<b>FOREWORD</b>	<i>(Marc Verwilghen)</i>	v
<b>PREFACE</b>	<i>(Philippe Mettens)</i>	xv
<b>CHAPTER 1</b>	<b>THE INTERNATIONALISATION OF R&amp;D IN SMALL OPEN ECONOMIES: SPILLOVERS, COLLABORATIONS AND PATENTED KNOWLEDGE</b>	<b>1</b>
	<i>André Spithoven and Peter Teirlinck</i>	
1.	Introduction	1
2.	Internationalisation of research and development	3
3.	R&D in small open economies	5
4.	The issues and the contributions	9
	4.1. National innovation system approach and small open economies	9
	4.2. International R&D spillover effects	12
	4.3. Collaboration	14
	4.4. Patented knowledge	16
5.	Belgium as a small open economy	18
	References	21
<b>CHAPTER 2</b>	<b>THE IMPACT OF FOREIGN INVESTMENT ON PRODUCTIVITY AND TECHNOLOGY IN BELGIUM</b>	<b>23</b>
	<i>Koen De Backer and Leo Sleuwaegen</i>	
1.	Introduction	23
2.	Foreign direct investment in Belgium	25
3.	Differences in structure and technology between foreign and domestic firms	29
4.	Productivity and technology advantages of foreign firms	32
5.	The contribution of foreign firms to overall productivity growth in Belgium	35
6.	Foreign presence and the change in the trade structure of Belgium	37
7.	Conclusions	39
	References	40

### **CHAPTER 3 THE IMPACT OF GLOBALISATION OF BUSINESSES ON NATIONAL R&D SUPPORT 43**

*Maarten Sileghem, Jonathan Slow and Leo Van de Loock*

1. Introduction	44
1.1. Background	44
1.2. Rationale and aim of the project	44
2. Best practice	45
2.1. Preliminary results from an ad hoc group	45
2.2. Case study approach	46
2.3. Conclusions from the case study approach	47
2.4. Best practice	47
2.5. Way forward	48
2.6. Implementation	49
3. Joint action through shared funding	50
3.1. Cross-border projects	50
3.2. Feasibility	51
3.3. Facilitators' opinions	51
3.4. Way forward	52
3.5. Implementation	52
4. Recommendations as made to the board of directors of TAFTIE	53
5. Opinion of industry: results from a survey	54
5.1. Sample	54
5.2. Background questions	54
5.3. Opinion on the best practice	56
5.4. Opinion on shared funding	57
5.5. Conclusions from the survey	59
6. Recent developments: a case study at IWT	59
6.1. Evaluation procedure	59
6.2. Bilateral interactions	60
7. Concluding remarks and recommendations	61

### **CHAPTER 4 REGULATORY FRAMEWORK REGARDING OWNERSHIP OF INVENTIONS CONCEIVED AT UNIVERSITIES 65**

*Marie-Christine Janssens*

1. Introduction	65
2. Legal framework in Belgium	68
2.1. Situation at universities in the Flemish Community	68
2.2. Situation at universities in the French Community	71

2.3. Conclusions for Belgium	73
3. Overview of the situation in European Member States	74
3.1. In general	74
3.2. An 'economic-oriented' approach (France, Spain, the Netherlands)	75
3.3. From an 'academic approach' to an 'economic-oriented' approach (Germany, Denmark, Finland)	77
3.4. Situation in other countries	83
4. Situation in the USA and Japan	86
4.1. United States of America	86
4.2. Japan	88
5. Conclusions and considerations	90
References	94

**CHAPTER 5    LEGAL ENVIRONMENTS AND FIRST  
INTERNATIONAL MARKET ENTRIES:  
EVIDENCE ON THE INTERNATIONALISATION  
OF NEW TECHNOLOGY-BASED FIRMS IN  
THREE EUROPEAN COUNTRIES** 97

*Régis Coeurderoy and Gordon Murray*

1. Introduction	98
2. Internationalisation and the young firm: background and hypotheses	99
2.1. Cross-country legal institutions and the diverse 'rules of the game'	99
2.2. Young firms as players in the game: learning the rules in the internationalisation process	101
3. Research design and methodology	103
3.1. Data	104
3.2. Dependent variable	105
3.3. Explanatory and control variables	106
4. Data analysis and results	109
4.1. Descriptive results	109
4.2. Statistical analysis	111
5. Concluding comments	115
5.1. The impact of legal origins on the internationalisation of start-ups	115
5.2. Limitations and extensions of the study	117
5.3. Conclusions	118
References	120

<b>CHAPTER 6</b>	<b>GROWTH OF HIGH-TECH START-UPS: AN INTERNATIONAL PERSPECTIVE</b>	<b>125</b>
	<i>Bart Clarysse and Johan Bruneel</i>	
1.	Introduction	126
2.	Literature overview	127
2.1.	Transaction cost theory	128
2.2.	Stage theory	128
2.3.	Network theory	130
2.4.	New venture theory of internationalisation	131
3.	Unit of analysis, sample and data collection	133
3.1.	Unit of analysis: research based start-ups	133
3.2.	Sample	133
3.3.	Data collection	134
4.	Operationalisation of the measures	134
4.1.	Dependent variable: degree of commercial internationalisation	134
4.2.	Independent variables	135
4.3.	Control variables: age and size	136
5.	Characterisation of the firms in the sample	137
6.	Results and analysis	137
6.1.	Results	137
6.2.	Analysis	138
7.	Conclusion and policy recommendations	139
	References	141
<b>CHAPTER 7</b>	<b>A CROSS-COUNTRY COMPARISON OF INNOVATION: THE ROLE OF HUMAN CAPITAL AND SOCIAL CAPITAL</b>	<b>147</b>
	<i>Dirk De Clercq and Mourad Dakhli</i>	
1.	Introduction	148
1.1.	Human capital	151
1.2.	Social capital	153
2.	Hypotheses	154
2.1.	Human capital and innovation	154
2.2.	Social capital and innovation	155
3.	Methodology	161
3.1.	Data and sample	161
3.2.	Constructs	162
4.	Results	166
5.	Discussion and policy implications	168

6. Concluding notes	171
References	172
 <b>CHAPTER 8 BRAIN DRAIN, BRAIN GAIN AND BRAIN EXCHANGE: THE ROLE OF MNEs IN A SMALL OPEN ECONOMY</b>	 179
<i>Michele Cincera</i>	
1. Introduction	179
2. R&D activities of MNEs	181
2.1. Impact of MNEs' R&D activities	181
2.2. Determinants of MNEs' R&D activities	182
3. Data and hypotheses	183
3.1. Data	184
3.2. Hypothesis	185
4. Empirical findings	188
4.1. The high concentration of the Belgian technological base	188
4.2. The high internationalisation of the Belgian technological base	189
4.3. Market driven versus technology-push factors	193
4.4. MNEs' R&D activities and brain drain	196
5. Conclusion	200
References	202
Appendix	205
 <b>CHAPTER 9 LOCATION AND AGGLOMERATION OF FOREIGN R&amp;D ACTIVITIES IN A SMALL OPEN ECONOMY</b>	 207
<i>Peter Teirlinck</i>	
1. Introduction	207
2. Theoretical background and data description	208
2.1. Background	208
2.2. Data description	210
3. Internationalisation of R&D	211
3.1. Business R&D activity in Belgium financed from abroad	212
3.2. Business R&D activity in Belgium under foreign control by sector, by size and by country of origin	216
4. Motives for R&D location by foreign controlled firms	220
4.1. Motives for the location of private business R&D	222
4.2. R&D collaboration in foreign subsidiaries and the role of type and proximity of R&D partner	224

5. Policy conclusions	228
References	230
Appendix	234

<b>CHAPTER 10 CAPTURING VALUE FROM RADICAL INNOVATION: MANAGING INTERNATIONAL PARTNERSHIPS</b>	235
<i>Els Van de Velde and Bart Clarysse</i>	

1. Introduction	236
2. Importance of radical innovations for established firms	237
3. Corporate entrepreneurship and R&D: make radical innovation possible	239
4. Recognising radical innovations	240
5. Importance of networks	241
6. Methodology	243
7. Basic research: a ticket to an international information network	245
8. Description of cases	247
9. Case analysis and discussion	250
10. Policy implications	252
References	254

<b>CHAPTER 11 INTERNATIONALISATION OF INNOVATION IN A SMALL OPEN ECONOMY: EXPLORING THE ROLE OF OWNERSHIP STRUCTURE ON PERFORMANCES AND R&amp;D COLLABORATION</b>	259
<i>André Spithoven</i>	

1. Introduction	260
2. Use and limits of innovation survey data	263
3. Internationalisation of innovation: does ownership structure matter?	265
3.1. Performances and markets of innovative enterprises	270
3.2. Innovation styles: radical versus incremental innovation	272
3.3. Ownership structure and enterprise characteristics	273
4. International collaboration of innovative enterprises	275
4.1. A concise geography of international collaboration	276
4.2. Partners in collaboration on innovation	279
4.3. Collaboration and enterprise characteristics	281
4.4. Sources of innovation, collaboration and ownership structure	283
4.5. Obstacles to innovation, collaboration and ownership structure	287

4.6. Effects of innovation, collaboration and ownership structure	290
5. Policy implications: protecting the family jewels?	290
References	292
Appendix	295

**CHAPTER 12 THE COMMITMENT OF BELGIAN TEAMS  
TO EUROPEAN S&T COOPERATIVE  
AGREEMENTS** 297

*Henri Capron and Michele Cincera*

1. Introduction	297
2. European S&T cooperative agreements: a review of selected studies	299
3. Pre-competitive and near-the market collaboration data sets	303
4. Stylised facts about EU pre-competitive and near-the-market S&T collaborations	305
4.1. Trends in European S&T collaborations	305
4.2. EU Member States participation	308
4.3. EU Member States mutual collaborative links	310
4.4. Technological revealed comparative advantages (TRCA)	313
4.5. Technological proximities	314
4.6. Top participants	316
5. Concluding remarks	318
References	319
Appendix	322

**CHAPTER 13 INTERNATIONAL KNOWLEDGE FLOWS  
FROM AND INTO A SMALL OPEN ECONOMY:  
PATENT CITATION ANALYSIS** 331

*Ruslan Lukach and Joseph Plasmans*

1. Introduction	331
2. Overview of the data	336
3. Preliminary data analysis	337
4. Model and estimations	344
4.1. Citation pairs modelling	344
4.2. The intra-firm/intra-industry positioning of industries	346
5. Conclusions and policy discussion	350
Appendix	352
References	355

<b>CHAPTER 14 THE INTERNATIONALISATION OF THE PRODUCTION OF TECHNOLOGY: A MORE COMPLETE PICTURE FOR BELGIUM</b>	<b>359</b>
<i>Michele Cincera, Bruno van Pottelsberghe de la Potterie and Reinhilde Veugelers</i>	
1. Introduction	360
2. Literature review	361
2.1. Changing international R&D strategies by MNEs	361
2.2. Measuring a country's internationalisation of the production of technology	362
3. Data and summary statistics	364
4. Searching for a more complete picture: foreign ownership of patents invented in Belgium	367
5. Inward R&D-FDI: foreign ownership of patents invented in Belgium	368
6. Outward R&D-FDI: Belgian ownership of patents invented abroad	374
7. Concluding remarks	381
References	383
<b>CHAPTER 15 TURNING FACTS INTO POLICY: IMPLICATIONS OF THE INTERNATIONALISATION OF R&amp;D FOR SMALL OPEN ECONOMIES</b>	<b>387</b>
<i>André Spithoven and Peter Teirlinck</i>	
1. Introduction	387
2. Framework conditions: shaping the rules of the game	391
3. Knowledge workers in science and technology	394
4. Knowledge infrastructure: education and research system	397
5. Knowledge transfer: networking, clustering and partnerships	401
6. R&D and innovation expenditures	405
7. Innovative and technological output	410
8. Concluding remarks	413
References	414
