<b>List of figures</b>	viii
<b>List of tables</b>	x
<b>Foreword to the first edition</b>	xi
<b>Preface</b>	xiii
<b>1 Introduction</b>	<b>1</b>
1.1 Economists' views of technological change	1
1.2 Some reasons for the growth of economists' interest in technological change	4
1.3 Technology as a form of human knowledge	6
1.4 Innovating as an economic activity	10
1.5 Some international comparisons	15
1.6 The many faces of technological change	18
Notes	25
<b>2 Resources, technology and production: an overview</b>	<b>27</b>
2.1 Two familiar descriptions of the economic system	27
2.2 An aggregate production model	31
2.3 Population: labour force and mouths to feed	34
2.4 Capital: the economy's plant and equipment	41
2.5 Land: space, resources, sink	44
2.6 A final look at the aggregate production model	49
Notes	52
<b>3 The microeconomics of production and technological change</b>	<b>54</b>
3.1 The production function and technical efficiency	54
3.2 Input prices and economic efficiency	59
3.3 Technological change in the neoclassical model	64
3.4 Alternative approaches	66
3.5 A preliminary summing-up	75
Notes	76
Appendix: Readings on heterodox theories of the firm	77
<b>4 Returns to scale, economics of scale, economics of scope, and learning</b>	<b>79</b>
4.1 Basic concepts	79
4.2 The theory of scale effects	81

4.3 Economies of scale	84
4.4 External economies and diseconomies of scale	87
4.5 Economies of scope	88
4.6 Learning effects	89
4.7 Scale and scope in the industrial setting	90
4.8 Scale and technological change	95
4.9 Summary	102
Notes	103
<b>5 The evaluation of industrial performance</b>	<b>104</b>
5.1 The firm – structure and environment	104
5.2 Managerial decisions and performance	105
5.3 The basic determinants of performance	109
5.4 Productivity analysis	III
5.5 Linking physical performance with costs	113
5.6 Integrating unit costs with other performance determinants	114
5.7 Some problems of measurement	117
5.8 Concluding observations	122
Notes	123
<b>6 Inventing as an economic activity</b>	<b>125</b>
6.1 Basic concepts	125
6.2 The supply of inventions	128
6.3 Independent inventors and organized inventive activity	136
6.4 Corporate strategies for inventive activity	141
6.5 Industry structure and inventive performance	143
Notes	145
<b>7 The economics of the patent system</b>	<b>147</b>
7.1 Protecting intellectual property	147
7.2 Patents and the patent system	151
7.3 Legal features of patents	152
7.4 The origins and development of the patent system	155
7.5 The inventor's monopoly	158
7.6 Economic evaluations of the patent system	166
7.7 Concluding observations	169
Notes	169
<b>8 Development and innovation</b>	<b>171</b>
8.1 Concepts and definitions	171
8.2 Some historical evidence	174
8.3 The management of innovation	181
8.4 The broader context of innovation strategy	189
Notes	192

Appendix: Innovation in a large corporation, by Dr John Coltman	192
<b>9 The diffusion of innovations</b>	<b>197</b>
9.1 Introductory observations	197
9.2 The diffusion process—general models	199
9.3 Diffusion in the industrial setting	204
9.4 Factors influencing diffusion rates	210
9.5 A brief comment on the diffusion of consumer innovations	218
Notes	220
<b>10 The evolution of basic technologies</b>	<b>222</b>
10.1 Introductory observations	222
10.2 Microeconomic effects—elementary theory	224
10.3 A more complex view of likely effects	226
10.4 Levels and timing of effects	230
10.5 An evolutionary interpretation	234
10.6 Are industries tied to technological evolution?	240
10.7 The long-wave hypothesis	243
Notes	245
Appendix: The ripple effects of technological change – a case study, by William S. Peirce	246
<b>11 Government and technological change</b>	<b>252</b>
11.1 The pervasiveness of government influence	252
11.2 Governments as financiers of R&D	257
11.3 Government as a regulator of technology	261
11.4 Technology policy	271
11.5 Summary	274
Notes	276
<b>12 Technology and international economic relations</b>	<b>278</b>
12.1 Theoretical background	278
12.2 'Competitiveness' and exchange rates	283
12.3 Technology transfer – mechanisms and likely effects	286
12.4 Multinational firms as agents of technology transfer	289
12.5 Technology transfer through interfirm cooperation	292
12.6 The role of the United States in the world's technology system	295
12.7 Concluding observations	299
Notes	301
