Framing the Transition.	7
Chapter 2	
<i>Achieving the water commons - the role of decentralised systems.</i>	9
<i>Valerie Nelson</i>	
2.1 Introduction.	9
2.2 Infrastructure that Mimics and Works with Nature.	11
2.2.1 Networks of decentralized and centralized infrastructure.	11
2.2.2 Interdisciplinary integration across infrastructure sectors.	12
2.3 Restoring the Water Commons.	13
2.3.1 Water at the heart of all life.	14
2.3.2 Enhancing the commons through smart, clean, and green design.	14

2.4	Design Practices and Values in the New Water Paradigm.	18
2.4.1	Capturing the benefits in practice.	19
2.4.2	Watershed and planetary externalities.	20
2.5	Policies to Restore the Water Commons.	20
2.5.1	Current governance constraints.	20
2.5.2	New pricing principles and incentives.	21
2.5.3	Learning from other sectors.	22
2.5.4	Achieving an optimal mix is difficult.	23
2.5.5	... and urgent so we must act artfully now.	25
2.6	Concluding Remarks.	26

Chapter 3

	<i>Transitioning to the water sensitive city: the socio-technical challenge.</i>	<i>29</i>
	<i>Rebekah Brown</i>	

3.1	Introduction.	29
3.2	Traditional & Adaptive Management	30
3.3	Envisaging Water Sensitive Cities.	32
3.4	Transitioning to the Water Sensitive City.	34
3.5	Barriers and Opportunities for Transitioning.	37
3.6	Conclusion.	39

Chapter 4

	<i>Effectively managing the transition towards restorative futures in the sewage industry: a phosphorus case study.</i>	<i>43</i>
	<i>Cynthia Mitchell, D. Fam and D. Cordell</i>	

4.1	Introduction.	43
4.1.1	New costing perspectives.	44
4.1.2	Participatory, deliberative decision making in developing water systems.	45
4.1.3	Shifting from a resource focus to service focus.	45
4.1.4	Systemic thinking & synergies between energy, water reuse and nutrient recovery.	46
4.2	Managing a Transition Toward Restorative Futures.	46
4.3	Adopting Strategic Niche Management to Implement Radical Innovation in Resource Recovery and Reuse.	49

4.4	Phosphorus Security: A Case for Transition.	50
4.4.1	A new global challenge: from phosphorus pollution to phosphorus scarcity.	50
4.5	The Role of Niche Based Approaches to Resource Recovery in a Sustainable Phosphorous Future.	53
4.6	Conclusion.	56

Chapter 5

The influence of water on urban energy use. 63

Steven. J. Kenway and Paul Lant

5.1	Introduction.	64
5.2	Opportunities to Influence Water-Related Energy.	66
5.2.1	Energy use in the provision of water.	67
5.2.2	Energy use associated with the use of water.	68
5.2.3	Energy associated with the nutrient cycle.	69
5.2.4	Urban heat island effect	70
5.3	The Water-Energy Nexus in the Bigger Picture of Urban Metabolism.	70
5.3.1	Recent urban metabolism analysis.	71
5.3.2	Recent application of the metabolism model.	72
5.4	Water and Energy Integration Futures.	74
5.5	Conclusions, Implications and Recommendations.	77

Chapter 6

A framework for developing sustainable water utilities in the coming decades. 81

Peter D Binney

6.1	Introduction.	81
6.2	Challenges Facing Water Providers.	82
6.3	Sustainability - A Path Forward.	85
6.4	A Framework for Transformation to Sustainable Utilities.	87
6.4.1	Key success factors.	87
6.4.1.1	Leadership.	87
6.4.1.2	Strategic business planning.	88
6.4.1.3	Effective management and governance.	89
6.4.1.4	Efficient use of resources.	90
6.4.1.5	Full cost life cycle accounting.	91
6.4.1.6	Integrated resource management	91
6.5	Conclusions.	93

PART II**Bringing the People with You. 95****Chapter 7*****Communicating across disciplinary divides - are we bridging the gap?* 97***Carol Howe*

- 7.1 Introduction: Wicked Problems and Complex Systems. 98
- 7.2 Understanding the Terminology. 99
- 7.3 Disciplinary Approach to Sustainability. 100
- 7.4 SWITCH: A Project Designed for Integration and Sustainability. 102
- 7.5 Recommendations. 104
 - 7.5.1 Changes to the education system. 104
 - 7.5.2 Better balanced teams. 105
 - 7.5.3 Training of teams. 105
 - 7.5.4 Appoint a neutral lead facilitator/ coordinator/translator. 106
 - 7.5.5 New learning environments. 106
- 7.6 Conclusions. 106

Chapter 8***Plain speaking about water- experience from the trenches* 109***Jennifer Simpson*

- 8.1 Introduction. 110
- 8.2 Negative Terminology and Images. 112
 - 8.2.1 Would you like a glass of treated sewage, dear?. 112
 - 8.2.2 Quality, not history. 113
 - 8.2.3 Recycled water: do not drink. 113
 - 8.2.4 Microconstituents. 114
- 8.3 Anomalies. 114
 - 8.3.1 Water reuse is the water industry's best kept secret 114
 - 8.3.2 Two sets of guidelines for drinking water. 114
 - 8.3.3 How long is the miracle mile?. 114
- 8.4 We Start Too Late. 115
- 8.5 Surveys. 116
- 8.6 The Problem is not Being Addressed. 117

8.7	The Way Forward	118
8.7.1	Terminology	118
8.7.2	Training for presenters	119
8.7.3	Cultural changes	119
8.7.4	Anomalies	119
8.7.5	Establishing trust	119
8.8	An Education Program is Urgently Needed	120

Chapter 9

	<i>Water: nature's amazing reusable resource</i>	123
	<i>Linda Macpherson</i>	

9.1	Introduction	124
9.2	Why Reuse Projects Fail	125
9.3	Key Components of Successful Reuse Outreach Programs	127
9.4	Developing Sustainable Community Support	133
9.5	The World Won't Think Differently About Water Until the Water Industry Starts Thinking Differently	135

Chapter 10

	<i>From zero to hero: NEWater wins public confidence in Singapore</i>	139
	<i>Yap Kheng Guan and Sally Toh</i>	

10.1	Background	139
10.2	Water recycling: bane or boon?	140
10.3	Breaking the psychological barrier	141
10.4	Changing mindsets and perception	142
10.5	Engaging the stakeholders	142
10.6	From zero to hero	145

Chapter 11

	<i>Singapore's marina barrage and reservoir - changing mindsets in urban solutions</i>	147
	<i>Brendan Harley</i>	

11.1	Article	147
11.2	20 Years in the Making	148
11.3	An Advance in Multi-Purpose Urban Water Management	150
11.4	A Model for Urban Centres	151
11.5	Social, Economic and Sustainable Design Considerations	152

11.6	Engineering Complexity.	153
11.7	A Model for 'Cities of the Future'.	154

PART III

Driving Better Design.	155
---------------------------------------	------------

Chapter 12

Strategic planning for sustainable and integrated urban water management in some SWITCH demonstration cities.

<i>demonstration cities.</i>	157
---	------------

Peter van der Steen

12.1	Introduction.	157
12.2	Strategic Planning and Sustainability Indicators.	158
	12.2.1 The process of strategic planning.	158
	12.2.2 Assessing sustainability.	159
12.3	Scientific Assessment Tools and System Boundaries: Effect on Recommendations for Urban Water Management.	162
	12.3.1 General.	162
	12.3.2 Water-balance and energy studies for the development of urban water management strategies.	163
	12.3.3 Application of QMRA to the entire urban water system.	164
	12.3.4 A life cycle analysis (LCA) of the urban water system.	166
12.4	Lessons Learned in SWITCH Demonstration Cities on Strategic Planning for the Urban Water System.	167
12.5	Conclusions.	168

Chapter 13

Water centric cities of the future - towards macro scale assessment of sustainability.

<i>Water centric cities of the future - towards macro scale assessment of sustainability.</i>	171
--	------------

Vladimir Novotny and Eric V. Novotny

13.1	Introduction.	172
13.2	Assessment of Sustainability.	174
	13.2.1 Microscale assessment indices and metrics.	174
	13.2.2 Need for macroscale criteria and assessment.	175
13.3	Seven Ecocities Case Study.	178
	13.3.1 Hammarby sjbstad (Sweden).	178
	13.3.2 Dongtan (China).	178

13.3.3	Qingdao (China) ecoblock and ecocity.	180
13.3.4	Tianjin (China).	181
13.3.5	Masdar (UAE).	182
13.3.6	Treasure Island (San Francisco, California, USA).	183
13.3.7	Sonoma mountain village.	183
13.4	Synthesis.	184
13.4.1	Lack of macroscale assessment	186
13.5	Summary.	188

PART IV

Leading by Example.	191
-----------------------------	-----

Chapter 14

<i>Water, neighborhoods and urban design: micro-utilities and the fifth infrastructure.</i>	193
<i>Vicki Elmer and Harrison Fraker</i>	

14.1	Introduction.	194
14.2	Building Level Solutions.	195
14.2.1	Energy: conservation & on-site production.	195
14.2.2	Water.	195
14.2.3	Integrated systems for water, waste & energy.	196
14.3	Need for Neighbourhood Scale Solutions.	197
14.4	Six Eco-Neighbourhoods.	198
14.4.1	Energy in the eco-neighbourhoods.	200
14.4.2	Water and waste in the eco-neighbourhood.	201
14.5	Implications for Urban Design and Water.	203
14.6	Conclusion.	206

Chapter 15

<i>Keys to successful transitioning-lessons from the Netherlands' and Japanese delta cities.</i>	209
<i>Rutger de Graaf and Frans van de Ven</i>	

15.1	Introduction.	209
15.2	Water, the Key to Improvement.	210
15.2.1	Sustainable.	211
15.2.2	Climate-resilient.	214
15.2.3	Adaptable.	216
15.2.4	Healthy.	219
15.2.5	Pleasant.	219
15.3	Transitioning Towards Water Cities.	220

15.3.1	Mainstreaming of urban water management innovations.	221
15.3.2	Integration of urban water management in spatial planning.	221
15.3.2.1	Example from the Netherlands: Rotterdam Water City 2035.	221
15.3.2.2	Example from Japan: Superlevee.	222
15.3.3	Stakeholder receptivity.	224
15.3.3.1	Example from the Netherlands: De Draai Heerhugowaard.	224
15.3.3.2	Example from Japan: Water recycling.	225
15.4	Conclusion.	226

Chapter 16

System solutions in urban water management: the Lodz (Poland), perspective. 231

Iwona Wagner and Michael Zalewski

16.1	Introduction.	232
16.2	Lodz-City on the 'Edge'.	233
16.2.1	Ecohydrology - a more sustainable way forward	235
16.2.2	Applying the ecohydrology to urban areas.	235
16.2.3	Blue green network.	242
16.3	Conclusions.	245

Chapter 17

The Rotterdam approach: connecting water with opportunities. 251

J.C.J. Jacobs

17.1	Climate Change: Prevention and Adaptation.	252
17.2	Rotterdam Climate Proof.	253
17.3	The Rotterdam Approach.	254
17.3.1	Three pillars.	254
17.3.2	Rotterdam adaptation strategy (RAS).	255
17.3.3	Five subject-related main themes.	256
17.3.3.1	Flood management.	256
17.3.3.2	Accessibility.	257
17.3.3.3	Adaptive building.	258
17.3.3.4	Urban water system	259
17.3.3.5	Urban climate.	260
17.3.4	Seven strategic projects.	261

17.3.5	Connection between the pillars, themes and strategic projects.	262
17.4	Improving Urban Environments.	262

Chapter 18

	<i>Water challenges in building a sustainable city in the middle east-A masdar perspective</i>	265
--	---	-----

Meghan Hartman, Ameena Kulaib and Jay Witherspoon

18.1	Introduction.	265
18.2	Background.	269
18.3	Project Description.	270
	18.3.1 Sustainable water sources.	270
	18.3.2 Water strategy.	271
18.4	Regulation and Infrastructure Design.	273
18.5	Technology Innovation.	274
18.6	System Integration.	275
18.7	Conclusions.	276
